Love In Paris - Poetic Guide to the Romance of the City

The history of the Catholic missions in China, more than that of any other mission field, displays bright lights and dark shadows. From the time of Christianity's first contact with China in the 13th century, the Church achieved victorious expansion and had well-founded hopes for the conversion of the whole Chinese nation: but she also experienced tragic failures. The history of the Chinese missions is rich in great initiatives, admirable talents, and heroic sacrifices. In this vineyard of the Lord, along with others who were not always at the height of their sublime vocation, there worked great men, saints, martyrs. The 18th century however, is one of the less inviting periods of Chinese mission history. After the great successes and hopes of the previous century, there followed frustrations, persecution, failure and decline. Nevertheless, even in this period of decadence, there were great men on the scene. One of them was Gottfried Xavier von Laimbeckhoven, Jesuit, missionary and bishop. Over a span of fifty years he was in the center of events and, in the light of this great though tragic figure, we can study the history of the missions of China for the period between 1738 and 178

According to the people of the Mueda plateau in northern Mozambique, sorcerers remake the world by asserting the authority of their own imaginative visions of it. While conducting research among these Muedans, anthropologist Harry G. West made a revealing discovery—for many of them, West's efforts to elaborate an ethnographic vision of their world was itself a form of sorcery. In *Ethnographic Sorcery*, West explores the fascinating issues provoked by this equation. A key theme of West's research into sorcery is that one sorcerer's claims can be challenged or reversed by other sorcerers. After West's attempt to construct a metaphorical interpretation of Muedan assertions that the lions prowling their villages are fabricated by sorcerers is disputed by his Muedan research collaborators, West realized that ethnography and sorcery indeed have much in common. Rather than abandoning ethnography, West draws inspiration from this connection, arguing that anthropologists, along with the people they study, can

scarcely avoid interpreting the world they inhabit, and that we are all, inescapably, ethnographic sorcerers.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a

shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. With the 'Asian Century' now upon us, bringing with it many profound economic and political changes to the world order, it is very timely to assess the state of democracy in the Asian region. Focusing on Eastern Asia, this book provides such a review, highlighting lines of connections between the states and peoples of this complex and dynamic region. Featuring chapters on China, Japan, Taiwan, South Korea, Hong Kong, Indonesia, Malaysia, Singapore, Thailand, the Philippines, Cambodia, and Myanmar, this book provides a detailed analysis of the state of democracy in each country or territory, and shows how each is different and distinctive, whilst simultaneously drawing out important similarities. Further, it provides up to date analysis of political changes in the region relating to the processes of democratization, and, in some cases, to the ongoing quest for democracy. Critically examining the current state of political development in the region, the chapters explore the issues and problems that challenge the region's governments in terms of democratic transition, democratic consolidation, democratic improvement and good governance. With contributions from leading

international scholars, this book will be of great interest to students and scholars interested in Asian politics, and politics and democratization studies more broadly.

Although engineers receive an outstanding technical education, their success in today's organization demands knowledge of how to put that education to work. The Management Survival Manual for Engineers provides this information, creating the bridge between the world of science and the working organization. The text discusses the management of technology within the organization, the management of the engineering department, and the management of engineering projects through technical approaches and personnel aspects. The Management Survival Manual for Engineers introduces the engineer to basic management of engineering, encouraging essential leadership and managerial philosophies. The book acts as a primary resource for engineers moving into managerial areas as opposed to technological ones. It addresses a multitude of topics, enabling the reader to grasp general concepts before addressing more specific concepts. Topics include: Examining the inter-organizational behavior, procedures, and policies required to work in formal organizations. Identifying the required knowledge of leadership Outlining the principles for effective communication skills Determining the responsibilities of the organization and engineering manager for preparing the new engineer entering the organization Introducing how engineering functions in

the organization Forming a basic understanding for project management
Describing the transition from new engineer to supervisor The Management Survival Manual for Engineers emphasizes an understanding of people, the organization, and management as opposed to technology - serving engineers entering the engineering field as well as those engineers moving into project management for the first time.
