Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

ASEAN as a Method

Mobile phone use in the United States has risen dramatically over the last 20 years, and Americans increasingly rely on mobile phones as their sole or primary means of telephone communication. The rapid adoption of mobile phones has occurred amidst controversy over whether the technology poses a risk to human health. Like other devices that transmit radio signals, mobile phones emit radio-frequency (RF) energy. At high power levels, RF energy can heat biological tissue and cause damage. Though mobile phones operate at power levels well below the level at which this thermal effect occurs, the question of whether long-term exposure to RF energy emitted

from mobile phones can cause other types of adverse health effects, such as cancer, has been the subject of research and debate. This book examines what is known about the health effects of RF energy from mobile phones, with a focus on the FCC and FDA's regulatory responsibilities; and other scientific research.

" I read on. And then it happens. On page 89. Mary is humiliated, and I know I have to step in. There she is, in an ill-fitting, wine-colored gown that doesn't do anything for her mousy complexion, gathering up her music, when I pass by, and spill my glass of punch right on her dress. I turn, and there is Kevin, dressed in a scarlet coat and all the rest of the uniform of a British Soldier, circa 1811. 'What are you doing here?' I ask. 'Well, this is the part I'm up to in the book.'" The smart middle child in a blue-collar family identifies with Mary, the middle child in Jane Austen's *Pride and Prejudice*. When Alice enters Mary's world and makes changes in both their lives, she learns that first impressions aren't always right.

The Car Book

When originally published in 1984, and based on archival research, this book was the first fully documented discussion of German naval strategy and planning from 1862-1914 against France, Russia, Great Britain, the United States and Japan. The book is a complete study of the relationship of the navy to Prusso-German power politics both in terms of the complexity of the problems discussed and in the length of the period covered. It will be invaluable to students of naval and military history, strategy and diplomacy, as well as those of German history.

This work responds to the need to find, in a sole document, the affect of oxidative stress at different levels, as well as treatment with antioxidants to revert and diminish the damage. Oxidative Stress and Chronic Degenerative Diseases - a Role for Antioxidants is written for health professionals by researchers at diverse educative institutions (Mexico, Brazil, USA, Spain, Australia, and Slovenia). I would like to underscore that of the 19 chapters, 14 are by Mexican researchers, which demonstrates the commitment of Mexican institutions to academic life and to the prevention and treatment of chronic degenerative diseases.

The Good, the Bad, and the Very Slimy

This is the compelling story of the puzzling decline and fall of one of America's most prestigious automobile manufacturers, a company that for most of the fifty-nine years of its history was a synonym for luxury, excellence, and corporate stability. Although many books have extolled the long, glamorous history of Packard, this book focuses on the dark, post-World War II years that led to its dissolution in 1956. For the first time, this book gives an authoritative, deeply researched, and convincing explanation of why the Packard Motor Car Company died in the midst of one of the greatest automotive booms in history.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Cherished childhood playthings of yesteryear, vintage toy cars are now highly coveted collectibles.

Illustrated with over a hundred colorful photographs, *Wheels* is a delightful history of toy motor vehicles from the 1890s up to the present. Authors Mike and Sue Richardson, both avid collectors, trace the history of these popular toys from early cast-iron models to state-of-the-art vehicles made from modern materials. The renowned Christie's collection provides wonderful examples of vintage fire trucks, delivery vans, coupes, hot rods, roadsters, and motorcycles manufactured by famous toy makers from around the world, exhibiting the fine craftsmanship and ingenuity of more than a century of toy making. *Wheels* is a rare treat for anyone who admires vintage toys or spent childhood days happily "driving" toy cars around the neighborhood. Christie's, established over 200 years ago, is among the world's preeminent auction houses for fine art and collectibles. The Christie's collection of automotive toys is recognized internationally.

This edited volume proposes that an understanding of ASEAN – its development and institutionalization – is invaluable to our conception of international relations theory in the Asian context. Southeast Asia and ASEAN host peoples, ideas, institutions, and relations that contribute to a critical reassessment of theories in social sciences. In the field of IR, studies on transnational networks, diasporas, small states, middle powers, the role of history, and identity learn from Southeast Asian practices. ASEAN has long been established as an authoritative example of alternative ways of regional institutionalization. Besides empirical analysis, these fields can also benefit from their interactions with regional scholarly communities. This edited book offers an opportunity for a dialogue among scholarly communities on a variety of issues of which Southeast Asia and ASEAN provide ample opportunities for a critical analysis. This book will be of great interest to scholars of ASEAN, the broader Asian region, and for scholars of regionalism in general.
