Get It Together

Criminal psychology is the application of the principles of normal and abnormal psychology to the understanding, prediction, and control of criminal behavior. *Criminal Psychology: Nature, Nurture, Culture* provides an in-depth yet readable introduction to the foundations of criminal psychology as it is understood and practiced from the classroom to the courtroom. The book is organized into five sections. Part I examines the nature and origins of criminal behavior. These chapters outline the role of psychology in the criminal justice system, and review the biology, psychology, and sociology of crime to develop a naturalistic model of criminal behavior that can guide theory and practice in law enforcement, criminal justice, and forensic evaluation. Part II examines the major classes of mental disorder that may be associated with criminal behavior, including psychotic disorders, mood disorders, organic brain syndromes, substance abuse, and personality disorders. Each chapter consists of a description of the syndrome, followed by applications to law enforcement, criminal justice, and forensic mental health issues of competency, sanity, and criminal culpability. Part III deals with death. Topics

include homicide, serial murder, mass homicide, workplace and school violence, and terrorism. Part IV covers sexual offenses and crimes within the family, including rape and sexual assault, sex crimes against children, child battery, domestic violence, and family homicide. Part V discusses the psychological dynamics of a variety of common crimes, such as stalking and harassment, theft and robbery, gang violence, organized crime, arson, hate crimes, victimology, the psychology of corrections, and the death penalty. Each chapter contains explanatory tables and sidebars that illustrate the chapter's main topic with examples from real-life cases and the media, and explore controversies surrounding particular issues in criminal psychology, such as criminal profiling, sexual predator laws, dealing with children who kill, psychotherapy with incarcerated offenders, and the use of "designer defenses" in court. Grounded in thorough scholarship and written in a crisp, engaging style, this volume is the definitive handbook and reference source for forensic psychologists, mental health practitioners, attorneys, judges, law enforcement professionals, and military personnel. It will also serve as an authoritative core text for courses in forensic psychology, criminology, and criminal justice practice.

CRIMINAL PSYCHOLOGY

New York Times Bestseller *The good, the bad, and the ugly*, served up Bourdain-style. Bestselling chef and *Parts Unknown* host Anthony Bourdain has never been one to pull punches. In *The Nasty Bits*, he serves up a well-seasoned hellbroth of candid, often outrageous stories from his worldwide misadventures. Whether scrounging for eel in the backstreets of Hanoi, revealing what you didn't want to know about the more unglamorous aspects of making television, calling for the head of raw food activist Woody Harrelson, or confessing to lobster-killing guilt, Bourdain is as entertaining as ever. Bringing together the best of his previously uncollected nonfiction--and including new, never-before-published material--*The Nasty Bits* is a rude, funny, brutal and passionate stew for fans and the uninitiated alike.

When Dilbert first appeared in newspapers across the country in 1989, office workers looked around suspiciously. Was its creator, Scott Adams, a pen name for someone who worked amongst them? After all, the humor was just too eerily funny and familiar. Since then, Dilbert has become more than a cartoon character. He's become an office icon. In *Another Day in Cubicle Paradise* Dilbert and his cohorts, Dogbert, Catbert, Ratbert, and the pointy-haired boss, once again entertain with

their cubicle humor. From bizarre personnel decisions to meetings gone bad, from schizoid secretaries to consultants from hell, Another Day in Cubicle Paradise provides a way to get all those darn comic strips off the breakroom bulletin board.

An indispensable book for every wine lover, from some of the world's leading wine experts. Where do wine grapes come from and how are grape varieties related to one another? What is the historical background of each one? Where are they grown? What sort of wines do they make? Using cutting-edge DNA analysis and detailing almost 1,400 distinct grape varieties, as well as myriad correct (and incorrect) synonyms, this book examines grapes and wine as never before. Here is a complete, alphabetically presented profile of all grape varieties of relevance to the wine lover, charting the relationships between them and including unique and astounding family trees, their characteristics in the vineyard, and—most important—what the wines made from them taste like. Presented in a stunning design with eight-page gatefolds that reveal the family trees, and a rich variety of full-color illustrations from Viala and Vermorel's century-old classic ampelography, the text will deepen readers' understanding of grapes and wine with every page. Combining Jancis Robinson's worldview and nose for good writing and good wines with Julia Harding's research, expertise, and attention to detail plus Dr. Vouillamoz's unique level of scholarship, Wine Grapes offers essential and original information in greater depth and breadth than has ever been available before. This is a book for wine students, wine experts, and wine lovers everywhere.

Ever wonder what a realtor does to deserve a disproportionately expensive 4%-6% commission on the sale of your home? They claim to offer unlimited exposure and transaction expertise and to act as an irreplaceable mediator in the negotiation process. In reality, what they provide is little more than a concierge tour service to show your home, and is that really worth \$20,000 on the sale of a \$400,000 home? In *Death of the Real Estate Salesman*, Jarred Kessler describes how advances in technology have rendered the traditional role of the real estate agent meaningless. He describes how emerging Internet-based tools will enable homeowners and prospective buyers to find each other with zero commitment, zero uncertainty, and zero realtor involvement. Buyers will be able to find their dream home more readily with less distrust in the process, and

sellers will reap the financial rewards of not losing tens of thousands of dollars to a realtor with a competing agenda. By learning his process, you will open your eyes to the new world of real estate, which is just around the corner in a desirable neighborhood near you.

The Power of Habit: by Charles Duhigg | Summary & Analysis

An instant New York Times bestseller, Dan Lyons' "hysterical" (Recode) memoir, hailed by the Los Angeles Times as "the best book about Silicon Valley," takes readers inside the maddening world of fad-chasing venture capitalists, sales bros, social climbers, and sociopaths at today's tech startups. For twenty-five years Dan Lyons was a magazine writer at the top of his profession--until one Friday morning when he received a phone call: Poof. His job no longer existed. "I think they just want to hire younger people," his boss at Newsweek told him. Fifty years old and with a wife and two young kids, Dan was, in a word, screwed. Then an idea hit. Dan had long reported on Silicon Valley and the tech explosion. Why not join it? HubSpot, a Boston start-up, was flush with \$100 million in venture capital. They offered Dan a pile of stock options for the

vague role of "marketing fellow." What could go wrong? HubSpotters were true believers: They were making the world a better place by selling email spam. The office vibe was frat house meets cult compound: The party began at four thirty on Friday and lasted well into the night; "shower pods" became hook-up dens; a push-up club met at noon in the lobby, while nearby, in the "content factory," Nerf gun fights raged. Groups went on "walking meetings," and Dan's absentee boss sent cryptic emails about employees who had "graduated" (read: been fired). In the middle of all this was Dan, exactly twice the age of the average HubSpot employee, and literally old enough to be the father of most of his co-workers, sitting at his desk on his bouncy-ball "chair."
