Infectious disease surveillance has evolved at an extraordinary pace during the past several decades, and continues to do so. It is increasingly used to inform public health practice in addition to its use as a tool for early detection of epidemics. It is therefore crucial that students of public health and epidemiology have a sound understanding of the concepts and principles that underpin modern surveillance of infectious disease. Written by leaders in the field, who have vast hands-on experience in conducting surveillance and teaching applied public health, *Concepts and Methods in Infectious Disease Surveillance* is comprised of four sections. The first section provides an overview, a description of systems used by public health jurisdictions in the United States and legal considerations for surveillance. The second section presents chapters on major program-area or disease-specific surveillance systems, including those that monitor bacterial infections, foodborne diseases, healthcare-associated infections, and HIV/AIDS. The following section is devoted to methods for conducting surveillance and also approaches for data analysis. A concluding section summarizes communication of surveillance findings, including the use of traditional and social media, in addition to showcasing lessons learned from the New York City Department of Health's experience in surveillance and epidemiology training. This comprehensive

new book covers major topics at an introductory to intermediate level, and will be an excellent resource for instructors. Suitable for use in graduate level courses in public health, human and veterinary medicine, and in undergraduate programs in public-health-oriented disciplines, *Concepts and Methods in Infectious Disease Surveillance* is also a useful primer for frontline public health practitioners, hospital epidemiologists, infection control practitioners, laboratorians in public health settings, infectious disease researchers, and medical and public health informaticians interested in a concise overview of infectious disease surveillance.

This book serves as a comprehensive reference resource for current and prospective English language teachers, students of TESOL, academics, and other professionals working within the field of Teaching English as a Second or Other Language (TESOL). As an essential single-volume resource, *TESOL: A Guide* explores TESOL in three dimensions: as a profession, as a field of study, and as an international association. In doing so, it offers a thorough summary of themes and issues relevant to TESOL's multiple dimensions, including a practical overview of the TESOL profession and a compendium of current TESOL research topics and methodologies. In commemoration of the 50th anniversary of TESOL International Association, a key section of the book highlights the development of this association and features the reflections of several previous TESOL International

Association presidents. Readers will also appreciate the extensive glossary and appendix of TESOL resources, both of which are designed to comprise a valuable and manageable guide for newcomers to the field, as well as for developing practitioners and researchers.

Now in its third edition, this trusted clinical guide enables both the busy

practitioner and student to review or to learn about a range of pathologies, conditions, examinations, diagnostic procedures, and interventions that can be effectively used in the physical rehabilitation of older people. It presents a broad overview of age-related physiological changes as well as specific professional discipline perspectives. Organized into eleven distinct and interrelated units, the first unit begins with key anatomical and physiological considerations seen with aging which have significant impact on the older person. The second and third units go on to review important aging-related conditions and disorders of the musculoskeletal and neuromuscular/neurological systems respectively. Neoplasms commonly encountered in older people are the focus of the fourth unit; while aging-related conditions of the cardiovascular, pulmonary, integumentary and sensory systems are presented in units five through seven. Unit eight highlights a range of specific clinical problems and conditions commonly encountered with older patients. Critically, all of these units emphasize important examination and diagnostic procedures needed for a thorough evaluation and stress interventions that can be of significant benefit to the older patient. The ninth unit presents select physical therapeutic interventions that are especially important in managing rehabilitative care. Key societal issues related to aging are discussed in the tenth unit. Finally, the concluding eleventh unit focuses on the successful rehabilitation team that includes both professional and non-professional caregiver members. A trusted guide to the conditions and problems faced when evaluating and treating geriatric patients Extensive coverage over 84 chapters, each written by an expert

in the field Includes imaging, vision and the aging ear Cross-referenced - providing the complexity and inter-relatedness of co-morbidities common to aging patients Collaborative international perspective Chapters on the aging spine; frailty; safe pilates for bone health; health care for older people Additional renowned editor - Ronald W. Locals and travelers looking for great places to have a meal reach for the MICHELIN Guide New York City 2014 where they'll find meticulously researched, objective recommendations to approximately 950 delicious restaurants in the Big Apple, a city where cuisine reigns supreme. The MICHELIN Guide, updated annually, pleases all palates and pocketbooks. Recession-proof dining options can be found among the Under \$25 restaurants and those with the Bib Gourmand designation—a distinction that highlights inspectors' favorites for good food at reasonable prices. Local, anonymous, professional inspectors use the renowned Michelin food star

rating system to create the restaurant selection, with its famed Michelin stars indicating culinary excellence. Readers will find a wealth of helpful information on their restaurant choices: time-tested Michelin symbols describe such features as cash-only, wheelchair-accessible and valet parking establishments. Newer symbols include restaurants specializing in dim sum and offering notable beer, wine, sake and cocktail lists. The guide's organization makes fast work of deciding where and what to eat: grouping by neighborhood facilitates spur-of-the-moment decision-making while multiple, user-friendly indexes inspire more specific dining choices. Readers can consult an alphabetical list of restaurants, as well as lists of starred, Bib Gourmand and Under \$25 restaurants. Lists also include cuisine by category, cuisine by neighborhood, brunch and late-night dining. As a final step, 24 colorful city and neighborhood maps quickly locate restaurants so diners can find their way. Since only the best make the cut, and all establishments are recommended, readers can feel confident in their choices.

Hi there! It's nice to present you once again with another 'hot' issue of easyuni. On 11 June this year, we launched the unifrens social platform, an extension to easyuni's existing vision of providing comprehensive and accurate information to students about colleges and universities. This is another milestone in the history of easyuni as one of Asia's most popular education portals, committed to helping

students with their higher education plans. unifrens is a social platform which allows students, searching for universities and colleges with similar interests, to connect with each other to help them make unbiased and community-driven decisions about their higher education. It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city, country, university or a course. unifrens is something we had been planning for a while to complement our current family of tools for students. We always knew that our users would love it as they want more community-driven information instead of promotional content from universities and “study abroad” consultants. I believe this feature will democratise the way information about specific courses, countries or institutions is presented and this can only mean good news for students and their parents visitors, as it helps them make more informed decisions about which course, institution or country to pick. Students can also pose questions to their groups, which will be answered by experts and the community. The feature is still in its beta stage but has gained massive traction with over 100,000 users already registered and assigned to groups. Exciting, isn't it? The issue you're holding now has so much to offer as well. So, read every page and fill yourself with all the knowledge needed to make informed decisions about your higher education.
