For more than a half century, the Guide to the Evaluation of Education Experiences in the Armed Services has been the standard reference work for recognizing learning acquired in military life. Since 1942, ACE and has worked cooperatively with the US Department of Defense, the Armed Services, and the US Coast Guard in helping hundreds of thousands of individuals earn academic credit for learning achieved while serving their country.

Resources in Education

This new text from our BASICS series provides a business simulation that can be used with Microsoft Office 2000 or XP. Correlated to Core level Microsoft Office Specialist certification, this text works as a capstone or final project for any Microsoft Office course. An excellent companion to any Microsoft Office tutorial text.

vulnerable regions likely to suffer from the adverse impacts of climate change, especially increased flooding, storms, coastal erosion and drought. Responding to Climate Change: Lessons from an Australian Hotspot brings together the results of cutting-edge research from members of the Griffith Climate Change Response Program, showing how best to respond to anticipated changes and how to overcome barriers to adaptation. The authors treat climate change adaptation as a cross-cutting, multi-level governance policy challenge extending across human settlements, infrastructure, ecosystems, water management, primary industries, emergency management and human health. The research focuses on, but is not limited to, the experience of climate change adaptation in the recognised climate hotspot of South East Queensland. The results of this research will be of interest to planners, policy makers and other practitioners engaged in urban and environmental planning, coastal management, public health, emergency management, and physical infrastructure at the local, regional and metropolitan government scales.

Directory of Published Proceedings

Now in its 19th edition, this comprehensive directory details companies active in multimedia, which continues to evolve alongside the industry that it tracks. The text contains details of approximately 16,000 companies. Entries include company descriptions and classifications by activity, sector, platform, product type, size, turnover and more. The database section is indexed. This year articles from industry leaders and shapers, as well as interviews with heads of trend-setting companies and a round-up of statistics, should make this a useful item for professionals in the industry, and those who purchase multimedia professionally.
