ACCA Essentials P2 Corporate Reporting (International and UK) Study Text 2014

Named one of the best books of 2013 by the 'Financial Times', 'Huffington Post' and 'Forbes', this debate-shifting book debunks the myth of the State as a static bureaucratic organization only needed to 'fix' market failures, leaving dynamic entrepreneurship and innovation to the private sector. Case studies ranging from the innovations that make the iPhone so 'smart' to the current developments in clean technology reveal the reality, whereby the private sector only invests after the entrepreneurial State has made the bold, high-risk investments.

Priorities for Research to Reduce the Threat of Firearm-Related Violence

In 2010, more than 105,000 people were injured or killed in the United States as the result of a firearm-related incident. Recent, highly publicized, tragic mass shootings in Newtown, CT; Aurora, CO; Oak Creek, WI; and Tucson, AZ, have sharpened the American public's interest in protecting our children and communities from the harmful effects of firearm violence. While many Americans legally use firearms for a variety of activities, fatal and nonfatal firearm violence poses a serious threat to public safety and welfare. In January 2013, President

Barack Obama issued 23 executive orders directing federal agencies to improve knowledge of the causes of firearm violence, what might help prevent it, and how to minimize its burden on public health. One of these orders directed the Centers for Disease Control and Prevention (CDC) to, along with other federal agencies, immediately begin identifying the most pressing problems in firearm violence research. The CDC and the CDC Foundation asked the IOM, in collaboration with the National Research Council, to convene a committee tasked with developing a potential research agenda that focuses on the causes of, possible interventions to, and strategies to minimize the burden of firearm-related violence. Priorities for Research to Reduce the Threat of Firearm-Related Violence focuses on the characteristics of firearm violence, risk and protective factors, interventions and strategies, the impact of gun safety technology, and the influence of video games and other media.

This book constitutes the proceedings of the 9th International Workshop on Enterprise and Organizational Modeling and Simulation, EOMAS 2013, held in conjunction with CAiSE 2013 in Valencia, Spain, in June 2013. Tools and methods for modeling and simulation are widely used in enterprise engineering, organizational studies and business process management. In monitoring and evaluating business processes and the interactions of actors in a realistic environment, modeling and simulation have proven to be both powerful, efficient and economic, especially if complemented by animation and gaming elements. The ten contributions in this volume were carefully reviewed and selected from 22 submissions. They explore the above topics, address the underlying challenges find and improve solutions, and show the application of modeling and simulation in the domains of enterprises, their organizations and underlying business processes.

The Routledge Companion to Accounting History shows how the seemingly innocuous practice of accounting has pervaded human existence in fascinating ways at numerous times and places; from ancient civilisations to the modern day, and from the personal to the political. Placing the history of accounting in context with other fields of study, the collection gives invaluable insights to subjects such as the rise of capitalism, the control of labour, gender and family relationships,

racial exploitation, the functioning of the state, and the pursuit of military conflict. An engaging and comprehensive overview also examining geographical differences, this Companion is split into key sections, which explore: changing technologies used to represent financial and other data historical development of accounting theory and practice accounting institutions and those who perform accounting accountancy and the economy accounting, society, and culture the role of accounting in the government, protection and financing of states including chapters on the important role played by accountancy in religious organizations, a review of how the discipline is portrayed in fine art and popular culture, and analysis of sharp practice and corporate scandals. The Routledge Companion to Accounting History has a breadth of coverage that is unmatched in this growing area of study. Bringing together leading writers in the field, this is an essential reference work for any student of accounting, business and management, and history.

World Drug Report 2013

Universal Credit is the DWP's single biggest programme and enjoys cross-party support, yet its implementation has been extraordinarily poor. The failure to develop a comprehensive plan has led to extensive delay and the waste of a yet to be determined amount of public money. £425 million has been spent so far on the programme. It is likely that much of this, including at least £140 million worth of IT assets, will now have to be written off. Lack of day-to-day control meant early warning signs were missed, with senior managers becoming aware of problems only through ad hoc reviews. Pressure to deliver a programme of this magnitude within such an ambitious timescale created a fortress culture where only good news was reported and problems were denied. There has been a shocking absence

of control over suppliers, with the Department failing to implement the most basic procedures for monitoring and authorising expenditure. The pilot programme is not a proper pilot. Its scope is limited and does not deal with the key issues that Universal Credit must address: the volume of claims; their complexity; change in claimants' circumstances; and the need for claimants to meet conditions for continuing entitlement to benefit. The programme will not hit its current target of enrolling 184,000 claimants by April 2014. The Department will have to speed up the later stages of the programme if it is to meet the 2017 completion date but that will pose new risks. Meeting any specific timetable from now on is less important than delivering the programme successfully

This textbook is to help students taking the Caribbean Advance Proficiency Examination (CAPE) in Accounting Unit 2 Cost and Management Accounting. Students can enhance their problem solving, computational and accounting skill by using the model answers to past examination questions. The book presents a preview of the type of response you will have to give to the questions in the actual examinations. The book provides suggested solutions to students for past examination papers. The author has served as a CAPE Examining Assistant for the past 15 years and is very acquainted with the style of questions and the solutions required. My approach to preparing the answers has been both of an examiner and teacher. I am fully aware of the frustrations many candidates face in formatting and presenting their responses of this particular unit and have sought to address this problem. You can use the layouts suggested. The book provides suggested responses to question papers for the years 2012 - 2019. These are the years

covered by the present syllabus. The solutions are clearly laid out according to each year and each module. Students can obtain the relevant examination papers from the Caribbean Examinations Council and work them through by modules and compare their response with the one given here. The book will also be useful to teachers in preparing their students for taking this exam.
