### **BLS for Healthcare Providers Student Manual**

Not your typical study guide, this single resource contains all of the core information an undergraduate nursing student needs to know from the first day of nursing school through the NCLEX-RN. Written in a succinct, well-organized, easy-to-read format, the guide closely follows the standard nursing curriculum and is designed as a reference for every core nursing course. To maximize successful exam preparation, the text highlights in each chapter important material most likely to appear on the NCLEX-RN. Chapters are organized in a clear, consistent format with information presented in friendly conversational style. For every disease presented there is a definition, triggers, symptoms, and nursing care. Nursing students will no longer be burdened with the substantial cost of purchasing individual study guides for each topic, since all of the information needed to master core nursing curriculum is contained in this compact and pithy resource.

**Key Features:** Provides a complete, compact study resource for daily use in clinical and class settings  
Designed to accompany students through all nursing school curricula and NCLEX-RN preparation  
Condenses 15 separate study guides into one succinct volume  
Includes separate chapters for all five core courses (Medical/Surgical, Fundamentals, Maternal/Child, Pediatrics, Psychiatric/Mental)  
Identifies important material likely to appear on course tests and the NCLEX-RN with the "TQ" (test question) designation appearing next to appropriate content.  
Organized logically according to standard nursing curriculum  
Includes a definition,

triggers, symptoms, and nursing care for every disease presented

It will kill about 50-100,000 Americans in the next 12 months and most will never "see" it coming. By the time one Googles "The clot in my lung," 10% will die before the webpage is fully loaded and that is with a speedy WIFI connection. Medusa's Clot discusses from lamb to loom a disease of which 80% of people are unaware. Hard to believe as there are approximately 4.9 million Internet hits on the subject. It is known as PE, short for pulmonary embolism. The book also discusses peripherally the deracinated healthcare system along with the roles of science and faith in disease and in health. The subject which is couched in humor, spirituality, and history brings to life an entity that surreptitiously continues as Mary Shelly had written in Frankenstein, "To glut the maw of death."

### **ACLS Study Guide**

Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.
