For courses in American Government Learn how American politics affects public policy Revel(TM) Government in America: People, Politics, and Policy takes a public-policy approach to show how politics influences the policies that governments produce. Authors George Edwards, Martin Wattenberg, and William Howell provide a framework for students to understand the difficult questions that decision makers of both political parties are facing: how should we govern and what should government do? By emphasizing the scope of government -- the key issue in American politics today -- the authors help students see how politics matters in their own lives. The 2018 Elections and Updates Edition offers new narrative coverage of the major issues from today's headlines including the 2018 midterm elections, recent policy under the Trump administration, and the nomination of Brett Kavanaugh to the Supreme Court. This digital package includes Revel California Government and Politics Today, 15th Edition, allowing instructors to easily integrate coverage of California government and politics into the American Government survey course. Focusing on California's ethnic and cultural diversity as well as the global economy's impact on California (and vice versa), author Mona Field explains California's ever-changing political situation in the context of social and economic trends. Revel is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read, think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience -- for less than the cost of a traditional textbook. NOTE: This Revel Combo Access pack includes a Revel access code plus a loose-leaf print reference (delivered by mail) to complement your Revel experience. In addition to this access code, you will need a course invite link, provided by your

instructor, to register for and use Revel.

Some of the very best writings on issues involving local government can be found in journals published by the American Society for Public Administration or journals with which ASPA is associated. This volume includes thirty of the most outstanding articles that have been published over the past sixty years in these journals. Local Government Management is an ideal supplement for any course in local management and administration, whether the audience is students or practicing professionals.

On the Shoulders of Titans

The staggering toll of gun violence—which claims 31,000 U.S. lives each year—is an urgent public health issue that demands an effective evidence-based policy response. The Johns Hopkins University convened more than 20 of the world's leading experts on gun violence and policy to summarize relevant research and recommend policies that are both

constitutional and have broad public support. Collected for the first time in one volume, this reliable, empirical research and legal analysis will help lawmakers, opinion leaders, and concerned citizens identify policy changes to address mass shootings, along with the less-publicized gun violence that takes an average of 80 lives every day. Selected recommendations include:

- Background checks: Establish a universal background check system for all persons purchasing a firearm from any seller.
- High-risk individuals: Expand the set of conditions that disqualify an individual from legally purchasing a firearm.
- Mental health: Focus federal restrictions on gun purchases by persons with serious mental illness on the dangerousness of the individual.
- Trafficking and dealer licensing: Appoint a permanent director to ATF and provide the agency with the authority to develop a range of sanctions for gun dealers who violate gun sales or other laws.
- Personalized guns: Provide financial incentives to states to mandate childproof or personalized guns.
- Assault weapons and high-capacity magazines: Ban the future sale of assault weapons and the future sale and possession of large-capacity ammunition magazines.
- Research funds: Provide adequate federal funds to the Centers for Disease Control and Prevention, National Institutes of Health, and National Institute of Justice for research into the causes and solutions of gun violence.

The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

Movement Disorder Emergencies: Diagnosis and Treatment provides a fresh and unique approach to what is already a high-profile subspecialty area in clinical neurology. The disorders covered in this volume are standard fare in the field but emphasize the urgencies and emergencies that can occur. One of the very attractive features of the field of movement disorders is that diagnosis is often based on unique visible and sometimes audible phenomenological symptoms and signs. Therefore, in this era of highly sophisticated laboratory and radiological diagnostic tools, the diagnosis of many movement disorders is still largely made in the clinic where pattern recognition is key. Crucial to astute clinical diagnosis is broad clinical experience. In short, you have to have seen one to recognize one! Patients with movement disorders nearly always present as outpatients but, as aptly recognized by Drs. Frucht and Fahn, this may include acute manifestations leading to emergency presentations, often in an emergency room setting, where they are very likely to be unrecognized and therefore poorly managed. The authors define an “emergency” movement disorder as one in which failure to promptly diagnose and treat may result in significant morbidity or mortality. However, they also stress the importance of certain “can’t miss” diagnoses such as Wilson’s disease, dopa-responsive dystonia, and Whipple’s disease in which delayed diagnosis in less emergent situations can lead to slowly evolving and often irreversible neurological damage with tragic consequences.

Daniel Monti, Michael Ian Borer, and Lyn C. Macgregor provide a thorough and comprehensive survey of the contemporary urban world that is accessible to students with *Urban People and Places: The Sociology of Cities, Suburbs, and Towns*. This new title will give balanced treatment to both the process by which cities are built (i.e., urbanization) and the ways of life practiced by people that live and work in more urban places (i.e., urbanism) unlike most core texts in this area. Whereas most texts focus on the socio-economic causes of urbanization, this text analyses the cultural component: how the physical construction of places is, in part, a product of cultural beliefs, ideas, and practices and also how the culture of those who live, work, and play in various places is shaped, structured, and controlled by the built environment. Inasmuch as the primary focus will be on the United States, global discussion is composed with an eye toward showing how U.S. cities, suburbs, and towns are different and alike from their counterparts in Africa, Asia, and Central and South America.

This book focuses on the root causes of the generation gap in voter turnout—changes in media consumption habits over time. It lays out an argument as to why young people have been tuning out politics in recent years, both in the United States and in other established democracies.

The Publishers Weekly

A riveting account of America's second war with England, from the #1 New York Times–bestselling author of The Miracle of

Dunkirk. At the dawn of the nineteenth century, the great powers of Western Europe treated the United States like a disobedient child. Great Britain blocked American trade, seized its vessels, and impressed its sailors to serve in the Royal Navy. America's complaints were ignored, and the humiliation continued until James Madison, the country's fourth president, declared a second war on Great Britain. British forces would descend on the young United States, shattering its armies and burning its capital, but America rallied, and survived the conflict with its sovereignty intact. With stunning detail on land and naval battles, the role Native Americans played in the hostilities, and the larger backdrop of the Napoleonic Wars, this is the story of the turning points of this strange conflict, which inspired Francis Scott Key to write "The Star-Spangled Banner" and led to the Era of Good Feelings that all but erased partisan politics in America for almost a decade. It was in 1812 that America found its identity and first assumed its place on the world stage. By the author of *A Night to Remember*, the classic account of the sinking of the Titanic—which was not only made into a 1958 movie but also led director James Cameron to use Lord as a consultant on his epic 1997 film—as well as acclaimed volumes on Pearl Harbor (*Day of Infamy*) and the Battle of Midway (*Incredible Victory*), this is a fascinating look at an oft-forgotten chapter in American history.

An Introduction to the American Legal System, Government, and Constitutional Law

In a nation built by immigrants and bedeviled by the history and legacy of slavery and discrimination, how do we, as Americans, reconcile a commitment to equality and freedom with persistent inequality and discrimination? And what can we do about it? This widely acclaimed text by Paula D. McClain, with new coauthor Jessica D. Johnson Carew, provides a comprehensive and accessible overview of the historical and contemporary political experience of the major groups—African Americans, Latinos, Asian Americans, and American Indians—in the United States. It explores the similarities and differences in these groups' representation and participation in law, politics, and policymaking, discusses the enduring issues and concerns that they face, and examines intra- and inter-group competition and coalition-building in the face of enduring conflict and inequality. The seventh edition has been thoroughly revised and updated to include coverage of President Barack Obama's second term, the 2016 election, police brutality and Black Lives Matter, and the Dakota Access Pipeline protest movement. With a brand-new chapter on the intersections of race and gender, *Can We All Get Along?* remains unparalleled in its comparative coverage of the current landscape of minority politics in the United States.

"[A] collection of scholars [has] released a monumental study called A Common Destiny: Blacks and American Society. It offers detailed evidence of the progress our nation has made in the past 50 years in living up to American ideals. But the study makes clear that our work is far from over." —President Bush, Remarks by the president to the National Urban League Conference The product of a four-year, intensive study by distinguished experts, A Common Destiny presents a clear, readable "big picture" of blacks' position in America. Drawing on historical perspectives and a vast amount of data, the book examines the past 50 years of change and continuity in the status of black Americans. By studying and comparing black and white age cohorts, this volume charts the status of blacks in areas such as education, housing, employment, political participation and family life.

The compelling untold story of a group of stranded U.S. Army nurses and medics fighting to escape Nazi-occupied Europe. When 26 Army nurses and medics-part of the 807th Medical Air Evacuation Transport Squadron-boarded a cargo plane for transport in November 1943, they never anticipated the crash landing in Nazi-occupied Albania that would lead to their months-long struggle for survival. A drama that captured the attention of the American public, the group and its flight crew dodged bullets and battled blinding winter storms as they climbed mountains and fought to survive, aided by courageous villagers who risked death at Nazi hands to help them. A mesmerizing tale of the courage and heroism of ordinary people, The Secret Rescue tells not only a new story of struggle and endurance, but also one of the daring rescue attempts by clandestine American and British organizations amid the tumultuous landscape of the war.

National Geographic author Michael Farquhar uncovers an instance of bad luck, epic misfortune, and unadulterated mayhem tied to every day of the year. From Caligula's blood-soaked end to hotelier Steve Wynn's unfortunate run-in with a priceless Picasso, these 365 tales of misery include lost fortunes (like the would-be Apple investor who pulled out in 1977 and missed out on a \$30 billion-dollar windfall), romance gone wrong (like the 16th-century Shah who experimented with an early form of Viagra with empire-changing results), and truly bizarre moments (like the Great Molasses Flood of 1919). Think you're having a bad day? Trust us, it gets worse.

Young V. Old

More than four decades have passed since a human first set foot on the Moon. Great strides have been made in our understanding of what is required to support an enduring human presence in space, as evidenced by progressively more advanced orbiting human outposts, culminating in the current International Space Station (ISS). However, of the more than 500 humans who have so far ventured into space, most have gone only as far as near-Earth orbit, and none have traveled beyond the orbit of the Moon. Achieving humans' further progress into the solar system had proved far more difficult than imagined in the heady days of the Apollo missions, but the potential rewards remain substantial. During its more than 50-year history, NASA's success in human space exploration has depended on the agency's ability to effectively address a wide range of biomedical, engineering, physical science, and related obstacles--an achievement made possible by NASA's strong and productive commitments to life and physical sciences research for human space exploration, and by its use of human space exploration infrastructures for scientific discovery. The Committee for the Decadal Survey of Biological and Physical Sciences acknowledges the many achievements of NASA, which are all the more remarkable given budgetary challenges and changing directions within the agency. In the past decade, however, a consequence of those challenges has been a life and physical sciences research program that was dramatically reduced in both scale and scope, with the result that the agency is poorly positioned to take full advantage of the scientific opportunities offered by the now fully equipped and staffed ISS laboratory, or to effectively pursue the scientific research needed to support the development of advanced human exploration capabilities. Although its review has left it deeply concerned about the current state of NASA's life and physical sciences research, the Committee for the Decadal Survey on Biological and Physical Sciences in Space is nevertheless convinced that a focused science and engineering program can achieve successes that will bring the space community, the U.S. public, and policymakers to an understanding that we are ready for the next significant phase of human space exploration. The goal of this report is to lay out steps and develop a forward-looking portfolio of research that will provide the basis for recapturing the excitement and value of human spaceflight--thereby enabling the U.S. space program to deliver on new exploration initiatives that serve the nation, excite the public, and place the United States again at the forefront of space exploration for the global good.

Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics XII describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical

and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. *Advances in Digital Forensics XII* is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoi is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

Bad Days in History

Arguing that an inter-generational war is brewing in the United States, this book paints a picture of the "ageing of America" and what it means for politics and policy questions, including social security, health care, crime, jobs, social welfare, defence and foreign affairs. Differences between older and younger citizens are examined in the light of voting and registration patterns, ideological and party preferences, and varieties of political activism. Contemporary media and new technologies are highlighted as sources of disparities and bridges between the generations - how they "watch politics", how they prefer to solve social problems, and how inter-generational understanding may be improved through communication and education.

Different phases of fruit development and utilization have been treated in many textbooks, reviews, and a host of scientific and professional papers. This seems, however, to be the first attempt to bring together case histories of so many different fruits and to present a balanced account of the whole period from set to harvest. Postharvest physiology, which has been in the centre of the picture in many former books, is at the bored line of the subject matter of this book, and has not been fully

covered, except in a few cases. For this reason, two separate chapters deal with physiological and pathological aspects of fruit life after harvest.
