This book is a compendious collection of papers designed to expose the current trends in mathematical modelling. It details current research on models of in-host dynamics, epidemics, population dynamics and psycho-social dynamics. The chapters are written in a simple and concise way for readers who are familiar with basic mathematical modelling offered in undergraduate courses. The main objective of this book is to detail various applications of mathematics in biomedical sciences, resources management and social settings. Many of the book chapters contain current contentious issues in mathematical modelling and as such, the book can be used to generate projects for bio-mathematic students. Graduate students wishing to acquire and consolidate knowledge in mathematical modelling will find this an excellent text for their research.

Design Criteria for Drill Rigs

Jago doesn't just inherit a title after the death of his parents, he's saddled with the crum-bling money pit of a mansion that's been in his family for centuries. With his medical ca-reer on hold, he struggles to secure the future of Sharwood Hall and he's trudging uphill with no finish line in sight. The sins of a past generation fall on faerie Ellie and her family, and each year they must trek to the exact centre of the UK to recharge their energy. Until they find the Kewen, treasure guarded and lost by their ancestors hundreds of years ago, they're banished from Faerieland. Ellie's father has spent fifty years searching for the missing treasure, now it's his eldest child's burden. When a stunning woman sweeps into Jago's world in a thunderstorm, he can't stop thinking she's too good to be true. For little reason other than her sweet and generous heart, Ellie is helping to put Sharwood to rights and leaving Jago more and more suspi-cious she wants something other than him. When family and duty clash with trust and love, it's debatable whether a perilous leap of faith, directly off a bridge into treacherous waters, will keep the two lovers

from being swept apart. Book One in the Norwood Family series. The other two are Bloodline and The Demon You Know. All the books are stand alone. Bloodline and The Demon You Know are MM stories.

In the Maze

Phase 1

A young man is in his freshman year at college. It's the first month of college, and he hooks up with his old friend from back home to go to a party. His friend Jason is in his final year at the college, and he has been openly gay the past couple of years. Michael knows this, but he himself is battling with his own sexuality. As most of Jason's friends are gay, there are a lot of gay people at the party when they show up. Michael feels a bit uncomfortable and freaks out when a guy comes on to him. He is in utter denial about his sexuality. Jason takes him off to one side to find out what's wrong, and they go up to an empty bedroom to have a heart to heart at which point Jason seduces him, quite roughly. This is an explicit erotic short story of approximately 5,000 words. It contains graphic language and sexual themes. It is meant only for adults who are interested in this type of material for viewing in jurisdictions where its sale and enjoyment does not violate any local laws.

Proposal to establish a Post office library and literary association

Covering core topics from vocabulary and grammar to teaching, writing speaking and listening, this textbook shows you how to link research to practice in TESOL methodology. Guided tasks prepare you to engage critically with research literature and use thi

I'm a Social Worker I was Born with My Heart on My Sleeve A Fire in My Soul and a Mouth I Can't Control

Coupe, Hatchback & Convertible. Also covers Convertible models to August 2003. Does NOT cover new Saab 9-3 range introduced September 2002 (Convertible September 2003) Petrol: 2.0 litre (1985cc) & 2.3 litre (2290cc), inc. turbo. Turbo-Diesel: 2.2 litre (2171cc).

Tapir Is My Spirit Animal

Presents the life of the soldier who committed a massive national security breach by releasing thousands of classified documents to WikiLeaks, exploring the influence of his political views and gender identity issues on his actions.

100 Years and Counting

This masterful social and economic history of rural Zaire examines the complex and lasting effects of forced cotton cultivation in central Africa from 1917 to 1960. Osumaka Likaka recreates daily life inside the colonial cotton regime. He shows that, to ensure widespread cotton production and to overcome continued peasant resistance, the colonial state and the cotton companies found it necessary to augment their use of threats and force with efforts to win the cooperation of the peasant farmers, through structural reforms, economic incentives, and propaganda exploiting African popular culture. As local plots of food crops grown by individual households gave way to commercial fields of cotton, a whole host of social, economic, and environmental changes followed. Likaka reveals how food shortages and competition for labor were endemic, forests were cleared, social stratification increased, married women lost their traditional control of agricultural production, and communities became impoverished while local chiefs enlarged their power and prosperity. Likaka documents how the cotton regime promoted its cause through agricultural exhibits, cotton festivals, films, and plays, as well as by raising producer prices and decreasing tax rates. He also shows how the peasant laborers in turn resisted regimented agricultural production by migrating, fleeing the farms for the bush, or sabotaging plantings by surreptitiously boiling cotton seeds. Small farmers who had received appallingly low prices from the cotton companies resisted by stealing back their cotton by night from the warehouses, to resell it in the morning. Likaka draws on interviews with more than fifty informants in Zaire and Belgium and reviews an impressive array of archival materials, from court records to comic books. In uncovering the tumultuous economic and social consequences of the cotton regime and by emphasizing its effects on social institutions, Likaka enriches historical understanding of African agriculture and development.

Web Reasoning and Rule Systems

Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what can companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.
