Nationality, Immigration and Asylum Act 2002

The true story of a potentially devastating terrorist plot in New York City—and the heroes who risked their lives to prevent it. On the morning of July 31, 1997, two young Palestinian men living in Brooklyn, New York, were prepared to sacrifice themselves as martyrs to their bloody cause. Their plan—to board a subway filled with commuters, wait until the train was traveling through the tunnel under the East River, and then detonate a shrapnel-covered explosive belt they had built in their tenement apartment. The attack would have killed hundreds, possibly even thousands, while sending the city—and the country—into a state of panic. This is the inspiring, startling, and frightening true story of how the NYPD learned of the impending attack and made a daring predawn raid on the terrorist hideout. The gripping series of events began with an Egyptian immigrant who, learning of the plan, alerted the police. Coordinating an assault with limited resources and manpower, seven brave members of the NYPD moved in—reaching the terrorists when they literally had their fingers on the trigger—saving countless lives, preventing a disaster that would have paralyzed New York City, and alerting the nation that, in today's world, violence and terror could begin at home.

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 148, Lone Wolf Terrorists, examines the phenomenon of the solitary domestic terrorist, analyzes the distinction between such terrorists and mass murderers who are not deemed to be terrorists, considers the motivations of violent extremists, and examines the dilemmas faced by law enforcement in preventing solitary political extremists with violent ideologies from translating their beliefs into actions. The volume is divided into three sections, providing an overview of the topic, an examination of strategies for prevention of such attacks, and a consideration of the Internet's role in contributing to radicalization. Documents included in this volume include a CRS report on domestic terrorism, a report examining violent radicalization from a criminal justice perspective, and a CRS report differentiating hate crimes from domestic terrorism, as well as other reports on the lone wolf terrorism phenomenon and strategies to prevent and/or counter it. The last document in the volume is a CRS report relating to the advocacy of terrorism on the Internet, especially including social media, and the ways in which law enforcement might be able to

address the problem of dangerous online speech within the current U.S. legal structure.

Beyond the MBA Hype

This book examines the timely topic of controlling the borders of the European Schengen Area. It considers the state perspective on border regulation, subjecting day-to-day practices of EU visa policy implementation to close analytical scrutiny. The objects of the analysis are three European Member States—France, Belgium, and Italy—that implement EU visa policy in Morocco, a country whose nationals are considered to be a migratory ‘risk’ for the EU. The book focuses on the implementation of EU visa policy in the consulates of Belgium, France and Italy in Casablanca. The empirical research and the comparative perspective make this book distinct. The book uses a ‘comprehensive implementation approach’ by taking account of the local, national and supranational locations of policy-making. It builds on in-depth pioneering fieldwork and a comparative research design that includes those three locations. The research design has determined the evolving of the puzzle and the realizing of the unanticipated: cross-national differences diminish when policy is put into practice. Extensive research into the visa sections of those EU Member States provides highly original material that sheds light on the obscure black box of EU visa policy implementation, therefore contributing to policy studies, migration studies, and studies on the European Union.

A Primer for Investment Trustees

Immigration Enforcement in the United States

The first book to comprehensively describe the history, theory, and application of prosecutorial discretion in immigration law. When Beatles star John Lennon faced deportation from the U.S. in the 1970s, his lawyer Leon Wildes made a groundbreaking argument. He argued that Lennon should be granted "nonpriority" status pursuant to INS's (now DHS's) policy of prosecutorial discretion. In U.S. immigration law, the agency exercises prosecutorial discretion favorably when it refrains from enforcing the full scope of immigration law. A prosecutorial discretion grant is important to an agency seeking to focus its priorities on the "truly dangerous" in order to conserve resources and to bring compassion into immigration enforcement. The Lennon case marked the first moment that the immigration agency's prosecutorial discretion policy became public knowledge. Today, the concept of prosecutorial discretion is more widely known in light of the Obama Administration's Deferred Action for Childhood Arrivals or DACA program, a record number of deportations and a stalemate in Congress to move immigration reform. *Beyond Deportation* is the first book to comprehensively describe the history,

theory, and application of prosecutorial discretion in immigration law. It provides a rich history of the role of prosecutorial discretion in the immigration system and unveils the powerful role it plays in protecting individuals from deportation and saving the government resources. Shoba Sivaprasad Wadhia draws on her years of experience as an immigration attorney, policy leader, and law professor to advocate for a bolder standard on prosecutorial discretion, greater mechanisms for accountability when such standards are ignored, improved transparency about the cases involving prosecutorial discretion, and recognition of “deferred action” in the law as a formal benefit.

How to Get a Green Card

This report describes for the first time the totality and evolution since the mid-1980s of the current-day immigration enforcement machinery. The report's key findings demonstrate that the nation has reached an historical turning point in meeting long-standing immigration enforcement challenges. The question is no longer whether the government is willing and able to enforce the nation's immigration laws, but how enforcement resources and mandates can best be mobilized to control illegal immigration and ensure the integrity of the nation's immigration laws and traditions.

Becoming a U.S. Citizen: A Guide to the Law, Exam & Interview

This book is about 24 developing countries that have embarked on the journey towards universal health coverage (UHC) following a bottom-up approach, with a special focus on the poor and vulnerable, through a systematic data collection that provides practical insights to policymakers and practitioners. Each of the UHC programs analyzed in this book is seeking to overcome the legacy of inequality by tackling both a “financing gap” and a “provision gap”: the financing gap (or lower per capita spending on the poor) by spending additional resources in a pro-poor way; the provision gap (or underperformance of service delivery for the poor) by expanding supply and changing incentives in a variety of ways. The prevailing view seems to indicate that UHC require not just more money, but also a focus on changing the rules of the game for spending health system resources. The book does not attempt to identify best practices, but rather aims to help policy makers understand the options they face, and help develop a new operational research agenda. The main chapters are focused on providing a granular understanding of policy design, while the appendixes offer a systematic review of the literature attempting to evaluate UHC program impact on access to services, on financial protection, and on health outcomes.
