The definitive new edition of the most trusted book on municipal bonds As of the end of 1998, municipal bonds, issued by state or local governments to finance public works programs, such as the building of schools, streets, and electrical grids, totaled almost \$1.5 trillion in outstanding debt, a number that has only increased over time. The market for these bonds is comprised of many types of professionals—investment bankers, underwriters, traders, analysts, attorneys, rating agencies, brokers, and regulators—who are paid interest and principal according to a fixed schedule. Intended for investment professionals interested in how US municipal bonds work, *The Fundamentals of Municipal Bonds, Sixth Edition* explains the bond contract and recent changes in this market, providing investors with the information and tools they need to make bonds reliable parts of their portfolios. The market is very different from when the fifth edition was published more than ten years ago, and this revision reasserts *Fundamentals of Municipal*

Bonds as the preeminent text in the field Explores the basics of municipal securities, including the issuers, the primary market, and the secondary market Key areas, such as investing in bonds, credit analysis, interest rates, and regulatory and disclosure requirements, are covered in detail This revised edition includes appendixes, a glossary, and a list of financial products related to applying the fundamentals of municipal bonds An official book of the Securities Industry and Financial Markets Association (SIFMA) With today's financial market in recovery and still highly volatile, investors are looking for a safe and steady way to grow their money without having to invest in stocks. The bond market has always been a safe haven, although confusing new bonds and bond funds make it increasingly difficult for unfamiliar investors to decide on the most suitable fixed income investments.

A new edition of the #1 text in the human computer Interaction field! This book seeks to chart the technology-fueled changes taking place in the field of corporate governance and describes the impact these changes are having on boards and the enterprises they govern. It also describes what the future could look like once companies truly embrace the power of technology to change governance. Additionally, this book will provide a set of "suggested action steps" for companies and their boards focused on ways they can leverage technology tools to enhance governance immediately. Through a review of the latest governance research, interviews with key thought leaders, and case studies of enterprises that have embraced governance technology, readers will be armed with new insights and approaches they can take to enhance the work of their boards and senior leaders to reach new levels of performance. Explains how to use design and evaluation techniques for developing successful interactive technologies Demonstrates, through many examples, the cognitive, social and affective issues that underpin the design of these technologies Provides thought-provoking design dilemmas and interviews with expert designers and researchers Uses a strong pedagogical format

The most cutting-edge read on CDO and credit market structures Collateralized Debt Obligations and Structured Finance provides a state-of-the-art look at the exploding CDO and structured credit products market. Financial expert Janet Tavakoli examines securitization topics never before seen in print, including the huge increase in the CDO arbitrage created by synthetics; the tranches most at risk from this new technology; dumping securitizations on bank balance sheets; the abuse of offshore vehicles by companies such as Enron; and securitizations made possible by new securitization techniques and the introduction of the Euro. This valuable guide comprehensively covers one of the fastest growing markets on Wall Street, predicting where new bank regulations and other developments may lead to product growth or product extinction. While providing an overview of the market and its dynamic growth, Collateralized Debt Obligations and Structured Finance explores the types of products offered, hedging techniques, and valuation and risk/return issues associated with investment in CDOs and synthetic CDOs. Janet M. Tavakoli, MBA (Chicago, IL), has over eighteen years of experience trading, structuring, and marketing derivatives and structured products with major financial institutions in New York and London. She is also the author of Credit Derivatives and Synthetic Structures, now in its Second Edition (0-471-41266-X).
