Down in Atlanta, tempers - and temperatures - are about to flare . . . As a mercenary who cleans up after magic gone wrong, Kate Daniels has seen her share of occupational hazards. Normally, waves of paranormal energy ebb and flow across Atlanta like a tide. But once every seven years, a flare comes, a time when

magic runs rampant. Now Kate's going to have to deal with problems on a much bigger scale: a divine one. When Kate sets out to retrieve a set of stolen maps for the Pack, Atlanta's paramilitary clan of shapeshifters, she quickly realises much more is at stake. During a flare, gods and goddesses can manifest - and battle for power. The stolen maps are only the opening gambit in an epic tug-of-war between two gods hoping for rebirth. And if Kate can't stop the cataclysmic showdown, the city may not survive . . .

Sound Reproduction: The Acoustics and Psychoacoustics of Loudspeakers and Rooms, Third Edition explains the physical and perceptual processes that are involved in sound reproduction and demonstrates how to use the processes to create high-quality listening experiences in stereo and multichannel formats. Understanding the principles of sound production is necessary to achieve the goals of sound reproduction in spaces ranging from recording control rooms and home listening rooms to large cinemas. This revision brings new science-based perspectives on the performance of loudspeakers, room acoustics, measurements and equalization, all of which need to be appropriately used to ensure the accurate delivery of music and movie sound tracks from creators to listeners. The robust website (www.routledge.com/cw/toole) is the perfect companion to this necessary resource.

Interventional Ultrasound, An Issue of Ultrasound Clinics,

Apple Confidential 2.0

This book takes a pragmatic approach to deploying state-of-the-art optical networking equipment in metro-core and backbone networks. The book is oriented towards practical implementation of optical network design. Algorithms and methodologies related to routing, regeneration, wavelength assignment, sub rate-

traffic grooming and protection are presented, with an emphasis on optical-bypass-enabled (or all-optical) networks. The author has emphasized the economics of optical networking, with a full chapter of economic studies that offer guidelines as to when and how optical-bypass technology should be deployed. This new edition contains: new chapter on dynamic optical networking and a new chapter on flexible/elastic optical networks. Expanded coverage of new physical-layer technology (e.g., coherent detection) and its impact on network design and enhanced coverage of ROADM architectures and properties, including colorless, directionless, contentionless and gridless. Covers 'hot' topics, such as Software Defined Networking and energy efficiency, algorithmic advancements and techniques, especially in the area of impairment-aware routing and wavelength assignment. Provides more illustrative examples of concepts are provided, using three reference networks (the topology files for the networks are provided on a web site, for further studies by the reader). Also exercises have been added at the end of the chapters to enhance the book's utility as a course textbook.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

Grandad's Story

Despite the loss of the French Empire, France and its former colonies are still bound by a common historical past. With the new global promotion of la Francophonie, the relation between the various constituencies of the French-speaking regions of the world is reexamined and debated in this book, through the conversation between scholars dealing with diverse texts and contexts that present the colonial contact and its imprint. The book illustrates how, in France and in its other worlds, that contact, its repercussions, and its memory are lived and expressed today in a variety of textual representations. The historical contact between France and its other worlds has given birth to new kinds of cross-cultural expressions in the arts, in literature, and in aesthetics, establishing interrelations and generating appropriations from both sides of the Hexagon frontier, highlighting the fluidity and the permeability of its cultural borders. The book subtext tells that the frontier between France and its other worlds is no more an unshakable geographical, political, and cultural limit, but rather a line that has become mobile, fluctuating, and permeable, and across which currents, ideas, sensitivities, and creativity are expressed, bearing testimony to vitality and diversity but also to a cross-fertilization of cultures and societies (re) crossing or meeting at that line. Seen from this latter perspective, the book comes also as an interrogation of the inclusiveness or exclusiveness of the words francophone and Francophonie, and, at an academic level, a mutual exclusion of French and Francophone Studies.

Feminism and the Politics of Travel After the Enlightenment

This volume presents the basic issues and up-to-date research findings in the area of genius, giftedness and creative behaviour. It gives an appreciation of the potential that exists among talented children and adults and how this can be transformed into highly significant and personally satisfying achievements. It also shows that such achievement involves great personal effort but can be facilitated by human relationships, institutional interventions, and historical conditions which present parents, educators and society with opportunities for maximizing the development of genius, giftedness, and creativity.
