This model teaches students ethical skills, vocabulary, and tools to apply in everyday business decisions and throughout their business courses. Writing Feature Articles

Public administration and policy analysis education have long emphasized tidiness, stages, and rationality, but practitioners frequently must deal with a world where objectivity is buffeted by, repressed by, and sometimes defeated by value conflict. Politics and policy are "messy" and power explains much more about the policy process than does rationality. *Public Policy Praxis*, now in a thoroughly revised fourth

edition, uniquely equips students to better grapple with ambiguity and complexity. By emphasizing mixed methodologies, the reader is encouraged, through the use of a wide variety of policy cases, to develop a workable and practical model of applied policy analysis. Students are given the opportunity to try out these globally applicable analytical models and tools in varied case settings (e.g., county, city, federal, international, plus urban and rural) while facing wide-ranging topics (starving farmers and the red panda in Nepal, e-cigarettes, GMOs, the gig economy, and opioid abuse) that capture the diversity and reality of public policy analysis and the intergovernmental and complex nature of politics. The fourth edition expands upon its thorough exploration of specific tools of policy analysis, such as stakeholder mapping, content analysis, group facilitation, narrative analysis, cost-benefit analysis, futuring, and survey analysis. Along with teaching "how to," the authors discuss the limitations, the practical political problems, and the ethical problems associated with different techniques and methodologies. Many new cases have been added, along with clear instructions on how to do congressional research and a Google Trends analysis. An expanded online Teaching Appendix is included for adopters, offering original cases, answers to problems, alternative approaches to case use, teaching exercises, student assignments, pedagogical ideas, and supplemental material directly tied to concepts covered in the text. With an easily accessible and conversational writing style, Public Policy Praxis is an ideal textbook for undergraduate and graduate courses in public policy analysis, community planning, leadership, social welfare policy,

educational policy, family policy, and special seminars.

Business Ethics

Since its inception, *An Introduction to Business Ethics*, by Joseph DesJardins, has been a cutting-edge resource for the business ethics course. DesJardins's unique approach encompasses all that an introductory business ethics course is, from a multidisciplinary perspective. It offers critical analysis and integrates the perspective of philosophy with management, law, economics, and public policy, providing a clear, concise, yet reasonably comprehensive introductory survey of the ethical choices available to us in business.

An Introduction to Business Ethics

Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged

down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

also addressed. Real-world case studies demonstrate the types of dilemmas that sport managers face every day. In addition, professional administrators from a wide variety of sport organizations contribute their perspectives, giving readers a glimpse into the real concerns of sport professionals and the impact of governance and policy on their jobs.
