### **Multivariable Calculus**

This program contains a wide range of tools for solving problems and exploring mathematical ideas symbolically, numerically, and graphically. The Calculus T/L II environment allows students and teachers to create mathematical objects (functions, equations, tables, graphs, etc.) then, at the touch of a button, call for and use on object-related commands to solve problems and explore mathematical problems and explore mathematical ideas. T.L.II is based on and includes approximately 50% of the Maple 4.2 symbolic/numeric computation system. With Calculus T/L II students can let the computer handle the drudgery of low-level computations while they work on T/L II's electronic blackboard. With Calculus T/L II, students can: Explore mathematical ideas, do exciting 2 and 3-D graphing, power

through complicated calculations, do or check their homework with a step-by-step electronic problem-solving assistant, not only create solutions to problems, but develop and save editable scripts they can use to attack other problems of the same type. SYSTEM REQUIREMENTS: MacintoshR Plus or later model with two or more megabytes of memory and a hard disk.

Written by a current PhD student in mathematics, this calculus study guide contains detailed step-by-step solutions to problems from past tests and exams at the University of Toronto. Based on the MAT 135/136 course, this handbook was written with the student in mind. While the problems originate from U of T, the material is easily comparable to any introductory university calculus course that doesn't focus on proofs. For a more rigorous approach, see the MAT 137 guide. After being a teaching assistant for the course for several years, Sergio found students constantly asking about solutions from other help manuals. The solutions were either wrong or poorly explained. He saw the need for a more comprehensive solution manual that explained every step in detail. Before beginning his PhD at Cornell University, he wrote this study guide to better help students having difficulty with mathematics.

understand the key concepts of calculus (and ace those exams). Our story begins as Noriko, a recent liberal arts grad, arrives at a branch office of the Asagake Newspaper to start her career as a journalist. With the help of her overbearing and math-minded boss Kakeru, she's finally able to do some real reporting. But Noriko soon discovers the mathematical functions behind all the stories she struggles to cover. Using real-world examples like probability, supply and demand, polluting companies, and shochu density, Kakeru explains to Noriko: Techniques of differentiation and integration How to integrate and differentiate trigonometric and other complicated functions Multivariate calculus and partial differentiation Taylor expansions Reluctant calculus students of all abilities will enjoy following along with Noriko as she learns calculus from Kakeru's quirky stories and examples. This charming and easy-to-read guide also includes an appendix with answers to the book's many useful exercises. that year, by the way. ) Because of his background, Fred has taken, in the Guide, the point of view of an experienced student tutor helping you to learn calculus. While we do not always think Fred's jokes are as funny as he does, we appreciate his enthusiasm and his desire to enter into communication with his readers; since we nearly always agree with the mathematical judgements he has made in explaining the material, we believe that this Guide can serve you as a valuable supplement to our text. To get maximum benefit from this Guide, you should begin by spending a few moments to acquaint yourself with its structure. Once you get started in the course, take advantage of the many opportunities which the text and Student Guide together provide for learning calculus in the only way that any mathematical subject can truly be mastered - through attempting to solve problems on your own. As you read the text, try doing each example and exercise yourself before reading the solution; do the same with the quiz problems provided by Fred.
