After John Hunt's successful 1953 expedition he wrote in his diary that at least the Everest story was finished. In fact, it had scarcely begun. The first ascent was the

end of a chapter but far from the end of the story. Since those days, well over 300 men and women have stood on the summit of the world's highest mountain, some of them several times, seeking new routes, faster times, or simply to be numbered among the elite who have stood on the roof of the world. Everest: The Mountaineering History tells the truth about many of the world's mountaineering heroes, about the incompetence, the pettiness, and rages, as well as the courage and skill.

In one reckless night, Camille Jameson's life was changed forever: a tall, handsome stranger, an evening of romance -- and enough regrets to last a lifetime. Two years later, Camille is a successful interior decorator with the opportunity to restore one of Mississippi's proudest plantations. She arrives excited and eager to face her greatest professional challenge to date -- until Zack Prescott saunters through the mansion's front door and back into her life. He is exactly as she remembers, except for the knowing look in his eyes that reminds her of what they once shared. Now, forced to live in unbearably close quarters, Camille and Zack will discover if they have the courage to face the past -- and, perhaps, build a future together . . .

Insights on Romans

The emphasis of Hebrews was born out of the concern of the writer for those who had been true to Christ in the past but who were now wavering. Signs of defection from the faith brought both a warning against apostasy and a fervent exhortation to press onward to spiritual maturity. The epistle argues that the death of Christ renders obsolete the Old Testament sacrificial system and presupposes thorough familiarity with that system by those to whom the epistle is addressed. This strong appeal to the Old Testament Scriptures opens up new avenues of thought for appreciation for the unity of the two Testaments. Dr. Pfeiffer's helpful commentary on this profound New Testament book systematically covers each passage while singling out difficult phrases and verses for special attention. This Everyman's Bible Commentary is based upon the scriptural text as found in the King James Version.

Throughout our life, we have to struggle with questions that cannot be answered on the basis of our experience or with our ordinary thinking. Spiritual science can help us penetrate a realm where new possibilities open up to address these questions. These lectures offer fascinating insights into the spiritual nature of everyday matters such as forgetting, laughing and weeping, different types of illnesses, and rhythms in the bodies of the human being. Steiner shows how we can become, through our own efforts, "co-creators" in evolution.

Solving Problems with TRIZ

For James D. Watson, the year 2003 was momentous: The 50th anniversary of the discovery, with Francis Crick, of the DNA double helix; the 35th anniversary of the publication of his best-selling memoir of the discovery, *The Double Helix*; the 35th anniversary of his appointment as Director of Cold Spring Harbor Laboratory, an institution he molded into a research and education center of international renown and prestige; and the year in which the sequencing of the human genome was completed, a project of unprecedented international effort and coordination that Watson got off the ground and sustained during its first, critical years. In the course of his 75 years, Watson has achieved a reputation as outspoken, capricious, abrasive, and ruthless in pursuing his visionary goals. Few other scientists have achieved his celebrity status, or enjoyed it so much, without losing professional credibility. Yet behind the public notoriety there is a complexity apparent only to those who know Watson as a colleague, mentor, inspiration, and friend. This book gives voice to 43 of these individuals—people of distinction who have worked with Watson as a scientist, educator, author, administrator, and government official. Their essays cover much of his scientific life and, taken together, create a portrait of a complex man whose originality and force of will have produced extraordinary achievements.

Highlighting the importance to ecological studies of incorporating humans and their effects on ecosystems, leading experts from a variety of disciplines address a number of important issues, including: * the prominent role of humans in the function of ecosystems on Earth * why humans have been ignored in ecological studies * approaches taken by social scientists, historians, geographers, economists, and anthropologists in the study of human activities * the emergence of a new ecological paradigm accommodating human activities * methods for studying subtle human effects, and human- populated ecosystems * future research and training required to include humans effectively as components of ecological systems. Of interest to students and researchers in ecology, and to policy-makers and environmental managers. In addition, it makes social scientists aware of new opportunities for integrating their ideas with those of ecologists.

Improve Your Thinking

This is a concise presentation of the concepts underlying the design of digital communication systems, without the detail that can overwhelm students. Many examples, from the basic to the cutting-edge, show how the theory is used in the design of modern systems and the relevance of this theory will motivate students. The theory is supported by practical algorithms so that the student can perform computations and simulations. Leading edge topics in coding and wireless communication make this an ideal text for students taking just one course on the subject. Fundamentals of Digital Communications has coverage of turbo and LDPC codes in sufficient detail and clarity to enable hands-on implementation and performance evaluation, as well as 'just enough' information theory to enable computation of performance benchmarks to compare them against. Other unique features include space-time communication and geometric insights into noncoherent communication and equalization.

Over 2,000 manuscripts accessioned between 1991 and 1995 are described and indexed in this latest volume of the Catalogue of Additions. They range from a 9th-century fragment of St Aldhelm's work to papers of the contemporary author Edward Upward and the economist Sir Roy Harrod. The Trumbull family papers in 380 volumes are the largest of the historical collections catalogued here, whilst modern composers are especially well represented by the comprehensive archives of Cornelius Cardew, Humphrey Searle, Andrzej Panufnik and Sir Peter Maxwell Davies. Notable single volumes include two Books of Hours of the 14th and 15th centuries and Sir William Dugdale's "Book of Monuments" (1640-1641).
