The beloved creator of Blues Clues and Daniel Tiger's Neighborhood and protégé of Fred Rogers explores the importance of kindness and how it can change your life in this essential guide and tie-in to the PBS special, "The Power of Radical Kindness." Angela C. Santomero, the creator, executive producer, and head writer of many of today's most popular educational children's shows believes in the radical power of kindness, on her shows, and in her life. Inspired by her mentor Fred Rogers, beloved host of the classic, award-winning PBS show Mister Rogers' Neighborhood, Angela has dedicated her life to teaching others that when you treat yourself and others with warmth, empathy, and respect, life changing benefits follows. From the true meaning of self-care and the gift of vulnerability, to the importance of active listening or the magic of asking for help, Radical Kindness goes beyond The Golden Rule and entreaties to "be nice," contending that kindness is the key to recognizing others, and ourselves, as worthy of love and understanding. Much like

gratitude, Angela contends we need a kindness practice. A practice in which we learn to see with our hearts and act from a place of compassion. As the Dalai Lama says, "Be kind whenever possible. It is always possible." Through practicing radical kindness—toward ourselves, with loved ones, and to the world at large—we can transform ourselves, our neighborhood, and our world for the better.

This authoritative handbook, part of the Helm Identification Guides series, looks in

detail at the world's 170 species of robins and chats. This large family of small passerines was formerly considered to be part of the thrush family (Turdidae), but is now usually treated as a separate family, Muscicapidae, together with the Old World flycatchers. The vast majority of species are Eurasian or African, with only a handful of species straying into the New World or Australasia. The Australian Robins, although superficially similar, have long been regarded as a separate family. Robins and chats are a diverse family comprising both highly colourful and visible species, such as the robin-chats of Africa, as well as some of the most skulking and elusive birds, such as the shortwings of Asia. Many chats, such as the well-known Nightingale, are renowned songsters, and a good number are highly sought-after by world listers for their extreme rarity or simply because they are hard to see. This book discusses the identification and habits of these birds on a species-by-species basis, bringing together the very latest research with accurate range maps, more than 600 stunning colour photographs that illustrate age and racial plumage differences, and 64 superb colour plates by the internationally renowned artist, Chris Rose. This authoritative and sumptuous book will be an essential purchase for all chat enthusiasts, and will become the standard reference on the subject for many years to come.
