Cultures of War: Pearl Harbor / Hiroshima / 9-11 / Iraq

Finalist for the 2010 National Book Award in Nonfiction: The Pulitzer Prize-winning historian returns with a groundbreaking comparative study of the dynamics and pathologies of war in modern times. Over recent decades, John W. Dower, one of America's preeminent historians, has addressed the roots and consequences of war from multiple perspectives. In *War Without Mercy* (1986), winner of the National Book Critics Circle Award, he described and analyzed the brutality that attended World War II in the Pacific, as seen from both the Japanese and the American sides. *Embracing Defeat* (1999), winner of

numerous honors including the Pulitzer Prize and the National Book Award, dealt with Japan's struggle to start over in a shattered land in the immediate aftermath of the Pacific War, when the defeated country was occupied by the U.S.-led Allied powers. Turning to an even larger canvas, Dower now examines the cultures of war revealed by four powerful events—Pearl Harbor, Hiroshima, 9-11, and the invasion of Iraq in the name of a war on terror. The list of issues examined and themes explored is wide-ranging: failures of intelligence and imagination, wars of choice and “strategic imbecilities,” faith-based secular thinking as well as more overtly holy wars, the targeting of noncombatants, and the almost irresistible logic—and allure—of mass destruction. Dower's new work also sets the U.S. occupations of Japan and Iraq side by side in strikingly original ways. One of the most important books of this decade, *Cultures of War* offers comparative insights into individual and institutional behavior and pathologies that transcend “cultures” in the more traditional sense, and that ultimately go beyond war-making alone.

scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Nostradamus made simple-a surefire prophecy of success! Michel Notredame, or Nostradamus (1503-1566), was a French physician, astrologer, and prophet whose books of visionary four-line verses have intrigued and beguiled readers for hundreds of years. Now, with this fun and easy guide, everyone can finally get a handle on Nostradamus and his "Centuries" of prophecies, which many people believe to have predicted the French Revolution, the rise of Hitler, the Kennedy assassination, and 9/11, among other events. The book covers Nostradamus's life and beliefs, his use of cryptic language and anagrams, interpretations of his work that link it to specific historical incidents, and critics who are skeptical of his prophecies. It also explores the implications of his work on the past, present, and future, and much more!

David Stevenson's widely acclaimed history of World War I changes forever our understanding of that pivotal conflict. Countering the commonplace assumption that politicians lost control of events, and that the war, once it began, quickly became an unstoppable machine, Stevenson contends that politicians deliberately took risks that led to war in July 1914. Far from being overwhelmed by the unprecedented scale and brutality of the bloodshed,

political leaders on both sides remained very much in control of events throughout. According to Stevenson, the disturbing reality is that the course of the war was the result of conscious choices -- including the continued acceptance of astronomical casualties. In fluid prose, Stevenson has written a definitive history of the man-made catastrophe that left lasting scars on the twentieth century. Cataclysm is a truly international history, incorporating new research on previously undisclosed records from governments in Europe and across the world. From the complex network of secret treaties and alliances that eventually drew all of Europe into the war, through the bloodbaths of Gallipoli and the Somme, to the arrival of American forces, and the massive political, economic, and cultural shifts the conflict left in its wake, Cataclysm is a major revision of World War I history.

Arnold Schoenberg - composer, theorist, teacher, painter, and one of the most important and controversial figures in twentieth-century music. This Companion presents engaging essays by leading scholars on Schoenberg's central works, writings, and ideas over his long life in Vienna, Berlin, and Los Angeles. Challenging monolithic views of the composer as an isolated elitist, the volume demonstrates that what has kept Schoenberg and his music interesting and provocative was his profound

engagement with the musical traditions he inherited and transformed, with the broad range of musical and artistic developments during his lifetime he critiqued and incorporated, and with the fundamental cultural, social, and political disruptions through which he lived. The book provides introductions to Schoenberg's most important works, and to his groundbreaking innovations including his twelve-tone compositions. Chapters also examine Schoenberg's lasting influence on other composers and writers over the last century.

World History: Connections to Today

The 82nd Airborne Division - known as the "All-Americans" - parachuted into history as America's first airborne division to see combat. Always at the forefront of some of the heaviest fighting in WWII, the 82nd helped spearhead the Allied drive to victory. night drop into Sicily to their acclaimed victory parade up New York's 5th Avenue in 1946. Currently, the 82nd remains the only active American parachute division. The 82nd Airborne Division — dubbed the All-Americans during WWI, when Sgt. Alvin York was among its soldiers — parachuted into history on July, 9, 1943, as the opening salvo in Operation Husky, the invasion of Sicily. This book, the first to tell the full story of the 82nd — America's first airborne division to see combat, and the only American parachute division still active today — follows these all-Americans from their first perilous drop to their victory parade up 5th Avenue in January 1946. From the shore of Sicily to the beaches of Normandy, from the Rhine to the Elbe to the German surrender and the U.S. occupation of Berlin, this is military history at its best, often told in the words of the soldiers themselves. It is a fitting — and long overdue — tribute to the valorous service of one of America's most celebrated fighting divisions.

Blossoming Silk Against the Rising Sun

At the beginning of World War II ,the British Government decided to evacuate the children from the cities to safer places in the countryside, and also overseas to other countries. Really where could be safer in the country? The logic behind the plan was that IF, Hitler succeeded in occupying Great Britain, the children could return someday and take their country back. This is the story of my brother, age 4, and myself age 9, who were evacuated September 9th. 1939, to America. My brother's mother, who was my step-mother, accompanied us to elderly relatives that lived in New York State. Then for reasons known only to herself, at that time, she decided to travel back across the U-boat infested waters of the Atlantic to England. Different homes were found eventually for us which was a miracle, as there were at least 2,664, Children's Overseas Reception Board (CORB) children to find homes for. The Kodak Company's families in New York opened their homes to these British evacuees, primarily for the children of the Kodak Company in Great Britain, however they ended up taking a lot of the other children. As we had been sent privately on the S.S. Scythia, we were not included in that number. We also were returned May 8th 1944, one month before D-Day, on a Neutral Portuguese ship to Lisbon. The war did not end until May 8th 1945 so we were back in England in time for the newest

Smokejumpers of the Civilian Public Service in World War II

A “beautiful story of a brotherhood between enemies”* emerges from the horrors of World War II in this New York Times and international bestseller. December, 1943: A badly damaged American bomber struggles to fly over wartime Germany. At the controls is twenty-one-year-old Second Lieutenant Charlie Brown. Half his crew lay wounded or dead on this, their first mission. Suddenly, a Messerschmitt fighter pulls up on the bomber’s tail. The pilot is German ace Franz Stigler—and he can destroy the young American crew with the squeeze of a trigger. What happened next would defy imagination and later be called “the most incredible encounter between enemies in World War II.” The U.S. 8th Air Force would later classify what happened between them as “top secret.” It was an act that Franz could never mention for fear of facing a firing squad. It was the encounter that would haunt both Charlie and Franz for forty years until, as old men, they would search the world for each other, a last mission that could change their lives forever. Confinement and Ethnicity documents in unprecedented detail the various facilities in which persons of Japanese descent living in the western United States were confined during World War II: the fifteen assembly centers run by the U.S. Army's Wartime Civil Control Administration, the ten relocation centers created by the War Relocation Authority, and the internment camps, penitentiaries, and other sites under the jurisdiction of the Justice and War Departments. Originally published as a report of the Western Archeological and Conservation Center of the National Park Service, it is now reissued in a corrected edition, with a new Foreword by Tetsuden Kashima, associate professor of American ethnic studies at the University of Washington. Based on archival research, field visits, and interviews with former residents, Confinement and Ethnicity provides an overview of the architectural remnants, archeological features, and artifacts remaining at the various sites. Included are numerous maps, diagrams, charts, and photographs. Historic images of the sites and their inhabitants -- including several by Dorothea

Many major world events have occurred since the last key anniversary of the beginning of the Second World War, and these events have had a dramatic impact on the international stage: 9/11, the Iraq War, climate change and the world economic crisis. This is an opportune moment to bring together a group of major international experts who will offer a series of new interpretations of the key aspects of the origins of the Second World War. Each chapter is based on original archival research and written by scholars who are all leading experts in their fields. This is a truly international collection of articles, with wide breadth and scope, which includes contributions from historians, and also political scientists, gender theorists, and international relations experts. This is an important contribution to scholarly debate on one of the most important events of the 20th century and a subject of major interest to the general reader, historians, students and researchers, policy makers and conflict prevention experts.

smokejumpers, who battled against dangerous winds, searing heat, and devastating fires from 1943 until 1945. Fewer than 300 World War II conscientious objectors served their country in this fashion, operating out of CPS bases in Montana, Idaho, and Oregon. But that small band of men helped to keep alive Forest Service operations in the Pacific Northwest and thus sustained a program to fight potentially crippling fires. When the war ended, CPS smokejumpers, like millions of World War II combat soldiers, were “ushered out” of wartime service. Some, like many returning GIs, encountered difficulties in adjusting to civilian life. Nevertheless, the one-time smokejumpers often went on to make other remarkable contributions to their communities, their nation, and the world.

Beginning with an analysis of cultural themes and ending with a discussion of evolving and expanding political and corporate institutions, *The Columbia History of Post-World War II America* addresses changes in America's response to the outside world; the merging of psychological states and social patterns in memorial culture, scandal culture, and consumer culture; the intersection of social practices and governmental policies; the effect of technological change on society and politics; and the intersection of changing belief systems and technological development, among other issues. Many had feared that Orwellian institutions would crush the individual

in the postwar era, but a major theme of this book is the persistence of individuality and diversity. Trends toward institutional bigness and standardization have coexisted with and sometimes have given rise to a countervailing pattern of individualized expression and consumption. Today Americans are exposed to more kinds of images and music, choose from an infinite variety of products, and have a wide range of options in terms of social and sexual arrangements. In short, they enjoy more ways to express their individuality despite the ascendancy of immense global corporations, and this volume imaginatively explores every facet of this unique American experience.

Hitler's path to war consisted of two different stages that paralleled the internal development of Germany. From 1933 to the end of 1936, he created a diplomatic revolution in Europe. From a barely accepted equal, Germany became the dominant power on the continent. With the remilitarization of the Rhineland, the stalemate in the Spanish Civil War, the forming of the Axis, and the signing of the Anti-Comintern Pact, the first phase was completed. In the second phase, the diplomatic initiative in the world belonged to Germany and its partners. Germany's march toward war therefore became the central issue in world diplomacy.

Imagine a love so powerful that it refuses to die - Anna travels between later years in search of her cherished book and the former years of youth, where her world as a baby drastically changes after the shock of her mothers early death. Anna suffers from abuse, which adds to the effects of an erratic heart, and lives with a rare genetic oral disease. Her mother leaves her in prayer with a request that Anna will have a life of love. In 1938, Dan, an accomplished woodworker, sees Anna on a street corner in Greenwich, Connecticut, and he is powerfully drawn to her, despite the fact that she is many years his junior. He sees past Annas shy exterior and dirty face and tattered clothes and is captivated by her beauty, despite the discoloration of her teeth. Their bond grows in secret while Dan loves her unconditionally, protecting her with his patience, kindness, and gentle nature until she is old enough for him to be introduced to her father. Their unique connection and faith deepen as they are separated during World War II, when Dan writes Anna the story of his love for her and the journey of their relationship. The mere eighteen-page story referred to as The Cherished Book, which the author, Nancy A. Prieston, presents in its original format, is included within the novel. Faith, hope, and endurance encompass them as they journey through all the seasons of life. But will Anna find the book in time, before her final destiny?

World War II, to the Greatest Generation/A Poetic History of the War's Duration

The processes of the Americanisation of Europe and the moves of American firms abroad have been already well studied. But the very expansion of American firms in Europe still lacked a comprehensive survey. This book gathered two dozens of academics on an actual European level, which paves the way to comparisons, synthesised by leading business historian M. Wilkins. The breakthroughs achieved here concern the topics of timetable and rhythms of American FDIs in Europe, the patterns followed in each country, along with the specificities of each industry or service sector, and the strategy adopted by big firms. Beyond the facts, the immaterial aspects of this business history are scrutinised, especially about the perception of American firms by Europeans: firms' corporate image and identity were at stake. The Europeanisation of American firms is a key issue, about industrial relations, management. commercial policies. brand image, connections and embeddedness. The positions of public authorities and of (industrialists and trade unions') lobbies in front of such an American offensive are also gauged. Graphs and tables of figures provide numerous data. And a few chapters are accompanied by an overview of ads published by American affiliates in newsmagazines. to fuel analysis of their perception by consumers.

All American, All the Way

Ocean engineering is generally considered to be concerned with studies on the effects of the ocean on the land and with the design, construction and operation of vehicles, structures and systems for use in the ocean or marine environment. The practice of engineering differs from that of science in both motivations and objectives. Science seeks understanding of the principles of nature in terms of generalizations expressed as laws and classifications. Engineering seeks the application of knowledge of the physical and natural world to produce a benefit expressed as a device, system, material, and/or process. From the standpoint of the financial sponsors of an engineering project, the ideal approach is one of minimal risk in which only proven knowledge, materials and procedures are employed. There is frequent departure from this ideal in anticipation of the increased benefit expected from a large increase in performance of a structure or device. The process of acquiring this new capability is engineering research. Historically, ocean engineering developed with the application of engineering principles and processes to the design of ships and, later, to the

machinery that propels them. In most societies, naval architecture and marine engineering are recognised as the origin of ocean engineering. In fact, the design of a ship constitutes the original systems engineering programme involving hydrodynamics/fluid flow, structural design, machinery design, electrical engineering and so on as well as requiring knowledge of the ocean environment (waves, corrosion, etc.).
