This collection of exercises has over 320 images designed to walk you step-by-step towards the modeling of water distribution systems which are commonly found in development work. You will learn how to load cartography and background images; to determine water demand and spatial allocation; to simulate the evolution of water quality in networks and to make economic comparisons, while avoiding the most common costly mistakes. This manual will help you make informed decisions for achieving clear and measurable results in development projects interventions. Epanet is a free and widely used software from the U.S Environmental Protection Agency that models the hydraulic and water quality behavior of water distribution piping systems.

"Examining the Zionist colonization of Palestine, Maxime Rodinson explains that Israel's formation was part of the pattern of 19th and 20th century colonial conquest. The Zionist movement received active support from the major imperialist powers and -like other colonialist movements- employed a nationally exclusive, racist ideology to justify the subjugation of native farmers and workers."--P. [4] of cover.

Guinness World Records: Science & Stuff is a whirlwind tour through the astounding, record-breaking world (and universe) around us, with an intro from TV science educator and author Science Bob. Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, Science & Stuff celebrates the simple joy in finding things out. It tackles the big questions that keep people up at night, such as:

- Can you belch in space?
- What does woolly mammoth taste like?
- How much would the Death Star cost?
- Is the answer to this question no?

Join us as we rise from the depths of the ocean, home to vampire squids from hell, to the dizzy heights of the International Space Station, where scientists unravel the secrets of (pooping in) zero-g. On the way we stop to talk with some of the men and women who are out in the world finding answers and making stuff. Ever wanted to know what it's like to ride a motorized toilet at highway speeds, command a swarm of tiny robots or spend a year in space? Well, you'll find your answers in here. And that's not all – have a go at ten record-breaking science experiments in the special Make & Break section. Our very own mad professor, Burnaby Q Orbax, and his trusty lab assistant Sweet Pepper Klopek, guide you through at-home challenges, from the greatest height to drop an egg without it breaking to the farthest distance by a Mentos and soda car. It's gonna get messy!

Guinness World Records: Science & Stuff – the grossest, smelliest, weirdest and noisiest guide to, well, science and stuff.

The third edition of *Chemical Fate and Transport in the Environment*—winner of a 2015 Textbook Excellence Award (Texty) from The Text and Academic Authors Association—explains the fundamental principles of mass transport, chemical partitioning, and chemical/biological transformations in surface waters, in soil and groundwater, and in air. Each of these three major environmental media is introduced by descriptive overviews, followed by a presentation of the controlling physical, chemical, and biological processes. The text emphasizes intuitively based mathematical models for chemical transport and transformations in the environment, and serves both as a textbook for senior undergraduate and graduate courses in environmental science and engineering, and as a standard reference for environmental practitioners. Winner of a 2015 Texty Award from the Text and Academic Authors Association Includes many worked examples as well as

Test-based psychological assessment has been significantly affected by the health

care revolution in the United States during the past two decades. Despite new limitations on psychological services across the board and psychological testing in particular, it continues to offer a rapid and efficient method of identifying problems, planning and monitoring a course of treatment, and assessing the outcomes of interventions. This thoroughly revised and greatly expanded third edition of a classic reference, now three volumes, constitutes an invaluable resource for practitioners who in a managed care era need to focus their testing not on the general goals of personality assessment, symptom identification, and diagnosis so often presented to them as students and trainees, but on specific questions: What course of treatment should this person receive? How is it going? Was it effective? New chapters describe new tests and models and new concerns such as ethical aspects of outcomes assessment. Volume I reviews general issues and recommendations concerning the use of psychological testing for screening for psychological disturbances, planning and monitoring appropriate interventions, and the assessing outcomes, and offers specific guidelines for selecting instruments. It also considers more specific issues such as the analysis of group and individual patient data, the selection and implementation of outcomes instrumentation, and the ethics of gathering and using outcomes data. Volume II discusses psychological measures developed for use with younger children and adolescents that can be used for the purposes outlined in Volume I; Volume III, those developed for use with adults. Drawing on the knowledge and experience of a diverse group of leading experts--test developers, researchers, clinicians and

others, the third edition of The Use of Psychological Testing for Treatment Planning and Outcomes Assessment provides vital assistance to all clinicians, and to their trainees and graduate students.

Seen by many as a contemporary classic, Janwillem van de Wetering's small and admirable memoir records the experiences of a young Dutch student—later a widely celebrated mystery writer—who spent a year and a half as a novice monk in a Japanese Zen Buddhist monastery. As Chogyam Trungpa Rinpoche, author of *Cutting Through Spiritual Materialism*, has written, *The Empty Mirror* "should be very encouraging for other Western seekers." It is the first book in a trilogy that continues with *A Glimpse of Nothingness* and *Afterzen*.
