the performance, driveability, and fuel economy of any classic vehicle. Through a series of sensors, processors, and wires, it gathers engine and atmospheric information to precisely deliver the correct amount of fuel to your engine. With a carburetor, you must manually adjust and change parts to adapt it to differing conditions and applications. Installing a complete aftermarket EFI system may seem too complex, but it is within your reach by using the clear and easy-to-understand, step-by-step instructions. You will be able to confidently install the correct EFI system in your vehicle and enjoy all the benefits. A variety of EFI Systems are currently available--throttle body injection (TBI), multi port fuel injection (MPFI), stack systems, application specific, and special application systems. Author Tony Candela reveals the attributes of each, so you can select the system that's ideal for your car. Author Tony Candela explains in exceptional detail how to install both of these systems. To achieve top performance from an EFI system, it's not a simple bolt-on and plug-in procedure. This book takes the mystery out of EFI so it's not a black art but rather a clear working set of parameters. You are shown how to professionally install the injectors into the intake system as well as how to integrate the wiring into the main harness. In addition, each step of upgrading the fuel system to support the EFI is explained. The book also delves into integrating ignition and computer control with these aftermarket systems so you can be out driving rather than struggling with tuning. Turbocharged, supercharged, and nitrous applications are also covered. A well-installed and -tuned EFI system greatly improves the performance of a classic V-8

or any engine because the system delivers the correct fuel mixture for every operating condition. Get faster starts, better fuel economy, and crisp efficient performance. In EFI Conversions: How to Swap Your Carb for Electronic Fuel Injection, achieving all these benefits is easily within your reach.

American performance and the V-8 engine are inextricably linked. Ever since the first mass-produced automobile V-8 was introduced by Cadillac in 1914, the V-8 has been the engine of choice for America's most powerful vehicles—race cars, luxury cruisers, hot rods, and pick-up trucks. This is particularly true for the post WWII period, which is the focus of Ultimate American V-8 Engine Data Book. Every American V-8 ever produced for passenger car use since 1949 is covered in this exhaustive guide, which presents complete listings of V-8 specifications through the 2009 model year. Each listing provides general specs for the engine, as well as part numbers for basic engine components—for vehicles from that first Cadillac to the latest star of NASCAR. The book includes details on displacement, horsepower, torque, carburetion and fuel injection, compression ratio, internal dimensions, and virtually every other specification of value to collectors, mechanics and builders, and enthusiasts.

Travelers differ. At one extreme are random travelers who see what they accidentally bump into. At the other extreme are the lock-step travelers who follow a banner (or a red umbrella) and look when and where a voice tells them to look. Between these extremes are the guide-book travelers who identify the whereabouts of those sites that interest them and they plan their sightseeing accordingly. If a traveler's interests are captivated by the arts, guide books can be very helpful. For example, the table of contents of a current guide book for travelers going to Germany has sections on architecture, art, literature, music and cinema. The index gives page references for famous writers, musicians, and artists. Yet, while Germany was a dominant force in physical science during the 19th and into the 20th centuries and while the names and photos of prominent German physical scientists who worked in this period are sprinkled through the pages of textbooks, only one scientist is mentioned by name: Albert Einstein is identified as the most famous citizen of Ulm.
