Dust & Decay

CREEPERS, David Morrell's gripping joyride of a thriller, depicts every harrowing second in eight hours of relentless terror. A *New York Times* bestseller, it received the prestigious Stoker Award from the Horror Writers Association. On a cold October night, five people gather in a run-down motel on the New Jersey shore and begin preparations to break in to the Paragon Hotel. Built in the glory days of Asbury Park by a reclusive millionaire, the magnificent structure—which foreshadowed the beauties of art-deco architecture—is now boarded up and marked for demolition. The five people are "creepers," the slang term for urban explorers: city archeologists with a passion for investigating abandoned buildings and their dying secrets. On this evening, they are joined by a reporter who wants to profile them—anonously, as this is a highly illegal activity—for a *New York Times* article. Frank Balenger isn't looking for just a story, however. And after the group enters the rat-infested tunnel leading to the hotel, it becomes clear that he will get much more than he bargained for. Danger, terror, and death await the creepers in a place ravaged by time and redolent of evil. The darkest secrets live in places you're not supposed to be. "Chilling." —Stephen King, *New York Times* bestselling author of *Doctor Sleep* "Crack this novel, and it's like an alien abduction of your brain—forget resuming your normal life until it's finished. This will be a classic."—Douglas Preston, *New York Times* bestselling co-author (with Lincoln Child) of *White Fire* "With its nonstop cascade of ingeniously contrived dangers and assaults, culminating in an apocalyptic finale, *Creepers* provides the essence of all thrillers, an intense emotional effect that will leave readers drained."—Washington Post

Fall of Night

Congress, the Press, and Political Accountability is the first large-scale examination of how local media outlets cover members of the United States Congress. Douglas Arnold asks: do local newspapers provide the information citizens need in order to hold representatives accountable for their actions in office? In contrast with previous studies, which largely focused on the campaign period, he tests various hypotheses about the causes and consequences of media coverage by exploring coverage during an entire congressional session. Using three samples of local newspapers from across the country, Arnold analyzes all coverage over a two-year period--every news story, editorial, opinion column, letter, and list. First he investigates how twenty-five newspapers covered twenty-five local representatives; and next, how competing newspapers in six cities covered their corresponding legislators. Examination of an even larger sample, sixty-seven newspapers and 187 representatives, shows why some newspapers cover legislators more thoroughly than do other papers. Arnold then links the coverage data with a large public opinion survey to show that the volume of coverage affects citizens' awareness of representatives and challengers. The results show enormous variation in coverage. Some newspapers cover legislators frequently, thoroughly, and accessibly. Others--some of them famous for their national coverage--largely ignore local representatives. The analysis also confirms that only those incumbents or challengers in the most competitive races, and those who command huge sums of money, receive extensive coverage.

Congress, the Press, and Political Accountability

Dogs of War: Robots are no longer science fiction. Autonomous, programmed to react like animals: fast, relentless, deadly. From microscopic nanobots to massive self-guided aircraft. This technology is here, it's assessable, and it's dangerous. What's even scarier is that almost anyone can get their hands on it. A freelance terrorist uses the latest generation of robot dogs to deliver WMDs into cities across America. Sophisticated military weapons systems turn on their human masters. A technological apocalypse is coming and we may be too late to stop it. Joe Ledger and a newly rebuilt Department of Military Sciences square off against this new and terrible threat. Dogs of War pits Joe against a merciless new enemy and an army of techno-terrorists in a race to prevent a global destruction. Let loose the Dogs of War.
