Based on the extensively revised Santrock's Psychology 6e, Psychology Brief Edition" is a highly readable, practical and research oriented introduction to the discipline. The Brief Edition was developed to satisfy the demand for a shorter text that could easily be covered in one semester. Chapters were rewritten to maintain the continuity and pedagogy that has made Santrock a student and market favorite. Memory, Language, and Intelligence have been combined to form one cohesive chapter and the health psychology and statistics coverage has been moved into an appendix. Santrock provides faculty and students with the most relevant introduction to psychology available, no other Introductory text provides a better balance of research vs. pedagogy, content vs. applications, depth vs. breadth, and theoretical vs. practical information. All of this is presented in the clearly understandable and straightforward prose that Santrock is renowned for and in a highly visual design that is pedagogically sound and engaging without being distracting.

This volume explores the concept of 'citizenship', and argues that it should be understood both as a process of becoming and the ability to participate fully, rather than as a status that can be inherited, acquired, or achieved. From a courtroom in Bulawayo to a nursery in Birmingham, the authors use local contexts

to foreground how the vulnerable, particularly those from minority language backgrounds, continue to be excluded, whilst offering a powerful demonstration of the potential for change offered by individual agency, resistance and struggle. In addressing questions such as 'under what local conditions does "dis-citizenship" happen?'; 'what role do language policies and pedagogic practices play?' and 'what kinds of margins and borders keep humans from fully participating'? The chapters in this volume shift the debate away from visas and passports to more uncertain and contested spaces of interpretation.

Airfield pavement deicing and anti-icing are essential activities to maintain safe winter operations of the aviation industry. Airfield pavement deicing products (PDPs) traditionally consisting of urea or glycols have become less popular owing to their adverse environmental impacts. New PDPs have emerged as alternatives that often contain potassium acetate (KAc), sodium acetate (NaAc), sodium formate (NaF), or potassium formate (KF) as the freezing point depressant. When it comes to airfield pavement deicing and anti-icing there are no simple solutions to the competing, and sometimes conflicting, objectives of aircraft safety, environmental regulatory compliance, materials compatibility, and operational implementation viability.

by Paul Ricoeur It is already a piece of good fortune to find oneself understood by a reader who is at once demanding and benevolent. It is an even greater fortune to be better understood by another than by one's own self. In effect, when I look back, I am rather struck by the discontinuity among my works, each of which takes on a specific problem and apparently has little more in common with its predecessor than the fact of having left an overflow of unanswered questions behind it as a residue. On the contrary, Domenico Jervolino's interpretation of my works, which extend over more than forty years, stresses their coherence, in spite of the gap in time between my present, soon to be issued work--*Temps et Recit*--and my first, *Philosophie de la Volonte: le Volontaire et l'Involontaire*. Our friend finds the principle of coherence first of all in the recurrence of a problem: the destiny of the idea of subjectivity, caught in the cross-fire between Nietzsche and Heidegger on one side and semiology, psychoanalysis and the critique of ideology on the other. He finds it likewise in the insistence on a method: the mediating role played by interpretation, mainly of texts, with regard to reflexion on self.
