THE MOST COMPLETE AND UP-TO-DATE GUIDE AVAILABLE TO ENERGY SAVINGS IN THE HOME Praise for the Ninth Edition: A Penny-Wise Guide to 'Buttoning Up Your House' -The New York Times the most comprehensive resource to home energy savings that I've seen. Every homeowner and environmentally conscious (or utility paying) renter should have a copy. - Green Living The advice here will also save you hundreds of dollars a year in energy costs. -Better Homes and Gardens The Consumer Guide to Home Energy Savings has sold nearly a quarter of a million copies. Completely revised to incorporate the latest developments in green technology, this well-organized and highly readable manual is the definitive reference for consumers who want to better their home's performance while reducing their energy bills. Updated and expanded chapters focus on specific aspects of any home, such as heating and cooling, ventilation, electronics, lighting, cooking and laundry, and provide helpful explanations for each, including: - Energy use characteristics - Comparisons between available technologies - Cost-effective repair and replacement options - Step-by-step guidance for finding the right equipment. This comprehensive resource is packed with tips on improving existing equipment and guidance for when and why to invest in new purchases, as well valuable pointers on locating grants or incentives offered by local governments and utilities. It is a must-read for anyone concerned about reducing both their energy bills and their environmental impact. To help bring you the very best

Big Green Purse

This is a must for those who are tired of power brownouts and blackouts, skyrocketing energy bills and the feeling that there is nothing we can do to help resolve these problems ourselves. Don't wait for utility bill sticker shock to worsen, or sit through another power outage or energy disruption. This new edition of the guide can help readers to seize their own destiny, become more self-reliant and

use the available technology to make their homes more comfortable and their power bills more affordable. Two experts on solar energy have updated their classic guide for homeowners and businesses. Learn about numerous new products, proven reliable and effective, which are now available on the shelves of hardware stores, home supply centres and other outlets. The new edition includes updated information on solar energy tax credits and a host of new state programs supporting clean energy. The incentives total over \$3 billion for clean energy installations, and the authors provide a quick guide to accessing these and other consumer benefits.

one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming-even hopeless? As Diane MacEachern argues in *Big Green Purse*, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world-women. MacEachern's message is simple but revolutionary. If women harness the "power of their purse" and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities-cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more-where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually "green" and those that are simply marketed as "ecofriendly." Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, *Big Green Purse* will become the "green shopping bible" for women everywhere who are asking, "What can I do?"

A long-time rock critic, the chief music critic for The Village Voice offers an insightful overview of the music of the 1990s, discussing rock, rap, country, world music, and more, and grading albums from A+ works to the total failures. Original. 25,000 first printing.

Consumer Guide Buying Guide 1991

From one of the most prestigious nonprofit organizations devoted to environmental issues comes a clear, practical, and rational overview of the relationship between consumers and the environment. Paper or plastic? Bus or car? Old house or new? Cloth diapers or disposables? Some choices have a huge impact on the environment; others are of negligible importance. To those of us who care about our quality of life and what is happening to the earth, this is a vastly important issue. In these pages, the Union of Concerned Scientists help inform consumers about everyday decisions that significantly affect the environment. For example, a few major decisions--such as the choice of a house or vehicle--have such a disproportionately large affect on the environment that minor environmental infractions shrink by comparison. This book identifies the 4 Most Significant Consumer-Related Environmental Problems, the 7 Most Damaging Spending Categories, 11 Priority Actions, and 7 Rules for Responsible Consumption. Learn what you can do to have a truly significant impact on our world from the people who are at the forefront of scientific research.
