Fostering Family History Services: A Guide for Librarians, Archivists, and Volunteers

Since the early 1990s, while mainland China's state-owned movie studios have

struggled with financial and ideological constraints, an exciting alternative cinema has developed. Dubbed the "Urban Generation," this new cinema is driven by young filmmakers who emerged in the shadow of the events at Tiananmen Square in 1989. What unites diverse directors under the "Urban Generation" rubric is their creative engagement with the wrenching economic and social transformations underway in China. Urban Generation filmmakers are vanguard interpreters of the confusion and anxiety triggered by the massive urbanization of contemporary China. This collection brings together some of the most recent original research on this emerging cinema and its relationship to Chinese society. The contributors analyze the historical and social conditions that gave rise to the Urban Generation, its aesthetic innovation, and its ambivalent relationship to China's mainstream film industry and the international film market. Focusing attention on the Urban Generation's sense of social urgency, its documentary impulses, and its representations of gender and sexuality, the contributors highlight the characters who populate this new urban cinema—ordinary and marginalized city dwellers including aimless bohemians, petty thieves, prostitutes, postal workers, taxi drivers, migrant workers—and the fact that these "floating urban subjects" are often portrayed by non-professional actors. Some essays concentrate on specific films (such as Shower and Suzhou River) or filmmakers (including Jia Zhangke and Zhang Yuan), while others survey broader concerns. Together the thirteen essays in this collection give a multifaceted account of a significant, ongoing cinematic and cultural phenomenon. Contributors. Chris Berry, Yomi Braester, Shuqin Cui,

Linda Chiu-han Lai, Charles Leary, Sheldon H. Lu, Jason McGrath, Augusta Palmer, Bérénice Reynaud, Yaohua Shi, Yingjin Zhang, Zhang Zhen, Xueping Zhong

A novel of second love between Americans abroad—"a monumental achievement" from the New York Times–bestselling author of The Women's Room (Cosmopolitan). Dolores Durer, a divorced English professor and the mother of two adult children, has sworn off love after a series of disastrous affairs. Electronics executive Victor Morrissey is in England to open a branch office. He has four children and is unhappily married. From the moment they meet—on a train—their connection is instant and passionate. The two Americans abroad embark on an affair that will have consequences in both their lives. Each carries baggage. Dolores is haunted by family tragedy; Victor is tormented by marital estrangement.

Driven by an impending sense of urgency, knowing their time together is finite, they struggle to transform their pasts into a hopeful future.

Image editing is a crucial element in the photographic workflow. Image editing tools, most notably Photoshop, are usually sophisticated and deep applications, and are fairly expensive. The only open source tool in this market is the GIMP, which has developed into a powerful, multiplatform system running on Linux, Mac OS X, and Microsoft Windows. GIMP 2.8 for Photographers is a beginner's guide to the only open source image editing tool that provides a no-cost alternative to expensive programs such as Photoshop. Topics include the new user interface and tools, the basics of image editing and simple adjustments, advanced techniques using layers and masks, developing RAW images, working with the improved text tool, and preparing high-quality black-and-white images. The most important editing functions are presented in individual, easy-to-follow workshops. A bonus section on the included DVD describes special techniques for web graphics. GIMP 2.8 for Photographers has evolved from classroom materials that the author developed and taught in courses and workshops on image editing with the GIMP.

Your one-stop guide to the Robot Operating System About This Book Model your robot on a virtual world and learn how to simulate it Create, visualize, and process Point Cloud information Easy-to-follow, practical tutorials to program your own robots Who This Book Is For If you are a robotic enthusiast who wants to learn how to build and program your own robots in an easy-to-develop, maintainable, and shareable way, this book is for you. In order to make the most of the book, you should have a C++ programming background, knowledge of GNU/Linux systems, and general skill in computer science. No previous background on ROS is required, as this book takes you from the ground up. It is also advisable to have some knowledge of version control systems, such as svn or git, which are often used by the community to share code. What You Will Learn Install a complete ROS Hydro system Create ROS packages and metapackages, using and debugging them in real time Build, handle, and debug ROS nodes Design your 3D robot model and simulate it in a virtual environment within Gazebo Give your robots the power of

sight using cameras and calibrate and perform computer vision tasks with them Generate and adapt the navigation stack to work with your robot Integrate different sensors like Range Laser, Arduino, and Kinect with your robot Visualize and process Point Cloud information from different sensors Control and plan motion of robotic arms with multiple joints using MoveIt! In Detail If you have ever tried building a robot, then you know how cumbersome programming everything from scratch can be. This is where ROS comes into the picture. It is a collection of tools, libraries, and conventions that simplifies the robot building process. What's more, ROS encourages collaborative robotics software development, allowing you to connect with experts in various fields to collaborate and build upon each other's work. Packed full of examples, this book will help you understand the ROS framework to help you build your own robot applications in a simulated environment and share your knowledge with the large community supporting ROS. Starting at an introductory level, this book is a comprehensive guide to the fascinating world of robotics, covering sensor integration, modeling, simulation, computer vision, navigation algorithms, and more. You will then go on to explore concepts like topics, messages, and nodes. Next, you will learn how to make your robot see with HD cameras, or navigate obstacles with range sensors. Furthermore, thanks to the contributions of the vast ROS community, your robot will be able to navigate autonomously, and even recognize and interact with you in a matter of minutes. What's new in this updated edition? First and foremost, we are going to work with ROS Hydro this time around. You will learn how to create,

visualize, and process Point Cloud information from different sensors. This edition will also show you how to control and plan motion of robotic arms with multiple joints using MoveIt! By the end of this book, you will have all the background you need to build your own robot and get started with ROS. Style and approach This book is an easy-to-follow guide that will help you find your way through the ROS framework. This book is packed with hands-on examples that will help you program your robot and give you complete solutions using ROS open source libraries and tools.

The Liberal Hour

An engaging be hind-the-scenes look at the lesser-known forces that fueled the profound social reforms of the 1960s Provocative and incisive , The Liberal Hour reveals how Washington, so often portrayed as a target of reform in the 1960s, was in fact the era's most effective engine of change. The movements of the 1960s have always drawn the most attention from the decade's chroniclers, but it was in the halls of government-so often the target of protesters' wrath-that the enduring reforms of the era were produced. With nuance and panache, Calvin Mackenzie and Robert Weisbrot present the real-life characters-from giants like JFK and Johnson to lesser-known senators and congressmen-who drove these reforms and were critical to the passage of key legislation. The Liberal Hour offers an engrossing portrait of this extraordinary moment when more progressive legislation was passed than in almost any other era in American history.
