Known for its state-of-the-art coverage, "Surveying with Construction Applications, Sixth Edition" covers the principles of surveying, the latest advances in instrumentation technology, field data capture, and data-processing techniques and the applications of surveying to the construction and engineering fields. Filled with problems, illustrations and field projects, the text skillfully blends theory and practice and balances coverage of traditional and contemporary surveying techniques. This new edition uses both English and metric units, contains a new

chapter on modern construction surveying practices, and includes the most recent advances in electronic surveying measurement, global positioning systems, and geomatics. State-of-the-art coverage of surveying principles, instrumentation and techniques provides readers with the latest advances in instrumentation technology, field data capture, and data-processing techniques to make them more effective in the field. Comprehensive coverage of modern construction surveying practices, highway curves, highway construction surveys, municipal street construction surveys AND MORE! All state Departments of Transportation (DOTs) in the U.S. and the provincial Transportation/Highways Departments in Canada conduct extensive training sessions for their large staffs. This text covers topics that are taught in these training sessions, in addition to all of the introductory topics needed for survey training.

The hundreds of rural cemeteries in Upstate New York are the bucolic final resting places of a plethora of legendary Americans from the recent and distant past. For over a decade, Chuck D'Imperio traveled to research the beautiful and historic region in search of some of the most famous (and infamous) figures in American history. The product of this labor of love is *Great Graves of Upstate New York: Final Resting Places of 70 True American Legends*. Many of the names are familiar to any American—William Rockefeller, Samuel Langhorne Clemens (better known as Mark Twain), Frederick Douglass, Lucille Ball, and Harriet Tubman, and four U.S. presidents: Franklin Delano Roosevelt, Martin Van Buren, Millard Fillmore, and Chester Arthur. An equally colorful host of local characters who shaped the culture of Upstate New York are also featured, including: Kate Smith, “The God Bless America Girl”; mafia figure Joe “Joe the Barber” Barbara; Dr. Mary Walker, America’s only female Congressional Medal of Honor winner; Jennie Grossinger, “The Catskill’s Innkeeper”; and Ernie Davis, “The Pride of the Syracuse Orangemen.” From Syracuse to West Point to Binghamton, and on to Cooperstown, Niagara Falls, and Lake Placid, *Great Graves of Upstate New York* is not only a fact-filled volume on the region’s cemeteries, museums, and historical sites, but a peek into the lives of 70 distinguished individuals who have shaped American history.

Convex optimization problems arise frequently in many different fields. This book provides a comprehensive introduction to the subject, and shows in detail how such problems can be solved numerically with great efficiency. The book begins with the basic elements of convex sets and functions, and then describes various classes of convex optimization problems. Duality and approximation techniques are then covered, as are statistical estimation techniques. Various geometrical problems are then presented, and there is detailed discussion of unconstrained and constrained minimization problems, and interior-point methods. The focus of the book is on recognizing convex optimization problems and then finding the most appropriate technique for solving them. It contains many worked examples and homework exercises and will appeal to students, researchers and practitioners in fields such as engineering, computer science, mathematics, statistics, finance and economics.
