“An absorbing, inspirational memoir” about finding joy in the midst of challenge and hardship—step by step (Publishers Weekly). If you’ve spent most of your life pursuing your career, raising your family, and/or caring for loved ones who may be ill or infirm, your own needs may have been neglected in the process. Patrice Tanaka found herself, at age fifty, needing an infusion of joy after losing her husband and her business, and experiencing the sorrow of living in New York City in the aftermath of 9/11. In *Becoming Ginger Rogers*, she tells her very personal story of growing up Japanese-American in Hawaii and finding success in Manhattan—and then, in midlife, embarking on ballroom dance lessons to satisfy a lifelong dream of dancing like Ginger Rogers. Offering a behind-the-scenes look at the world of competitive ballroom dancing, she also reveals how the things she learned—about being fully present, about the value of following as well as leading—ultimately made her a better partner and a smarter CEO. *Becoming Ginger Rogers* shows us how we can revitalize ourselves even after years of woeful neglect, so that our most exciting and joy-filled days are ahead of us.

BUYING GUIDE ALL NEW FOR 2005

How do you actually turn a million-dollar idea into a million dollars? From scribble-on-the-napkin to

product-on-the market, *The Independent Inventor's Handbook* explains everything a potential inventor needs to know and the tools he or she needs to use to take a raw concept and turn it into reality. Written by Louis J. Foreman, creator of the PBS series *Everyday Edisons* and a holder of multiple patents, together with patent attorney Jill Gilbert Welytok, here's a book that speaks directly to the inventive American—the entrepreneur, the tinkerer, the dreamer, the basement scientist, the stay-at-home mom who figures out how to do it better. (over one million of them file patents each year.) Here is everything a future inventor needs: Understanding the difference between a good idea and a marketable idea. Why investing too much money at the outset can sink you. The downside of design patents, and how best to file an application for a utility patent. Surveys, online test runs, and other strategies for market research on a tight budget. Plus the effective pitch (hint: never say your target audience is "everyone"), questions to ask a prospective manufacturer, 14 licensing land mines to avoid, "looks-like" versus "works-like" prototypes, Ten Things Not to Tell a Venture Capitalist, and how to protect your invention once it's on the market. Appendices include a glossary of legal, manufacturing, and marketing terms, a sample nondisclosure agreement, and a patent application, deconstructed.

Good public relations is no longer just icing-it's a strategic imperative more important to your competitive success than even advertising or marketing. This is true whether you're a century-old multibillion-dollar corporation or a penniless startup. In *Rethinking Reputation*, public relations guru Fraser Seitel and John Doorley, founder of the Academy for Communication Excellence and Leadership at Johnson & Johnson, examine a fascinating new set of case studies-including the BP oil spill and the launch of CitySlips-to glean the PR dos and don'ts for the new media world, covering both standard reputation maintenance and crisis management. They also show start-up companies and entrenched organizations how to use the power of word-of-mouth to jump-start business like never before. This is a wake-up call from two industry legends-for public relations professionals as well as entrepreneurs, CEOs, and anyone else tasked with representing their organization to the world. These new media lessons include: * Remember that research is cheaper, and more critical, than ever. * Don't let the perfect be the enemy of the good-launch your idea before someone else does. * Don't get so excited about social media that you forget about traditional media. * In a crisis, you are never offstage. * Never lie, never whine, and never try to predict the future!

Against the Odds

In this first book about the rather young discipline, the author consolidated its key principles, so that they can be consulted, referenced and utilised by both design students and professionals. Only when the perfect balance between visual beauty and functional performance is achieved, can a product provide a consistent and successful user experience. The discipline of CMF design focuses on designing and specifying colours, materials and finishes to support both functional and emotional attributes of products. The work of the CMF designer combines aesthetics and practical knowledge of materials and technologies with intangible human perceptions of value. This area of design expertise is increasingly in demand. Consumer product manufacturers have an enhanced awareness of its great potential for diversifying product portfolios at relatively low costs, while still maintaining a similar or the same product shape, functionality or tooling. It can work as a key avenue to create a sense of novelty and higher value propositions. From a marketing perspective, CMF design is a valuable tool when it comes to positioning products, collections and categories according to market tiers and consumer segmentations. Introducing the CMF process and detailing the areas of colour, material and finish design, this book serves as a valuable source of information about this emerging professional discipline and its fundamental principles.
