This accessible, and reader-friendly introduction to applied calculus prepares readers to deal with calculus topics when they are encountered in a variety of

areas. The emphasis throughout is on computational skills, ideas, and problem solving--rather than on mathematical theory. Most derivations and proofs are omitted except where their inclusion adds significant insight into a particular concept, and general concepts and results are usually presented only after particular cases have been discussed. There are over 370 numbered worked examples, and most sections contain applied exercises from business and economics, life sciences, and social sciences. A Beginning Library of Elementary Functions. Additional Elementary Functions. The Derivative. Graphing and Optimization. Additional Derivative Topics. Integration. Additional Integration. Multivariable Calculus. Differential Equations. Taylor Polynomials and Infinite Series. Probability and Calculus. Trigonometric Functions Review. For anyone who needs a proficiency in calculus in their work in business, economics, social sciences, or life sciences.

## **The Economics of Recreation, Leisure and Tourism**

Alfred Marshall, Principles of Economics (1890) – Founder of Modern (Neo-classical) Economics. His book Principles of Economics was the dominant textbook in economics for a long time and it is considered to be his seminal work.

## **Essentials of Economics**

This carefully constructed textbook empowers the reader with an understanding of fundamental economic concepts. There are 31 "one-concept" chapters. Each short chapter highlights one economic principle. The student can study one concept and be reinforced by the learning process before proceeding to another. The writing is lucid and at the student's level. Self-review exercises conclude each chapter. The text is well integrated to show the relationship among the basic concepts and to offer a comprehensive overview of economics. The one-concept chapters provide organizational flexibility for the instructor. There are eight modules: The Economic Problem; Price Determination; Behind the Supply Curve; Measuring the Economy, The Level of Income; Money; Trade; Conclusion. A study guide is available on line without charge. Each chapter in the text has a corresponding chapter in the study guide as well as an introduction to graphing. The Instructor Manual, Test Bank and Power Point slides are available upon request for all instructors who adopt this

book as a course text. Please send your request to sales@wspc.com.
