### (Bilingual) NET JRF Commerce Previous Year Papers 2011 Onwards

The University Grants Commission of India is a statutory body set up by the Government of India in accordance to the UGC Act 1956 under Ministry of Human Resource Development, and is charged with coordination, determination and maintenance of standard of higher education. The National Eligibility Test (NET), also known as UGC NET or NTA-UGC-NET, is the test for determining the eligibility for the post of Assistant Professor and / or Junior Research Fellowship (JRF) award in Indian universities and colleges. This national level entrance exam is conducted twice every year in the month of June and December. Economics Post- Graduates usually opt the UGC NET Economics subject to pursue their career either as junior research fellows or professors or both. National Testing Agency (NTA) will conduct UGC NET Exam for Assistant Professor and for junior research fellowship. The UGC NET test will consist of two papers, paper 1 and 2. Paper 1 remains common for all subjects and consists of questions from research, teaching & General Aptitude on the other hand paper 2 will consist of questions from only Economics subjects.

## **Mathematical Reasoning & Aptitude June & Dec 2019**

In this book you can read the collection of chapterwise questions of UGC NTA NET Paper 1 Exams conducted during June 2019 and December 2019 in a user friendly Presentation mode

2019 and December 2019 in a user friendly Presentation mode

## **Postgraduate studies in History and Civilisation, Economics, Law, Political and Social Sciences**

### **Cambridge International AS and A Level Economics**

Consumer Credit and the American Economy examines the economics, behavioral science, sociology, history, institutions, law, and regulation of consumer credit in the United States. After discussing the origins and various kinds of consumer credit available in today's marketplace, this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen "too fast for too long." It then turns to demand and supply with chapters discussing neoclassical theories of demand, new behavioral economics, and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance. This discussion includes review of the economics of risk management and funding sources, as well discussion of the economic theory of why some people might be limited in their credit search, the phenomenon of credit rationing. This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit. The book then discusses technological change in credit granting. It examines how modern automated information systems called credit reporting agencies, or more popularly "credit bureaus," reduce the costs of information acquisition and permit greater credit availability at less cost. This discussion is followed by examination of the logical offspring of technology, the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly. After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable, including "payday loans" and other small dollar sources of loans, discussion turns to legal structure and the regulation of consumer credit. There are separate chapters on the theories behind the two main thrusts of federal regulation to this point, fairness for all and financial disclosure. Following these chapters, there is another on state regulation that has long focused on marketplace access and pricing. Before a final concluding chapter, another chapter focuses on two noncredit marketplace products that are closely related to credit. The first of them, debt protection including credit insurance and other forms of credit protection, is economically a complement. The second product, consumer leasing, is a substitute for credit use in many situations, especially involving acquisition of automobiles. This chapter is followed by a full review of consumer bankruptcy, what happens in the worst of cases when consumers find themselves unable to repay their loans. Because of the importance of consumer credit in consumers' financial affairs, the intended audience includes anyone interested in these issues, not only specialists who spend much of their time focused on them. For this reason, the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics. It also examines the

psychological, sociological, historical, and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today.

Unit 3: Business Economics □ Meaning and scope of business economics □ Objectives of business firms □ Demand analysis: Law of demand; Elasticity of demand and its measurement; Relationship between AR and MR □ Consumer behavior: Utility analysis; Indifference curve analysis □ Law of Variable Proportions: Law of Returns to Scale □ Theory of cost: Short-run and long-run cost curves □ Price determination under different market forms: Perfect competition; Monopolistic competition; Oligopoly- Price leadership model; Monopoly; Price discrimination □ Pricing strategies: Price skimming; Price penetration; Peak load pricing

Unit 4: Business Finance □ Scope and sources of finance; Lease financing □ Cost of capital and time value of money □ Capital structure □ Capital budgeting decisions: Conventional and scientific techniques of capital budgeting analysis □ Working capital management; Dividend decision: Theories and policies □ Risk and return analysis; Asset securitization □ International monetary system □ Foreign exchange market; Exchange rate risk and hedging techniques □ International financial markets and instruments: Euro currency; GDRs; ADRs □ International arbitrage; Multinational capital budgeting

Unit 5: Business Statistics and Research Methods □ Measures of central tendency □ Measures of dispersion □ Measures of skewness □ Correlation and regression of two variables □ Probability: Approaches to probability; Bayes' theorem □ Probability distributions: Binomial, poisson and normal distributions □ Research: Concept and types; Research designs □ Data: Collection and classification of data □ Sampling and estimation: Concepts; Methods of sampling - probability and non-probability methods; Sampling distribution; Central limit theorem; Standard error; Statistical estimation □ Hypothesis testing: z-test; t-test; ANOVA; Chi-square test; Mann-Whitney test (U-test); Kruskal-Wallis test (H-test); Rank correlation test □ Report writing

Unit 6: Business Management and Human Resource Management □ Principles and functions of management □ Organization structure: Formal and informal organizations; Span of control □ Responsibility and authority: Delegation of authority and decentralization □ Motivation and leadership: Concept and theories □ Corporate governance and business ethics □ Human resource management: Concept, role and functions of HRM; Human resource planning; Recruitment and selection; Training and development; Succession planning □ Compensation management: Job evaluation; Incentives and fringe benefits □ Performance appraisal including 360 degree performance appraisal □ Collective bargaining and workers' participation in management □ Personality:

Perception; Attitudes; Emotions; Group dynamics; Power and politics; Conflict and negotiation; Stress management □  
Organizational Culture: Organizational development and organizational change Unit 7: Banking and Financial Institutions □  
Overview of Indian financial system □ Types of banks: Commercial banks; Regional Rural Banks (RRBs); Foreign banks;  
Cooperative banks □ Reserve Bank of India: Functions; Role and monetary policy management □ Banking sector reforms in  
India: Basel norms; Risk management; NPA management □ Financial markets: Money market; Capital market; Government  
securities market □ Financial Institutions: Development Finance Institutions (DFIs); Non-Banking Financial Companies  
(NBFCs); Mutual Funds; Pension Funds □ Financial Regulators in India □ Financial sector reforms including financial inclusion  
□ Digitisation of banking and other financial services: Internet banking; mobile banking; Digital payments systems □  
Insurance: Types of insurance- Life and Non-life insurance; Risk classification and management; Factors limiting the  
insurability of risk; Re-insurance; Regulatory framework of insurance- IRDA and its role Unit 8: Marketing Management □  
Marketing: Concept and approaches; Marketing channels; Marketing mix; Strategic marketing planning; Market  
segmentation, targeting and positioning □ Product decisions: Concept; Product line; Product mix decisions; Product life  
cycle; New product development □ Pricing decisions: Factors affecting price determination; Pricing policies and strategies □  
Promotion decisions: Role of promotion in marketing; Promotion methods - Advertising; Personal selling; Publicity; Sales  
promotion tools and techniques; Promotion mix □ Distribution decisions: Channels of distribution; Channel management □  
Consumer Behaviour; Consumer buying process; factors influencing consumer buying decisions □ Service marketing □  
Trends in marketing: Social marketing; Online marketing; Green marketing; Direct marketing; Rural marketing; CRM □  
Logistics management Unit 9: Legal Aspects of Business □ Indian Contract Act, 1872: Elements of a valid contract; Capacity  
of parties; Free consent; Discharge of a contract; Breach of contract and remedies against breach; Quasi contracts; □  
Special contracts: Contracts of indemnity and guarantee; contracts of bailment and pledge; Contracts of agency □ Sale of  
Goods Act, 1930: Sale and agreement to sell; Doctrine of Caveat Emptor; Rights of unpaid seller and rights of buyer □  
Negotiable Instruments Act, 1881: Types of negotiable instruments; Negotiation and assignment; Dishonour and discharge  
of negotiable instruments □ The Companies Act, 2013: Nature and kinds of companies; Company formation; Management,  
meetings and winding up of a joint stock company □ Limited Liability Partnership: Structure and procedure of formation of  
LLP in India □ The Competition Act, 2002: Objectives and main provisions □ The Information Technology Act, 2000:  
Objectives and main provisions; Cyber crimes and penalties □ The RTI Act, 2005: Objectives and main provisions □  
Intellectual Property Rights (IPRs) : Patents, trademarks and copyrights; Emerging issues in intellectual property □ Goods  
and Services Tax (GST): Objectives and main provisions; Benefits of GST; Implementation mechanism; Working of dual GST  
Unit 10: Income-tax and Corporate Tax Planning □ Income-tax: Basic concepts; Residential status and tax incidence;  
Exempted incomes; Agricultural income; Computation of taxable income under various heads; Deductions from Gross total  
income; Assessment of Individuals; Clubbing of incomes □ International Taxation: Double taxation and its avoidance  
mechanism; Transfer pricing □ Corporate Tax Planning: Concepts and significance of corporate tax planning; Tax avoidance  
versus tax evasion; Techniques of corporate tax planning; Tax considerations in specific business situations: Make or buy  
decisions; Own or lease an asset; Retain; Renewal or replacement of asset; Shut down or continue operations □ Deduction

and collection of tax at source; Advance payment of tax; E-filing of income-tax returns

## **People, Development and Environment**

This book examines how the Cambridge School economists, such as J. M. Keynes, constructed revolutionary theories and advocated drastic policies based on their ideals for social organizations and their personal characteristics. Although vast numbers of studies on Marshall, Keynes and Marshallians have been published, there have been very few studies on the 'Keynesian Revolution' or Keynes's relevance to the modern world from archival and intellectual viewpoints which focus on Keynes as a member of the Cambridge School. This book approaches Keynes from three directions: person, time and perspective. The book provides a better understanding of how Keynes struggled with problems of his time and it also offers valuable lessons on how to survive fluctuating global capitalism today. It focuses on eight key economists as a group in 'a public sphere' rather than as a school (a unified theoretical denominator), and clarifies their visions and the widespread beliefs at the time by investigating their common motivations, lifestyles, values and habits.

### **Australian Journal of Labour Economics**

Dishonesty in Behavioral Economics provides a rigorous and comprehensive overview of dishonesty, presenting state-of-the-art research that adopts a behavioral economics perspective. Throughout the volume, contributors emphasize the effects of psychological, social, and cognitive factors on the decision-making process. In contrast to related titles, Dishonesty in

Behavioral Economics emphasizes the importance of empirical research methodologies. Its contributors demonstrate how various methods applied to similar research questions can lead to different results. This characteristic is important because, of course, it is difficult to obtain reliable measures of dishonesty. Reviews many key issues in the literature around lying, cheating, fraudulence, and deception Covers both state-of-the-art methods and data collection mechanisms (e.g., laboratory experiments, field experiments, online surveys) Discusses novel interdisciplinary research findings and from them proposes new avenues of research

### **A -Level Economics AQA**

This title covers the entire syllabus for Cambridge International Examinations' International AS and A Level Economics (9708). It is divided into separate sections for AS and A Level making it ideal for students studying both the AS and the A Level and also those taking the AS examinations at the end of their first year. - Students will benefit from an accessible and international perspective on economics - Provides practice throughout the course with carefully selected past paper questions focussing on data response and essay questions - Free Revision and practice CD includes interactive tests, selected answers, additional activities, and a list of key terms We are working with Cambridge International Examinations to gain endorsement for this title.

## **Bibliographic Guide to Business and Economics**

A groundbreaking work that paves the way for a new, pro-active financial system With The Monetary System, innovative author pairing Jean-Francois Servat and Jean-Pascal Tranie devise a comprehensive economic modeling system that accounts for the unprecedented situation facing international and regional economies by developing a controversial new stance on the operation of money in society. Presenting a classification of financial instruments with a view toward their underlying legal structures, the book sheds new light on the present economic and financial problems of slow growth and rising debts, and proposes possible outcomes for the global economy. The authors have already gained international attention with their novel approach to currency, and now they turn their attention to the social function of money in all its myriad forms. The book provides a way forward in an era of increased life expectancy and other new social patterns and the social role of money provides a framework for understanding intergenerational redistribution—an urgently pressing task in our time. New aggregate financial categories and economic modeling reveal a possible foundation for increased financial stability Companion website includes key mathematical models, accounting standards, and PowerPoint slides Comprehensive theoretical underpinning presents the contemporary model of money as a social contract Insights into the current economic situation make sense of sovereign debt risk in markets around the world With questions and answers at the end of each chapter, The Monetary System will help you form a new conception of the role of money in society. Improved regulation and tax policies are needed to stabilize the global economy, and this book provides the framework for getting there.

## **Cambridge O Level Economics Student's Book**

The 1993 publication of Marianne A. Ferber and Julie A. Nelson's Beyond Economic Man was a landmark in both feminist scholarship and the discipline of economics, and it quickly became a handbook for those seeking to explore the emerging connections between the two. A decade later, this book looks back at the progress of feminist economics and forward to its

future, offering both a thorough overview of feminist economic thought and a collection of new, high-quality work from the field's leading scholars.
