This title was first published in 2000: The study of corporate governance is a relatively modern development, with significant attention devoted to the subject only during the last fifty years. The topics covered in this volume include the purpose of the corporation, the board of directors, the role of shareholders, and more contemporary developments like hedge fund activism, the role of sovereign wealth funds, and the development of corporate governance law in what perhaps will become the dominant world economy over the next century, China. The editor has written an introductory essay which briefly describes the intellectual history of the field and analyses the material selected for the volume. The papers which have been selected present what the editor believes to be some of the best and most representative studies of the subjects covered. As a result the volume offers a rounded view of the contemporary state of the some of the dominant issues in corporate governance.

A riveting family saga, *The Story of Edgar Sawtelle* explores the deep and ancient alliance between humans and dogs, and the power of fate through one boy's epic journey into the wild. Born mute, speaking only in sign, Edgar Sawtelle leads an idyllic life with his parents on their farm in remote northern Wisconsin. For generations, the Sawtelles have raised and trained a fictional breed of dog whose thoughtful companionship is epitomized by Almondine, Edgar's lifelong companion. But with the unexpected return of

Claude, Edgar's uncle, turmoil consumes the Sawtelle's once-peaceful home. When Edgar's father dies suddenly, Claude insinuates himself into the life of the farm – and into Edgar's mother's affections. Grief-stricken and bewildered, Edgar tries to prove Claude played a role in his father's death, but his plan backfires, spectacularly. Edgar flees into the vast wilderness lying beyond the farm. He comes of age in the wild, fighting for his survival and that of the three yearling dogs who follow him. But his need to face his father's murderer, and his devotion to the Sawtelle dogs, turn Edgar ever homeward. Wroblewski is a master storyteller, and his breathtaking scenes – the elemental north woods, the sweep of seasons, an iconic American barn, a ghost made of falling rain – create a family saga that is at once a brilliantly inventive retelling of Hamlet, an exploration of the limits of language, and a compulsively readable modern classic. It is now becoming recognized in the measurement community that it is as important to communicate the

uncertainty related to a specific measurement as it is to report the measurement itself. Without knowing the uncertainty, it is impossible for the users of the result to know what confidence can be placed in it; it is also impossible to assess the comparability of different measurements of the same parameter. This volume collects 20 outstanding papers on the topic, mostly published from 1999-2002 in the journal "Accreditation and Quality Assurance." They provide the rationale for why it is important to evaluate and report the uncertainty of a result in a consistent manner. They also describe the concept of uncertainty, the methodology for evaluating uncertainty, and the advantages of using suitable reference materials. Finally, the benefits to both the analytical laboratory and the user of the results are considered.

The Story of Edgar Sawtelle

This contributed volume seeks to provide a unique window on the globalization process by analyzing the dynamics of Foreign Direct Investment (FDI) in Europe and Asia, as well as its influence on the renewal of public policies and regulations, both transnational and local. It discusses the link between the transnationalization of productive and business systems and the renewal of local regulations in the light of concerns over competitiveness and attractiveness, as well as new social tensions. Multinational corporations (MNCs) as key actors of globalization are central for understanding the new interactions between the global, regional and local dimensions as well as for highlighting the challenges of regulation both at transnational level and within national boundaries. Research approaches along two broad lines are presented: First, a theoretical and empirical approach that examines links between the strategies of multinationals and local public policy in order to contribute to a better understanding of the institutional dynamics of social regulation. Second, a comparative approach that compares regional spaces, with particular attention to Europe on the one hand, and to the two great emerging powers, China and India, on the other.
