Understanding 'O' Level Physics Through Problem Solving

A subject-specific guide for teachers to supplement professional development and provide resources for lesson planning. Approaches to learning and teaching Science is the result of close collaboration between Cambridge University Press and Cambridge International Examinations. Considering the local and global contexts when planning and teaching an international syllabus, the title presents ideas for Science with practical examples that help put theory into context. Teachers can download online tools for lesson planning from our website. This book is ideal support for those studying professional development qualifications or international PGCEs.

Pass With Distinction Physics by Topic

“GUYANA-MY ELDORADO”

Pass with Distinction Physics (By Topic) is specially written for students who wish to score an excellent grade in their GCE O Level Physics examination. Based on the LATEST syllabus (5058), it contains many challenging questions that provide excellent revision material. These questions also help to reinforce students'

understanding of concepts and their ability to apply them. The multiple choice questions (MCQs) and structured questions (SQs) have been carefully categorised into 22 topics. Answers are provided for all questions, with detailed solutions for the SQs. Full solutions, explanations and comments are also included for the more challenging MCQs. The new trend and challenging questions are marked with ⚡. It is hoped that every student will greatly benefit from the use of this book. We believe it will give students an edge and added confidence in their forthcoming examination.

Explaining Physics

Physics is hard to learn? If you are, you are not alone. I had been in your shoes before and experienced the same. It took me a hard time to find out what's wrong with my study method for Physics. Subsequently, I overcame the difficulties and scored in the subject. Physics is not a subject that you could effectively learn by memorising the theories by hard, and practising repetitively. It's all about understanding and relating the concepts to the real world (sometimes, you can get by mathematics and chemistry by not relating the theories and concepts to the real world right?). The best thing about Physics is that once you know the correct study techniques, it could become the easiest subject for you.

O Level Examined

I am seventy-six years of age, have had two heart attacks, and am not really very well. My memory, though, is fine, except sometimes for “names,” but I recall the events as vividly as if they are occurring now. My “Far” passed away on June 10, 2013. Today is Valentine’s Day and I visited my Far twice. Our home on 2665 La Veta Avenue is a mere two minutes away. I have just returned from San Bernardino Community Hospital where I visited a patient, in my capacity as a Muslim chaplain. I am not sure who, if anyone, will ever read this book. It is a chronicle of our wonderful life, but there are many “Cinderella” stories. This is not a masterpiece of the English language, nor is it in any way unique. Writing gave me a great deal of pleasure. I knew I had angels beside me, and at all times, one seraph. We have had much joy, pleasure, excitement, much to wonder about, and much to puzzle over. We have laughed and cried, nearly just as much, sometimes out of pleasure and sometimes out of pain and grief; always, we have “walked with God.” We have made many mistakes—we are only human—and have alienated far too many, but never deliberately nor out of meanness. Those who love us will perhaps forgive, and those who do not may hopefully forget our transgressions,

real or imagined, always remembering what Jesus said about “casting stones.” We tried to make a difference and, with the help of God, we did. In as much as this humble effort reflects the insuperable challenges of finding peace and harmony in a small family, I believe it resonates with the pain and suffering inflicted by man on his fellow man, in places like Syria, Central Africa, and the Ukraine, and with more natural disasters such as hurricanes, typhoons, and tornadoes, which create no less pain and suffering. As I approach the end of my life, I continue in the Ministry of Healing, in the hope that the solace and comfort I attempt to deliver will not be entirely unselfish. Dr. Frank A.
