The Spectator

More and more states require students to pass large-scale tests as a condition of promotion or graduation. What forces have pushed high-stakes testing to the forefront of educational policy? Are such tests the best way to gauge educational attainment? This book examines the economic and educational assumptions underlying the call for high-stakes tests.

Israel and the Occupied Territories

Raising Standards Or Raising Barriers?

Information on the educational systems of Israel and the Occupied Territories (West Bank and the Gaza Strip) and guidelines on placing students from this region in U.S. high schools and colleges are presented. After describing the country and territories, attention is directed to preschool, primary, and intermediate education; secondary education; teacher training and the education profession; nursing and other health professions; overseas student programs in Israel; technological education; higher education; and the United Nations Relief and Works Agency for Palestine Refugees in the Near East. Profiles of technical and higher education institutions in Israel and the Occupied Territories cover degrees/diplomas, admission requirements, college programs, and school characteristics. General information on Israeli higher education includes: college organization and administration, the grading

and credit systems, examinations, and degree programs. Guidelines for admissions officers focus on the admissibility and appropriate level of placement of students from Israel and the territories in U.S. schools. A glossary and list of postsecondary technological/vocational schools are appended. (SW)

Chemical News and Journal of Industrial Science

This highly acclaimed volume in the Defending Public Schools series is now available in paperback from Teachers College Press. It is a practical, necessary addition to the work of administrators, teachers, policymakers, and parents as they negotiate the difficult path of how to best teach and educate today's children and youth.
