The General Theory of Employment, Interest, and Money, written by legendary author John Maynard Keynes is widely considered to be one of the top 100 greatest books of all time. This masterpiece was published right after the Great Depression. It sought to bring about a revolution, commonly referred to as the 'Keynesian Revolution', in the way economists thought—especially challenging the proposition that a market economy tends naturally to restore itself to full employment on its own. Regarded widely as the cornerstone of Keynesian thought, this book challenged the established classical economics and introduced new concepts. 'The General Theory of Employment, Interest, and Money' transformed economics and changed the face of modern macroeconomics. Keynes' argument is based on the idea that the level of employment is not determined by the price of labour, but by the spending of money. It gave way to an entirely new approach where employment, inflation and the market economy are concerned.

I Survived the Sinking of the Titanic, 1912 (I Survived #1)

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning.[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

A new way forward for sustainable quality of life in cities of all sizes *Strong Towns: A Bottom-Up Revolution to Build American Prosperity* is a book of forward-thinking ideas that breaks with modern wisdom to present a new vision of urban development in the United States. Presenting the foundational ideas of the Strong Towns movement he co-founded, Charles Marohn explains why cities of all sizes continue to struggle to meet their basic needs, and reveals the new paradigm that can solve this longstanding problem. Inside, you'll learn why inducing growth and development has been the conventional response to urban financial struggles—and why it just doesn't work. New development and high-risk investing don't generate enough wealth to support itself, and cities continue to struggle. Read this book to find out how cities large and small can focus on bottom-up investments to minimize risk and maximize their ability to strengthen the community financially and improve citizens' quality of life. Tales of a Fourth Grade Nothing

Literacy lies at the heart of student understanding and achievement. Yet too many educators mistakenly assume that the reading, writing, speaking, and thinking skills that students developed in elementary school are sufficient for the sophisticated learning tasks they face in middle and high school. The result? Disappointing test scores, high dropout rates, and students unprepared for higher education, citizenship, and the world of work. Taking Action on Adolescent Literacy: An Implementation Guide for School Leaders presents a structured approach to using literacy as a lever for overall school improvement. Literacy instruction is not an "add-on," authors Judith L. Irvin, Julie Meltzer, and Melinda Dukes insist; it's an ongoing essential. All adolescent students, no matter what their level of achievement, can benefit from direct instruction in reading, writing, speaking, and thinking. And all secondary school leaders can improve students' literacy and learning by following the five action steps outlined in this book: (1) develop and implement a literacy action plan, (2) support teachers to improve literacy instruction, (3) use data to make curricular decisions, (4) build capacity for shared leadership, and (5) creatively allocate resources to support the literacy plan. The book also offers

strategies to help educators integrate literacy and learning across the content areas, provide targeted interventions for students who are struggling the most, and develop a supportive school environment that involves parents, community members, and district leaders. Practical tools, helpful resources, and vignettes based on the authors' extensive work in school districts nationwide make this an indispensable guide for principals, central office administrators, literacy coaches, department chairs, and other school leaders committed to helping students succeed.
