Cambridge Learner's Dictionary with CD-ROM

For a few decades now, They Might Be Giants' album Flood has been a beacon (or at least a nightlight) for people who might rather read than rock out, who care more about science fiction than Slayer, who are more often called clever than cool. Neither the band's hip origins in the Lower East Side scene nor Flood's platinum certification can cover up the record's singular importance at the geek fringes of culture. Flood's significance to this audience helps us understand a certain way of being: it shows that geek identity doesn't depend on references to Hobbits or Spock ears, but can instead be a set of creative and interpretive practices marked by playful excess—a flood of ideas. The album also clarifies an historical moment. The brainy sort of kids who listened to They Might Be Giants saw their own cultural options grow explosively during the late 1980s and early 1990s amid the early tech boom and America's advancing leftist social tides. Whether or not it was the band's intention, Flood's jubilant proclamation of an identity unconcerned with coolness found an ideal audience at an ideal turning point. This book tells the story.

most glamorous, high-profile industries in the world -- and the advent of file sharing brought it to its knees. In a comprehensive, fast-paced account full of larger-than-life personalities, Rolling Stone contributing editor Steve Knopper shows that, after the incredible wealth and excess of the '80s and '90s, Sony, Warner, and the other big players brought about their own downfall through years of denial and bad decisions in the face of dramatic advances in technology. Big Music has been asleep at the wheel ever since Napster revolutionized the way music was distributed in the 1990s. Now, because powerful people like Doug Morris and Tommy Mottola failed to recognize the incredible potential of file-sharing technology, the labels are in danger of becoming completely obsolete. Knopper, who has been writing about the industry for more than ten years, has unparalleled access to those intimately involved in the music world's highs and lows. Based on interviews with more than two hundred music industry sources -- from Warner Music chairman Edgar Bronfman Jr. to renegade Napster creator Shawn Fanning -- Knopper is the first to offer such a detailed and sweeping contemporary history of the industry's wild ride through the past three decades. From the birth of the compact disc, through the explosion of CD sales in the '80s and '90s, the emergence of Napster, and the secret talks that led to iTunes, to the current collapse of the industry as CD sales plummet, Knopper takes us inside the boardrooms, recording studios, private estates, garage computer labs, company jets, corporate infighting, and secret deals of the big names and behind-the-scenes players who made it all happen. With unforgettable portraits of the music world's

mighty and formerly mighty; detailed accounts of both brilliant and stupid ideas brought to fruition or left on the cutting-room floor; the dish on backroom schemes, negotiations, and brawls; and several previously unreported stories, Appetite for Self-Destruction is a riveting, informative, and highly entertaining read. It offers a broad perspective on the current state of Big Music, how it got into these dire straits, and where it's going from here -- and a cautionary tale for the digital age.

Handsome, famous, and talented, Goodyear is nonetheless coming apart at the seams. And the coaches, writers, wives, girlfriends, petty criminals, and diehard fans following his every move are eager to find out why—as they hide secrets of their own. Humming with the energy of a ballpark before the first pitch, Emily Nemens' *The Cactus League* unravels the

tightly connected web of people behind a seemingly linear game. Narrated by a sportscaster, Goodyear's story is interspersed with tales of Michael Taylor, a batting coach trying to stay relevant; Tamara Rowland, a resourceful spring-training paramour, looking for one last catch; Herb Allison, a legendary sports agent grappling with his decline; and a plethora of other richly drawn characters, all striving to be seen as the season approaches. It's a journey that, like the Arizona desert, brims with both possibility and destruction. Anchored by an expert knowledge of baseball's inner workings, Emily Nemens's *The Cactus League* is a propulsive and deeply human debut that captures a strange desert world that is both exciting and unforgiving, where the most crucial games are the ones played off the field.

Despite an often unfair reputation as being less popular, less successful, or less refined than their bona-fide Broadway counterparts, Off Broadway musicals deserve their share of critical acclaim and study. A number of shows originally staged Off Broadway have gone on to their own successful Broadway runs, from the ever-popular A Chorus Line and Rent to more off-beat productions like Avenue Q and Little Shop of Horrors. And while it remains to be seen if other popular Off Broadway shows like Stomp, Blue Man Group, and Altar Boyz will make it to the larger Broadway theaters, their Off Broadway runs have been enormously successful in their own right. This book discusses more than 1,800 Off Broadway, Off Off Broadway, showcase, and workshop musical productions. It includes detailed descriptions of Off Broadway musicals that closed in previews or in rehearsal, selected musicals that opened in Brooklyn and in New Jersey, and American operas that opened in New York, along with general overviews of Off Broadway institutions such as the Light Opera of Manhattan. The typical entry includes the name of the host theater or theaters; the opening date and number of performances; the production's cast and creative team; a list of songs; a brief plot synopsis; and general comments and reviews from the New York critics. Besides the individual entries, the book also includes a preface, a bibliography, and 21 appendices including a discography, filmography, a list of published scripts, and

lists of musicals categorized by topic and composer.
