Scandal at Bizarre

Kick snow from your shoes and step into the warmth of the old Hoosier high school basketball gym, where farmers in overalls line the court and students heckle referees from planks above the bleachers. Revisit a unique era when nearly every town had a high school and its own basketball team. The gyms featured here no longer host high school games, but once they were home to the Ladoga Canners, the Mecca Arabs, the Roll Red Rollers, the Arlington Purple Breezes, the Warren Lightning Five and dozens more. Now they are elementary schools, community centers, fire stations, churches. Some are homes. Sadly, others are wasting away. But once again, the ball thuds in these gyms. The screams reverberate. The whistles blow. Join the Indianapolis Star's Kyle Neddenriep on this tour of one hundred former Hoosier high school basketball gyms.

Generating Power at High Efficiency

In Sin City, a little girl suffers from a strange and terrible malady. If she dies, the Light will die along with her. Warrior, avenger, Joanna Archer has survived countless otherworldly terrors—and has found her rightful place among the agents battling the all-pervasive evil of Shadow . . . even as she struggles against the darkness within herself. A war is raging for Las Vegas—a city without a heart—one that catapults Joanna into a new world hidden from mortal sight. In this lethally seductive alternate dimension the lines blur between good and evil, love and hate, and here lies the last hope for the Light. But Joanna's price of admission is a piece of her own soul—and the odds of her escaping are slim . . . to none.

Becoming a Dad

While some writers account for Japan's postwar economic "miracle" in terms of a distinctively Japanese, traditional model of social organization, the writers of this study consider Japan's technological growth to have been accompanied by convergence toward modernized social organization. The authors test both of these theoretical models. Their data are derived from a nine-month period of observation, analysis of company records, interviews of personnel, and questionnaire responses from production, staff, and managerial employees in three main Japanese firms. Other firms were visited more briefly. The analysis shows that the most distinctively Japanese variables have less causal impact on performance within a firm than do more universal variables such as employee status, sex, and job satisfaction. The authors test both of these theoretical models. Their data are derived from a nine-month period of observation, analysis of company records, interviews of personnel, and questionnaire responses from production, staff, and managerial employees in three main Japanese firms. Other firms were visited more briefly. The analysis shows that the most distinctively Japanese variables have less causal impact on performance within a firm than do more universal variables such as employee status, sex, and job satisfaction. Originally published in 1976. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Little Book of Tractors

Since the dawn of civilization, the vampire has danced through the dreams and nightmares of every culture, expressed in folklore, literature, and art. Today, this fascination resonates in pop-culture through hit television shows, movies, and bestselling books. In *Vampyre Magick*, Father Sebastiaan reveals the hidden rituals and spells of the Living Vampires. This companion volume to Sebastiaan's *Vampyre Sanguinomicon*, is intended for initiates of the Stigoi Vii, but will appeal to any scholar of magickal arts, *The Golden Dawn*, or other Western Mystery Traditions.

Testing of Power Transformers

Bestselling author Stephen R. Lawhead's *Song of Albion Trilogy* now available in one volume! The *Paradise War* Lewis Gillies is an American graduate student in Oxford who should be getting on with his life. Yet for some reason, he finds himself speeding north with his roommate Simon on a larkùhalf-heartedly searching for a long-extinct creature allegedly spotted in a misty glen in Scotland. Expecting little more than a weekend diversion, Lewis accidently crosses through a mystical

gateway where two worlds meet: into the time-between-times, as the ancient Celts called it. And into the heart of a collision between good and evil that's been raging since long before Lewis was born. The Silver Hand The great king is dead and his kingdom lies in ruins. Treachery and brutality rule the land, and Albion is the scene of an epic struggle for the throne. Lewis is now known as Llew in this Otherworld and has become a threat to the usurper Meldron. Exiled and driven from the clan, he must seek the meaning behind a mysterious prophecy—the making of a true king and the revealing of a long-awaited champion: Silver Hand. The Endless Knot Fires rage in Albion: strange, hidden, dark-flamed, invisible to the eye. In the midst of it, Llew must journey to the Foul Land to redeem his greatest treasure. As the last battle begins, the myths, passions, and heroism of an ancient people come to life . . . and Llew Silver Hand will face a challenge that will test his very soul.

Trumpet Voluntary Level 6

The #1 New York Times bestselling author and firebrand syndicated columnist Michelle Malkin sets her sights on the corrupt businessmen, politicians, and lobbyists flooding our borders and selling out America's best and brightest workers. In *Sold Out*, Michelle Malkin and John Miano name names and expose the lies of those who pretend to champion the middle class, while aiding and abetting massive layoffs of highly skilled American workers in favor of cheap foreign labor. Malkin and Miano will explode some of the most commonly told myths spread in the media like these: Lie #1: America is suffering from an apocalyptic "shortage" of science, technology, engineering, and math workers. Lie #2: US companies cannot function without an unlimited injection of the "highly skilled" and "highly educated" foreign workers, who offer capital and energy that American workers can't match. Lie #3: America's best and brightest talents are protected because employers are required to demonstrate that they've made every effort to hire American citizens before resorting to foreign labor. For too long, open-borders tech billionaires and their political enablers have escaped tough public scrutiny of their means and motives. It's time to trade the whitewash for solvent. American workers deserve better and the public deserves the unvarnished truth.

High Voltage Engineering

"Changing Trains - a Global Review" by Paul Haywood. Railways are always changing and "Changing Trains" gives a truly "Global Review". The author has always tried to use rail as his preferred mode of travel for work and leisure whenever possible and these are scenes taken by him before, during or after a scheduled train journey over a forty-year period from 1973. This all-colour pictorial features more than two hundred photographs of trains and railways in no fewer than forty-three countries presented alphabetically - from Australia to the USA by way of such diverse countries as Burma, Croatia, Mexico and Taiwan. Each photograph in this 104-page book has an interesting and informative caption which will appeal not

only to hardened rail enthusiasts but also to those who simply like travelling by train and wish to know more about railways beyond their own shores.

The Crusades

Award-winning original fiction for learners of English. At seven levels, from Starter to Advanced, this impressive selection of carefully graded readers offers exciting reading for every student's capabilities. A musician disappears, leaving only a strange e-mail message. Her husband, in a desperate search to find her, revisits their shared past and has to face up to some unpleasant realities, before trying to rebuild his life. His journey of discovery takes us across the world to Poland and Rio and deep into the human heart. Paperback-only version. Also available with Audio CDs including complete text recordings from the book.

Too Small to Fail

This book examines the practice of strategic business planning, including its functions, methods, tools, and the way in which they are employed. It does so in a practical way through case studies, which help in demonstrating how to innovate in order to overcome obstacles and cover new and evolving challenges. The book is divided into six parts : • part 1 focuses on the strategic plan, as master plan of the enterprise • part 2 covers the management functions whose able execution makes the difference between success and failure: forecasting, planning, organizing, staffing, directing, and controlling • part 3 demonstrates that modern accounting rules, promoted by IFRS and US GAAP, not only assist in strategic financial planning but also provide a solid basis for management supervision and control • part 4 brings your attention the fact that costs matter. Strategic business plans that pay little or no attention to cost factors are doomed • part 5 addresses the issues associated with strategic products and markets. These range from research and development to market research, product planning, the able management of marketing functions, and sales effectiveness • part 6 concludes the book with an emphasis on mergers, acquisitions, and consolidations and the risks associated with an M&A policy Chief executives, operating officers, treasurers, financial officers, budget directors, accountants, auditors, product planners, marketing directors, and management accounting specialists will find this book of practical examples helpful to their decisions and to their work. * Shows the factors to consider when planning how to take your company to the next level, from identifying and making strategic choices to capital allocation and financial planning. All from a professional accountant's perspective and in their language * Full of case studies to help you relate your ideas to what other major companies have done before, including IBM, Delta Airlines, and Bloomberg - so you can learn from their success or failure * Shows why strategic cost control is good governance, why and how to account for the cost of risk and how IFRS relates to strategic accounting principles

The Handbook of Lithium-Ion Battery Pack Design

A collection of copyright-free images relating to humour, wit and fantasy.

Mechanical and Metal Trades Handbook

High Voltage Engineering Has Been Written For The Undergraduate Students In Electrical Engineering Of Indian And Foreign Universities As Well As The Practising Engineers. It Deals In Mechanism Of Breakdown Of Insulating Materials, Generation And Measurement Of High A.C., D.C., Impulse Voltages And Currents. High Voltage Testing Of Some Of The Electrical Equipments E.G. Insulators, Cables, Transformers As Per Standard Specifications Has Been Explained. Various Methods Of Non Destructive Testing Which Yield Information Regarding Life Expectancy And The Long Term Stability Or Otherwise Of The Insulating Materials Have Been Discussed. The Book Takes A View Of Various Types Of Transients In Power System And Suggests Classical And More Modern Statistical Methods Of Co-Ordinating The Insulation Requirements Of The System. A Suitable Number Of Problems Have Been Solved To Help Understand The Theory. At The End, A Large Number Of Multiple Choice Questions Have Been Added To Help The Students To Test Themselves. A Few Photoplates Have Been Added At Suitable Locations In The Book To Give A Physical Feel Of Various Equipments In A Well Equipped High Voltage Laboratory.

Chemistry International

Jennifer Niven quit her job as a television producer to write the true story of a doomed 1913 Arctic expedition in her first book, *The Ice Master*, which was named one of the top ten nonfiction books by *Entertainment Weekly*, and won the Barnes & Noble Discover Award. She received high praise for her follow-up arctic adventure, *Ada Blackjack*, which detailed the life of one woman who overcame enormous odds to survive. Now, Niven tells a survival tale of a different kind; her own thrilling, excruciating, amazing, and utterly unforgettable adventure in a midwestern high school during the 1980s. Richmond, Indiana, was a place where people knew their neighbors and went to church on Sundays. It also had only one high school with 2,500 students, and for both the students and the townspeople, it was the center of the universe. In *The Aqua-Net Diaries*, Niven takes readers through her adolescent years in full, glorious—and hilarious—detail, sharing awkward moments from the first day of school, to driver's ed, and her first love, against a backdrop of bad 1980s fashion and big hair. Like Chuck Klosterman in *Fargo Rock City*, Niven's talented voice perfectly captures the pain, joy, and shame of going through adolescence in America's heartland, making a funny, touching, and universal experience.

The Paradise War

Revised, and with a New Introduction by the Author "I am an agitator, and an agitator is the center post in a washing machine that gets the dirt out." --Jim Hightower Hightower is mad as hell and he's not going to take it anymore! He's also funny as hell, and in this book he focuses his sharp Texas wit, populist passion, and native smarts on America's political, economic, scientific, and media establishments. In *There's Nothing in the Middle of the Road But Yellow Stripes and Dead Armadillos*, Hightower shows not only what's wrong, but also how to fix it, offering specific solutions and calling for a new political movement of working families and the poor to "take America back from the bankers and bosses, the big shots and bastards." "If you don't read another book about what's wrong with this country for the rest of your life, read this one. I think it's the best and most important book about our public life I've read in years." --Molly Ivins, author of *Molly Ivins Can't Say That, Can She?* "When do we get to vote for Jim Hightower for president? Will somebody please tell me? When do we get to vote for Jim Hightower for president?." --Michael Moore, author of *Downsize This!* "Listen to Jim Hightower. His is a two-fisted, rambunctious voice unafraid to speak truth to power, eloquently and clearly. He's one of the best." --Studs Terkel

The Peter F. Drucker Reader

The old world order is changing rapidly and leading global powers are witnessing a decline in their influence. Across the globe, small countries are driving a quiet revolution and redefining what it means to be a great nation. How are they achieving better educated, more egalitarian, happier and wealthier societies? What is the recipe for success? *Too Small to Fail* looks at eight small countries with leading policies, individuals, corporations and institutions that have been able to tackle problems that impact us all: climate change, the gender gap, ageing populations. By studying the parallels between these outperforming nations, *Too Small to Fail* offers valuable insight on how the rest of the world can emulate them and achieve positive change. The first conclusion is clear: small nations have big lessons to teach.

Electronic and Mobile Commerce Law

Want to reach consumers in innovative ways? *Guerilla Marketing For Dummies* is packed with guerilla tactics and trade secrets for marketing your products or services like never before. From re-imagining existing marketing platforms to mastering trailblazing methods, you'll create a cost-effective game plan for getting your customers' attention and keeping it! This savvy, hands-on guide explains what guerilla marketing is, who does it, and why. You'll learn how it can take your brand to new heights as you start thinking like a guerilla, brainstorming, collaborating, and refining ideas for an exciting, non-traditional marketing program. The real fun starts when you build a winning team and take your message to the streets, executing attention-grabbing publicity stunts and creating unforgettable events. You'll find out when it pays to work with the big-gun guerilla-marketing firms and how to launch your own low-cost campaign. Discover how to: Reach customers wherever they are Develop a cohesive guerilla-marketing campaign Capitalize on the hottest trends Cut through

the constant marketing clutter Make products and brands stand out Use buzz, viral, grassroots, and experiential marketing Write a great press release Create opportunities for partnership and tie-ins Find budget-friendly ways to go guerilla Build a powerful online presence Work with existing contacts, publicists, and the press You can enter the guerilla jungle and emerge with the lion's share of the sales! Let Guerilla Marketing For Dummies show you how.

Strategic Business Planning for Accountants

The Handbook of Lithium-Ion Battery Pack Design: Chemistry, Components, Types and Terminology offers to the reader a clear and concise explanation of how Li-ion batteries are designed from the perspective of a manager, sales person, product manager or entry level engineer who is not already an expert in Li-ion battery design. It will offer a layman's explanation of the history of vehicle electrification, what the various terminology means, and how to do some simple calculations that can be used in determining basic battery sizing, capacity, voltage and energy. By the end of this book the reader has a solid understanding of all of the terminology around Li-ion batteries and is able to do some simple battery calculations. The book is immensely useful to beginning and experienced engineer alike who are moving into the battery field. Li-ion batteries are one of the most unique systems in automobiles today in that they combine multiple engineering disciplines, yet most engineering programs focus on only a single engineering field. This book provides you with a reference to the history, terminology and design criteria needed to understand the Li-ion battery and to successfully lay out a new battery concept. Whether you are an electrical engineer, a mechanical engineer or a chemist this book helps you better appreciate the inter-relationships between the various battery engineering fields that are required to understand the battery as an Energy Storage System. Offers an easy explanation of battery terminology and enables better understanding of batteries, their components and the market place. Demonstrates simple battery scaling calculations in an easy to understand description of the formulas Describes clearly the various components of a Li-ion battery and their importance Explains the differences between various Li-ion cell types and chemistries and enables the determination which chemistry and cell type is appropriate for which application Outlines the differences between battery types, e.g., power vs energy battery Presents graphically different vehicle configurations: BEV, PHEV, HEV Includes brief history of vehicle electrification and its future

The Concept of Miracle

The Better World Shopping Guide, 7th Edition , rates hundreds of products and services from A to F so you can quickly tell the "good guys" from the "bad guys." Drawing on decades of meticulous research, and with a greater emphasis on climate impacts, this updated seventh edition shows who actually "walks the talk".

Christopher and his companions manage to escape from Fairy Land only to land in Olympus, the section of Everworld where the ancient Greek gods live, which is about to become the latest target of the insect-like forces of Ka Anor, the god who consumes othe

CCIE Routing and Switching Exam Certification Guide

Complete Curriculum

Combined cycle technology is used to generate power at one of the highest levels of efficiency of conventional power plants. It does this through primary generation from a gas turbine coupled with secondary generation from a steam turbine powered by primary exhaust heat. Generating power at high efficiency thoroughly charts the development and implementation of this technology in power plants and looks to the future of the technology, noting the advantages of the most important technical features – including gas turbines, steam generator, combined heat and power and integrated gasification combined cycle (IGCC) – with their latest applications. Reviews key developments in combined cycle technology Uses examples drawn from plants around the world Looks at how combined cycle technology can evolve to meet future energy needs

Modernization and the Japanese Factory

A contemplation on “the durability of our fast-tracked, multitasked modern world . . . a stimulating cautionary report for the digital age.”—Kirkus Reviews We live in an ever-accelerating world: faster computers, markets, food, fashion, product cycles, minds, bodies, kids, lives. When did everything start moving so fast? Why does speed seem so inevitable? Is faster always better? Drawing together developments in religion, philosophy, art, technology, fashion, and finance, Mark C. Taylor presents an original and rich account of a great paradox of our times: how the very forces and technologies that were supposed to free us by saving time and labor now trap us in a race we can never win. The faster we go, the less time we have, and the more we try to catch up, the farther behind we fall. Connecting our speed-obsession with today’s global capitalism, he composes a grand narrative showing how commitments to economic growth and extreme competition, combined with accelerating technological innovation, have brought us close to disaster. Psychologically, environmentally, economically, and culturally, speed is taking a profound toll on our lives. By showing how the phenomenon of speed has emerged, Taylor offers us a chance to see our pace of life as the product of specific ideas, practices, and policies. It’s not inevitable or irreversible. He courageously and movingly invites us to imagine how we might patiently work towards a more deliberative life and sustainable world. “With panache and flashes of brilliance, Taylor, a Columbia University religion

professor and cultural critic, offers a philosophically astute analysis of how time works in our era.” —Publishers Weekly

There's Nothing in the Middle of the Road but Yellow Stripes and Dead Armadillos

The best of Peter F. Drucker's articles on management, all in one place. That "management" exists as a concept, a practice, and a profession is largely due to the thinking of Peter F. Drucker. For nearly half a century, he inspired and educated managers—and powerfully shaped the nature of business—with his iconic articles in Harvard Business Review. Through the lens of Drucker's broad vision, this volume presents an opportunity to trace the great shifts in organizations in the late twentieth and early twenty-first centuries—from manufacturing to knowledge work, from career-length employee tenures to short-term contract relationships, from command-and-control structures to flatter organizations that call for new leadership techniques. These articles also offer a firm and practical grasp of the role of the manager and the executive today—their responsibilities, their relationships, their decisions, and detailed processes that can make their work more effective. A celebrated thinker at his best, in this volume Drucker paints a clear and comprehensive picture of management thinking and practice—both as it is and as it will be. This collection of articles includes: "What Makes an Effective Executive," "The Theory of the Business," "Managing for Business Effectiveness," "The Effective Decision," "How to Make People Decisions,"

“They’re Not Employees, They’re People,” “The New Productivity Challenge,” “What Business Can Learn from Nonprofits,” “The New Society of Organizations,” and “Managing Oneself.”

Humor, Wit, & Fantasy

Experience the dazzling brilliance of a world like ours—yet infinitely bolder and brighter: a place of kings and warriors, bards and battles, feats of glory and honour. It is a place you will forever wish to be. It is Albion. "When I opened my eyes, I was no longer in the world I knew." Lewis Gillies is an American graduate student in Oxford who should be getting on with his life. Yet for some reason, he finds himself speeding north with his roommate Simon on a lark—half-heartedly searching for a long-extinct creature allegedly spotted in a misty glen in Scotland. Expecting little more than a weekend diversion, Lewis accidentally crosses through a mystical gateway where two worlds meet: into the time-between-times, as the ancient Celts called it. And into the heart of a collision between good and evil that's been raging since long before Lewis was born. Guy Livingstone

Chemistry International is a four-chapter news magazine of the International Union of Pure and Applied Chemistry (IUPAC). Chapters 1 and 2 contain the membership lists and alphabetical index of IUPAC bodies 1983-1985. Chapter 3 lists all official programs of the Union in operation in its special Committees and in Commissions of the Physical Chemistry, Inorganic Chemistry, Organic Chemistry, Macromolecular, Analytical Chemistry, Applied Chemistry, and Clinical Chemistry Divisions. The last chapter presents the minutes of the 32nd Council Meeting.

Methods for Monitoring and Diagnosing the Efficiency of Catalytic Converters

Since the publication of the first edition of The Crusades: A Reader, interest in the Crusades has increased dramatically, fueled in part by current global interactions between the Muslim world and Western nations. The second edition features an intriguing new chapter on perceptions of the Crusades in the modern period, from David Hume and William Wordsworth to World War I political cartoons and crusading rhetoric circulating after 9/11. Islamic accounts of the treatment of prisoners have been added, as well as sources detailing the homecoming of those who had ventured to the Holy Land—including a newly translated reading on a woman crusader, Margaret of Beverly. The book contains sixteen images, study questions for

each reading, and an index.

Sold Out

In the early 1790s Richard Randolph was accused of fathering a child by his sister-in-law, Nancy, and murdering the baby shortly after its birth. Rumors about the incident, which occurred during a visit to the plantation of close family friends, spread like wildfire. Randolph found himself on trial for the crime largely because of the public outrage fueled by these rumors. The rest of the household suffered too, and only Nancy, who later married the esteemed New York statesman Gouverneur Morris, would find any degree of happiness. A tale of family passion, betrayal, and deception, *Scandal at Bizarre* is a fascinating historical portrait of the social and political realities of a world long vanished.

Changing Trains

The rapid, commercially-driven evolution of the Internet has raised concomitant legal concerns that have required responses from both national and international law. This unique text offers a complete analysis of electronic and mobile commerce, exploring the law relating to online contracts and payment systems, electronic marketing, and various forms of cybercrime as well as the regulation of electronic communications networks and services. Written by specialists, this account also provides insights into emerging areas such as internet libel, online gambling, virtual property, cloud computing, smart cards, electronic cash, and the growing use of mobile phones to perform tasks previously carried out by computers.

Wind from the Carolinas

Every leader functions on two stages--the front stage or public world, and the back stage or private world. One cannot lead successfully front stage when one is completely depleted back stage. In a time when pastors are leaving the ministry in record numbers due to cynicism, disillusionment, weariness, and personal scandals, there is an urgent need for soul care in the private lives of leaders. Replenish helps leaders focus on the back stage, the interior life, in order to remain spiritually healthy. In a caring, encouraging tone, it will show pastors how to prioritize matters of the soul develop healthy spiritual practices address problems that lead to burnout create a healthy rhythm in their lives improve their people skills and the spiritual climate of their team develop better systems in their churches discover how to lead an unhurried life For the many ministry leaders who feel alone, in over their heads, or simply worn out, this book will offer welcome relief and a healthy way forward.

Vampyre Magick

The dramatic evolution of catalytic converters in the last thirty years was a result of a need worldwide to reduce pollution created by the exhaust gases of internal combustion engines. Environmental concerns have led American, Japanese and European Union (EU) legislation to pose continuously stricter emission limits for petrol engines in the last decades. The catalytic converter has become the most important means of exhaust treatment to achieve the desired emission limits. The

international legislation has also created a need for a regular assessment of the efficiency of the catalytic converter in order to detect a deterioration of its conversion efficiency as soon as this deterioration takes place. The assessment of conversion efficiency of a catalytic converter can take place during normal driving of a vehicle (on-board diagnosis or OBD) or in a workshop by specialized technicians. The most important methods nowadays are the OBD methods. The evolution of methods concerned with OBD and non-OBD monitoring and diagnosing of efficiency of catalytic converters of internal combustion engines is described based on patents and published patent applications. Non-patent references are also used. The basic principles of modern catalytic converters are described in an extensive Introduction, where the importance of monitoring and diagnosing the efficiency of catalytic converters is demonstrated. The book is divided into four parts. The first part describes methods involving the use of oxygen or air/fuel exhaust gas sensors to determine the oxygen storage capacity of a catalytic converter. The second part describes methods involving the use of temperature sensors to determine the exothermic reaction capacity of a catalytic converter. The third part describes all other methods existing in patent literature that monitor and diagnose the efficiency of catalytic converters. The great majority of the methods of the third part involves exhaust gas concentration measurements. The fourth part comprises a general discussion of all methods described. In the beginning of each part, a short introduction is given to explain the problem that the methods attempt to solve. The methods in each part are presented in chronological order per patent applicant. This helps to evaluate how the patent applicant has improved his methods over time. A patent number index with information about the patent applicants, inventors, priorities and patent-families, an inventor index, a company index and a subject index can be found at the end of the book.

Replenish

The award-winning author of *Sam Houston: A Life* chronicles the pursuits of *Call of the Wild* author Jack London, exploring the lesser-known man, a hard-living globetrotter and a man alive with ideas who had an undying passion for social justice.

The Aqua Net Diaries

Little Book of Tractors is a celebration of the pioneers and innovators whose names have become synonymous with tractors - Henry Ford and his "Fordson", Harry Ferguson and the "Little Grey Fergie", John Deere, Farmall and David Brown to name just a few. This colorful book charts the history of these companies and their incredibly inventive machines as well as showing how takeovers and mergers have resulted in the loss of the majority of these historic names. *Little Book of Tractors* also takes a look at unusual tractor designs and specialist tractors, tractor trials, farming implements, and what future challenges face manufacturers as they work to make their tractors more cost efficient and less polluting than ever before. Most of all, this affectionate tribute shows how tractors have not only been indispensable to farmers but become part of the

fabric of country life, dearly loved by the people.
