Key Benefit: Fred and Theresa Holtzclaw bring over 40 years of AP Biology teaching experience to this student manual. Drawing on their rich experience as readers and faculty consultants to the College Board and their participation on the AP Test Development Committee, the Holtzclaws have designed their resource to help your students prepare for the AP Exam. * Completely revised to match the new 8th edition of Biology by Campbell and Reece. * New Must Know sections in each chapter focus student attention on major concepts. * Study tips, information organization ideas and misconception warnings are interwoven throughout. * New section reviewing the 12 required AP labs. * Sample practice exams. * The secret to success on the AP Biology exam is to understand what you must know—and these experienced AP teachers will guide your students toward top scores! Market Description: Intended for those interested in AP Biology.

Biology 2e

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is

designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The Living World is often considered a student favorite. George Johnson has written this non-majors textbook from the ground up to be an engaging and accessible learning tool with an emphasis on "how things work and why things happen the way they do". The Living World focuses on concepts rather than terminology and technical information, and features a straightforward, clear writing style and a wide variety of media assets to enhance the content of the textbook. The integration of text and the digital world is now complete with McGraw-Hill's ConnectPlus, LearnSmart, and SmartBook. Users who purchase ConnectPlus receive access to the full online ebook version of the textbook.

Reading Essentials for Biology

Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.

Principles of Economics, 3rd Edition, by Jeff Holt is a clear, concise, and economical alternative to the typical textbook. This text includes a built-in study guide that enables students to reinforce concepts and better comprehend the material. The book is spiral bound which allows it to lay flat when open, making it easier for students to work the problems in the study guide. Supplemental materials available for adopting instructors include an Instructor's Manual, Test Bank, and Power Point slides--all prepared by the author. This text is in use at the following Colleges and Universities: American International College Austin Peay State University Black Hills State University Cazenovia College Colorado State University - Pueblo Davidson County Community College Eastern Maine Community College El Camino College Elizabethtown Community College Florence Darlington Technical College Geneva College Georgia Highlands College Georgia Southern University Goldey-Beacom College Idaho State University Johnson State College Malvern Preparatory School Mesa Community College Mesabi Range Technical and Community College Millersville University Nicolet Area Technical College Otero Junior College Palm Beach Atlantic University Penn State Worthington Scranton Providence College Sierra College Southern Polytechnic State University Southwestern Oregon Community College Spokane Community College St. Gregory's University SUNY - Cortland Thomas University Trinity College Tulsa Community College University of Arkansas Community College at Hope University of Cincinnati University of Hartford University of Massachusetts Dartmouth University of Montana - Western Utah Valley State College Valdosta Technical College Western Dakota Technical Institute

The Living World

Jolene's family was just Momma and Grandpa until big, loud Leroy Redfield started taking Momma dancing. Jolene refuses to call him anything but "Mister." Without a name, he isn't a real person to her. But then Jolene learns that Mister wants to marry Momma. Is there anything Jolene can do to make him go away? "The warmth and love in the Johnson household envelops the novel Jolene's willingness to face the uncertainties of her future may well give courage to readers confronting sea changes of their own."-Publishers Weekly Awards: (New York Public Library "100 Titles for Reading and Sharing" (A Texas Bluebonnet Master List Book

Biology 2e (2nd edition) is designed to cover the scope and sequence requirements of a typical two-semester biology course for science majors. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology includes rich features that engage students in scientific inquiry, highlight careers in the biological sciences, and offer everyday applications. The book also includes various types of practice and homework questions that help students understand -- and apply -- key concepts. The 2nd edition has been revised to incorporate clearer, more current, and more dynamic explanations, while maintaining the same organization as the first edition. Art and illustrations have been substantially improved, and the textbook features additional assessments and related resources.
