### **The Tipping Point**

This is a step-by-step guide to writing a short persuasive argument. The book is directed towards students and business people who have trouble putting their arguments into a structured, coherent format. The technique it presents is also a useful way for experienced writers to turn out a brief persuasive argument under time pressure. After a very quick review of some basic principles of writing, the reader will learn how to write a topic sentence. She will then learn a simple way to write sentences that support the topic sentence. Next she will learn - cookbook style - how to put topic and supporting sentences together to form a paragraph and how to organize paragraphs into an argument. Finally, she will consider whether and how she might want to deal with arguments that the other side might make to try to undermine hers. Unfortunately, knowing how to write a short persuasive argument is almost a lost art these days. This brief guide is an easy

way to pick up this important skill.

### **Church Dogmatics**

“A flawless compendium of flaws.” —Alice Roberts, PhD, anatomist, writer, and presenter of *The Incredible Human Journey* The antidote to fuzzy thinking, with furry animals! Have you read (or stumbled into) one too many irrational online debates? Ali Almosawi certainly had, so he wrote *An Illustrated Book of Bad Arguments!* This handy guide is here to bring the internet age a much-needed dose of old-school logic (really old-school, a la Aristotle). Here are cogent explanations of the straw man fallacy, the slippery slope argument, the ad hominem attack, and other common attempts at reasoning that actually fall short—plus a beautifully

drawn menagerie of animals who (adorably) commit every logical faux pas. Rabbit thinks a strange light in the sky must be a UFO because no one can prove otherwise (the appeal to ignorance). And Lion doesn't believe that gas emissions harm the planet because, if that were true, he wouldn't like the result (the argument from consequences). Once you learn to recognize these abuses of reason, they start to crop up everywhere from congressional debate to YouTube comments—which makes this geek-chic book a must for anyone in the habit of holding opinions.

## **A Visit from the Goon Squad**

Timeless techniques of effective public speaking from ancient Rome's greatest orator All of us are faced countless times with the challenge of persuading others, whether we're trying to win a trivial argument with a friend or convince our coworkers about an important decision. Instead of relying on untrained instinct—and often floundering or failing as a result—we'd win more arguments if we learned the timeless art of verbal persuasion, rhetoric. How to Win an Argument gathers the rhetorical wisdom of Cicero, ancient Rome's greatest orator, from across his works and combines it with passages from his legal and political speeches to show his powerful techniques in action. The result is an enlightening and entertaining practical introduction to the secrets of persuasive speaking and writing—including strategies that are just as effective in today's offices, schools, courts, and political debates as they were in the Roman forum. How to Win an Argument addresses proof based on rational argumentation, character, and emotion; the parts of a speech; the plain, middle, and grand styles; how to persuade no matter what audience or circumstances you face; and more. Cicero's words are presented in lively translations, with illuminating introductions; the book also features a brief biography of Cicero, a glossary, suggestions for further reading, and an appendix of the original Latin texts. Astonishingly relevant, this unique anthology of Cicero's rhetorical and oratorical wisdom will be enjoyed by anyone who ever needs to win arguments and influence people—in other words, all

of us.

### **How To Win Friends and Influence People**

In order for students to write effective arguments, they need to read good arguments. In this practical book, you'll find out how to use mentor texts to make writing instruction more meaningful, authentic, and successful. Author Sean Roday demonstrates how you can teach middle school students to analyze the qualities of effective arguments and then help them think of those qualities as tools to improve their own writing. You'll learn how to: Introduce high-interest topics to students to get them interested and engaged in argument writing. Teach students to look at multiple sides of an issue and critically evaluate evidence to construct informed, defensible arguments. Use mentor texts to help students learn the core concepts of argument writing and apply those skills across the curriculum. The book is filled with examples and templates you can bring back to the classroom immediately, as well as an annotated bibliography which links the concepts in this book to the corresponding Common Core State Standards. ### **Teaching Students to Write**

'For the sake of argument, one must never let a euphemism or a false consolation pass uncontested. The truth seldom lies, but when it does lie it lies somewhere in

between.'. The global turmoil of the last few years has severely tested every analyst and commentator. Few have written with such insight as Christopher Hitchens about the large events - or with such discernment and with about the small tell-tale signs of a disordered culture. For the Sake of Argument ranges from the political squalor of Washington, as a beleaguered Bush administration seeks desperately to stave off disaster and Clinton prepares for power, to the twilight of Stalinism in Prague; from the Jewish quarter of Damascus in the aftermath of the Gulf War to the embattled barrios of Central America and the imperishable resistance of Saralevo, as a difficult peace is negotiated with ruthless foes. Hitchens' unsparing account of Western realpolitik in the end shows it to rest on delusion as well as deception. The reader will find in these pages outstanding essays on political assassination in America as well as a scathing review of the evisceration of politics by pollsters and spin-doctors. Hitchens' knowledge of the tortuous history of revolutions in the twentieth century helps him to explain both the New York intelligentsia's flirtation with Trotskyism and the frailty of Communist power structures in Eastern Europe. Hitchens' pointed reassessments of Graham Greene, P.G. Wodehouse and C.L.R. James, or his riotous celebration of drinkiness and smoking, display an engaging enthusiasm and an acerbic wit. Equally entertaining is his unsparing rogues' gallery, which gives us unforgettable portraits of the lugubrious 'Dr' Kissinger, the comprehensively reactionary 'Mother' Teresa, the preposterous Paul Johnson and the predictable P.J. O'Rourke.

## **How to Win an Argument**

Alex just has to convince his mom to let him have an iguana, so he puts his arguments in writing. He promises that she won't have to feed it or clean its cage or even see it if she doesn't want to. Of course Mom imagines life with a six-foot-long iguana eating them out of house and home. Alex's reassurances: It takes fifteen years for an iguana to get that big. I'll be married by then and probably living in my own house. and his mom's replies: How are you going to get a girl to marry you when you own a giant reptile? will have kids in hysterics as the negotiations go back and forth through notes. And the lively, imaginative illustrations show their polar opposite dreams of life with an iguana.

## **Legal Argument: The Structure and Language of Effective Advocacy**

No matter where students' lives lead after graduation, one of the most essential tools we can teach them is how to comprehend, analyze, and respond to arguments. Students need to know how writers' and speakers' choices are shaped by elements of the rhetorical situation, including audience, occasion, and purpose. In *Teaching Arguments*, Jennifer Fletcher provides teachers with engaging classroom activities, writing prompts, graphic organizers, and student samples to

help students at all levels read, write, listen, speak, and think rhetorically. Jennifer believes that, with appropriate scaffolding and encouragement, all students can learn a rhetorical approach to argument and gain access to rigorous academic content. Teaching Arguments opens the door and helps them pay closer attention to the acts of meaning around them, to notice persuasive strategies that might not be apparent at first glance. When we analyze and develop arguments, we have to consider more than just the printed words on the page. We have to evaluate multiple perspectives; the tension between belief and doubt; the interplay of reason, character, and emotion; the dynamics of occasion, audience, and purpose; and how our own identities shape what we read and write. Rhetoric teaches us how to do these things. Teaching Arguments will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated, persuasive arguments--a major cornerstone for being not just college-and career-ready but ready for the challenges of the world.

### **The Argument Writing Toolkit**

Beyond Argument: Essaying as a Practice of (Ex)Change offers an in-depth examination of how current ways of thinking about the writer-page relation in personal essays can be reconceived according to practices in the "care of the self" -- an ethic by which writers such as Seneca, Montaigne, and Nietzsche lived. This approach promises to revitalize the form and address many of the concerns

expressed by essay scholars and writers regarding the lack of rigorous exploration we see in our students' personal essays -- and sometimes, even, in our own. In pursuing this approach, Sarah Allen presents a version of subjectivity that enables productive debate in the essay, among essays, and beyond.

### **Oxford Guide to Effective Argument and Critical Thinking**

"These books will support teachers in their understanding of designing process-based instruction and give them both useful lesson plans and a process for designing instruction on their own that follows the design principles." -Peter Smagorinsky, Larry Johannessen, Elizabeth Kahn, and Thomas McCann The Dynamics of Writing Instruction series helps middle and high school teachers teach writing using a structured process approach. Teachers may spread these books throughout a multiyear English language arts program, use all six books to constitute a yearlong writing course, or repeat modified sequences from one book at sequential grade levels so students deal with that particular genre at increasing degrees of complexity. Each book in the series includes classroom-tested activities, detailed lesson sequences, and supporting handouts. The instruction is detailed enough to use as a daily plan but general enough that teachers can modify it to accommodate their own curriculum and the specific needs of their students. The instructional activities in each book are tailored to a specific kind of writing: argument, essays that define, comparison/contrast essays, personal narratives,

research reports, and fictional narratives. This six book series will show teachers how to: introduce issues, dilemmas, and scenarios that capture students' interest and invoke the critical and creative thinking necessary to write powerfully and effectively design and orchestrate activities within an interactive and collaborative environment move students through increasingly challenging activities designed to help them become independent writers.

### **The Better Angels of Our Nature**

### **How to Write Better Essays**

What are the moves that an academic writer makes? How does writing as an intellectual change the way we work from sources? In *Rewriting*, a textbook for the undergraduate classroom, Joseph Harris draws the college writing student away from static ideas of thesis, support, and structure, and toward a more mature and dynamic understanding. Harris wants college writers to think of intellectual writing as an adaptive and social activity, and he offers them a clear set of strategies—a

set of moves—for participating in it.

### **Writing Argumentative Essays**

### **MLA Handbook for Writers of Research Papers**

In *The Art of Rhetoric*, Aristotle demonstrates the purpose of rhetoric—the ability to convince people using your skill as a speaker rather than the validity or logic of your arguments—and outlines its many forms and techniques. Defining important philosophical terms like ethos, pathos, and logos, Aristotle establishes the earliest foundations of modern understanding of rhetoric, while providing insight into its historic role in ancient Greek culture. Aristotle's work, which dates from the fourth century B.C., was written while the author lived in Athens, remains one of the most influential pillars of philosophy and has been studied for centuries by orators, public figures, and politicians alike. ## Rewriting

Legal Argument: The Structure and Language of Effective Advocacy is a full-featured guide designed primarily for law students in research, writing, analysis and trial advocacy classes and moot court programs. Inside you'll find detailed explanations of how lawyers construct legal arguments and practical guidelines to the process of molding the raw materials of litigation - cases, statutes, testimony, documents, common sense - into instruments of persuasive advocacy. You'll also find writing guidelines that show you how to present a well-constructed legal argument in writing in a way that legal decision makers will find persuasive. The centerpiece of this indispensable work is its syllogism-based step-by-step method, designed to walk the advocate through the process of crafting a winning argument. Intuitive organization presents the material in five parts:

- Part I sets out a general methodology for constructing legal arguments.
- Part II focuses more closely on the construction of persuasive, well-grounded legal premises, and covers the effective integration of legal doctrine and evidence into the argument's structure.
- Part III shows how to put the method to work by giving two detailed examples of the construction of complete legal arguments from scratch.
- Part IV provides a detailed protocol for reducing well-constructed legal arguments to written form, along with a concrete illustration of that process. It also provides concrete advice on how to recognize and avoid a host of common mistakes in the written

presentation of legal arguments. • Part V moves from the basics into more advanced techniques of persuasive legal argument, including rhetorical tactics like framing and emphasis, how to respond to arguments, maintaining professionalism in advocacy, and the ethical limits of argument.

Practical exercises throughout each chapter reinforce this broader academic aim with specific writing objectives focused on the key issue of significance - also known as the "So What?" factor. Short, flexible, and affordable, So What? begins by teaching students how to understand their compositions as contributions within the broader context of college, as important practice in academic inquiry and knowledge making. By teaching students how to become apprentice scholars, So What? gives students access authentic academic styles, foundational organizing structures, and helpful rhetorical moves that they can emulate and adapt in their college classes and beyond"--

### **GMAT Analytical Writing**

A large part of our everyday communication involves argumentation and reasoning--for example, when we want to persuade others, make good purchasing decisions, or analyze the messages we receive from advertisers and politicians. But how well do we prepare students for these tasks? Can they critically evaluate a speaker's point of view? Understand rhetorical devices? Apply logic? Build an effective argument, whether written or spoken? In his new book, *Good Thinking*, Erik Palmer shows teachers of all subject matters how to transform the activities they already use into openings for improving student thinking. Building on his previous work in *Well Spoken* (Stenhouse, 2011) and *Digitally Speaking* (Stenhouse, 2014), he reveals how all students, not just those in advanced classes, can begin developing sophisticated reasoning skills that will improve their oral and written communications. Blending theory with practice, Palmer shares a wide range of classroom-tested lessons, including ways to understand argument in paintings and images, address ad hominem attacks using a traveling debate, create a class comedy club, write syllogisms, analyze character and plot development, and teach logic through a class Booger Patrol. He explains complex concepts in simple, practical language that gives teachers a deft understanding of the principles of good arguments, proper use of evidence, persuasive techniques, and rhetorical tricks. "Once you start looking, you'll see arguments everywhere," Palmer writes. "All of them are opportunities to teach good thinking."
