Cardinal Education is an educational consulting and tutoring company based in Palo Alto, CA. Guided by a philosophy of fulfilling students' academic potential in a way that boosts skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy "conventional wisdom," we have a proven track record with a broad range of students: the Ivy League bound to those wishing to avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The "private school imperative" means that despite economic trends, admission to private school is becoming so competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority

of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students taking lower level exams should complete problems 1-10 in each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback: Info@CardinalEducation.com

The race to reach the South Pole for the first time was an unparalleled adventure in the early twentieth century. South, by historian Hunter Stewart, chronicles the competition between two fierce rivals - Robert F. Scott and Roald Amundsen - to secure their place in history as the first man to lead an expedition to the most uninhabitable place on earth. South dramatically tells the story of the quest that is marked by heartbreak, greed, ego, and bravery - not only by Scott and Amundsen but by the courageous crews and financial backers who supported them. The journey to reach the South Pole was truly, as it was later called, "The Heroic Age of Arctic Exploration."

"Autumn 1940 was very unusual. The weather was warm and balmy into November. On Armistice Day thousands of duck hunters took to the marshes on the Mississippi river hoping to bag a few ducks. The morning started out in the 60's but by early afternoon a huge blizzard bore down on the river valley and many of the hunters stayed too long, enjoying the best duck hunting of the fall. For some, what began as a beautiful day on the river turned into a nightmare that cost them their lives" -- from author's web site.

Wild Country A heart-warming tale based on a true story. Some have it all. Hunter Yates truly does. He's humble and kind, even though he has it all. It's his small town roots that keep him grounded. He's a simple man from a small town with a heart of gold. Perfection carved from beauty. As he sets off in the world, it's his humble beginnings that keep his boots planted on the ground. Hunter finds himself amidst a toxic relationship. He struggles to get out of it, but it's his heart that keeps him from letting go. All he ever knew were the ways of Sweetwater Ranch, until the day he left for college. The world is a brutal place and his heart and soul are one and the same with the wild country. A ranch boy, who has everything, but gives everything at the same time. When it's time to decide, does he go with his heart, or the worries of everyone else? Buy Wild Country and discover the beauty in the world. Back Country The gripping conclusion of Hunter and Dave's story. There's only one place that has the power to heal Hunter Yates. Sweetwater Ranch.

His sophomore year of college was nothing less than a wild adventure. He found everything and lost it all in a blink of an eye. With Dave in decent shape for the moment, Hunter travels home for the summer. It's just what he needs. Time to clear his mind. He should feel settled, fulfilled, and at peace now that he's home on the Ranch. But he doesn't. The dull ache in his chest too overwhelming to ignore. The natural high he always experiences while on horseback no longer exists. The grass no longer green in his eyes. The world is just that-the world. His drive and determination have vanished. Teale Wickett destroyed him. The thing is life goes on one meaningless day at a time. Timing has never been on his side and this time there will be no turning back this time. Dave's health declines, leaving Hunter lost. Will his country roots be enough to keep him grounded? "Courage is being scared to death and saddling up anyway." -John Wayne

Keith lived his entire life in the wilds. And after decades of ranching and dozens of hunting trips to remote corners of Alaska and northern Canada, he built a tremendous body of knowledge about guns, game, and life on the trail, which he has generously shared in the pages of this one-of-a-kind book.
