## **Abstract Bulletin**

### **Like Brothers**

These proceedings represent the work of researchers participating in the 10th International Conference on e-Learning (ICEL 2015) which is being hosted this year by the College of the Bahamas, Nassau on the 25-26 June 2015. ICEL is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in the area of e-Learning. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of e-Learning available to them. With an initial submission of 91 abstracts, after the double blind, peer review process there are 41 academic Research papers and 2 PhD papers Research papers published in these Conference Proceedings. These papers come from some many different countries including: Australia, Belgium, Brazil, Canada, China, Germany, Greece, Hong Kong, Malaysia, Portugal, Republic of Macedonia, Romania, Slovakia, South Africa, Sweden, United Arab Emirates, UK and the USA. A selection of the best papers - those agreed by a panel of reviewers and the editor will be published in a conference edition of EJEL (the Electronic Journal of e-Learning [www.ejel.com](http://www.ejel.com)). These will be chosen for their quality of writing and

relevance to the Journal's objective of publishing papers that offer new insights or practical help into the application e-Learning.

## **West Africa**

This book aims to track a typical patient's stay in the intensive care unit and highlight some of the pitfalls that may occur along the way. Each pitfall starts with either the clinical scenario or a related question. It then identifies the Pitfall. This pitfall will be looked at from two perspectives, physiological plausibility and evidence. Some of these observations will be evidence based, some will be physiologically plausible, and others will be experience based. Outcome based EBM in Critical care has come of age in the last 5-10 years. This book extensively cites and interprets large critical care RCTs focusing on those from the last 5-8 years. The authors work in different setups in India and the UK and hope that this will highlight different medical and socio-cultural practices when dealing with critically ill patients. This book covers clinical scenarios and identifies practical lapses that creep into patient management. We hope this book appeals to all personnel who care for patients in ICUs and also for anyone trying to figure out the answers as to how to best improve outcomes for our ICU patients.

## **CIM Bulletin**

This vividly illustrated history of the International Congress of Mathematicians — a meeting of

mathematicians from around the world held roughly every four years — acts as a visual history of the 25 congresses held between 1897 and 2006, as well as a story of changes in the culture of mathematics over the past century. Because the congress is an international meeting, looking at its history allows us a glimpse into the effect of wars and strained relations between nations on the scientific community.

Convergent Journalism: An Introduction is the pioneering textbook on practicing journalism in the 21st century, now in its third edition, offering chapters by industry experts covering key components for today's converged media landscape. Each chapter of this book is written by an expert in the field, offering practical and key skills for the different aspects that make up the practice of journalism today. This new edition, written from the ground up, shifts the discussion toward a model of responsible and audience-centric journalism and demonstrates the ways journalists can use new media tools as both senders and receivers. The bedrock tenets of journalism remain at the core of this book, including information dissemination, storytelling, and audience engagement. This book offers readers:

- A number of pedagogical features to improve learning and retention, including examples, exercises, breakout boxes and more
- Coverage of additional topics such as issues of law and ethics in digital

media, and also writing for mobile platforms and social media • Individual chapters written by subject experts, giving readers the necessary know-how for converged media by proven leaders in the field Students looking for the practical skills and ethical background necessary for producing journalism in the contemporary media landscape will find this book an invaluable resource. It is perfect for students in courses such as Convergent Journalism, Digital Media, Online Journalism, and Multimedia Journalism.

### **Introduction to Clinical Examination**

For nearly 40 years, Oh's Intensive Care Manual has been the quick reference of choice for ICU physicians at all levels of experience. The revised 8th edition maintains this tradition of excellence, providing fast access to practical information needed every day in today's intensive care unit. This bestselling manual covers all aspects of intensive care in sufficient detail for daily practice while keeping you up to date with the latest innovations in the field. Short, to-the-point chapters distill the essential information you need to know for safe, effective care of patients in the ICU. Each topic includes theoretical knowledge, practical methods of treating the condition described, a review of the available evidence, and common pitfalls in treatment and management. Ideal for daily quick reference as well as an efficient review for professional examinations in critical care medicine.

Cisco Unified Customer Voice Portal Building Unified Contact Centers Rue Green, CCIE® No. 9269 The definitive guide to deploying Cisco Unified Customer Voice Portal IVRs in any contact center environment Thousands of companies are replacing legacy ACD/TDM-based contact centers with pure IP-based unified contact center solutions. One of these solutions is quickly earning market leadership: Cisco Unified Customer Voice Portal (CVP). Now, one of the leading Cisco CVP experts brings together everything network and telephony professionals need to successfully implement production Interactive Voice Response (IVR) solutions with CVP: architectural guidelines, deployment best practices, detailed insights for design and sizing, and more. CCIE Rue Green guides you through designing unified contact centers with CVP, and deploying proven infrastructures to support your designs. The author first explains CVP's architecture, outlining its key advantages and opportunities for integration and illuminating the design challenges it presents. Next, he guides you through addressing each of these challenges, covering all CVP components and tools and offering detailed insights available in no other book. Using this book's detailed working configurations and examples, you can minimize

configuration errors, reduce downtime, strengthen monitoring, and drive maximum value from any CVP-based unified call center solution. Rue Green, CCIE No. 9269 (Routing & Switching and Voice), CISSP, MCSE, MCITP is a Technical Leader for the Customer Collaboration Service Line within Cisco Advanced Services, where he focuses on unified contact center architectures and deployment methodologies. He currently acts in a delivery architect role for Unified CVP, Unified ICM, and Cisco Unified Communications Manager for Unified Contact Center Solutions. He has spent the last 21 years working within different roles related to the architecture, design, and implementation of large voice and data networks, including several years working with complex contact center solutions.

- Discover CVP's powerful capabilities and advantages
- Understand how CVP's components fit together into a unified architecture
- Utilize CVP native components: Call Server, VXML Server, Reporting Server, Operations Console Server, and Cisco Unified Call Studio
- Integrate non-native components such as IOS devices, Unified ICM, UCM, content load balancers, and third-party servers
- Choose the right deployment model for your organization
- Implement detailed call flows for Standalone, Call Director, Comprehensive, and VRU-only deployment models
- Design Unified CVP for high availability
- Efficiently deliver media via streaming, caching, and other techniques
- Address crucial sizing, QoS, network latency, and security considerations
- Successfully upgrade from older versions or H.323 platforms
- Isolate and troubleshoot faults in native and non-native CVP components
- Design virtualized Unified CVP deployments using UCS This IP

### **Program and Abstracts of Papers, General Meeting**

This book comprises the Proceedings of the 12th International Congress on Mathematical Education (ICME-12), which was held at COEX in Seoul, Korea, from July 8th to 15th, 2012. ICME-12 brought together 3500 experts from 92 countries, working to understand all of the intellectual and attitudinal challenges in the subject of mathematics education as a multidisciplinary research and practice. This work

aims to serve as a platform for deeper, more sensitive and more collaborative involvement of all major contributors towards educational improvement and in research on the nature of teaching and learning in mathematics education. It introduces the major activities of ICME-12 which have successfully contributed to the sustainable development of mathematics education across the world. The program provides food for thought and inspiration for practice for everyone with an interest in mathematics education and makes an essential reference for teacher educators, curriculum developers and researchers in mathematics education. The work includes the texts of the four plenary lectures and three plenary panels and reports of three survey groups, five National presentations, the abstracts of fifty one Regular lectures, reports of thirty seven Topic Study Groups and seventeen Discussion Groups.

## **The Beautiful Ones**

About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations.

Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for

## Read Book Icm Examination Past Papers Media Law

a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as carefully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flipppo-Berger whose expertise with desk top publishing and perseverance was a great help.

paradise of “Uptown” to the mythical landscape of Purple Rain to the psychedelia of “Paisley Park.” But his most ambitious creative act was turning Prince Rogers Nelson, born in Minnesota, into Prince, one of the greatest pop stars of any era. The Beautiful Ones is the story of how Prince became Prince—a first-person account of a kid absorbing the world around him and then creating a persona, an artistic vision, and a life, before the hits and fame that would come to define him. The book is told in four parts. The first is the memoir Prince was writing before his tragic death, pages that bring us into his childhood world through his own lyrical prose. The second part takes us through Prince’s early years as a musician, before his first album was released, via an evocative scrapbook of writing and photos. The third section shows us Prince’s evolution through candid images that go up to the cusp of his greatest achievement, which we see in the book’s fourth section: his original handwritten treatment for Purple Rain—the final stage in Prince’s self-creation, where he retells the autobiography of the first three parts as a heroic journey. The book is framed by editor Dan Piepenbring’s riveting and moving introduction about his profound collaboration with Prince in his final months—a time when Prince was thinking deeply about how to reveal more of himself and his ideas to the world, while retaining the mystery and mystique he’d so carefully cultivated—and annotations that provide context to the book’s images. This work is not just a tribute to an icon, but an original and energizing literary work in its own right, full of Prince’s ideas and vision, his voice and image—his undying gift to the world.

## **Australian Education Index**

## **It's Complicated**

The Bad Bug Book 2nd Edition, released in 2012, provides current information about the major known agents that cause foodborne illness. Each chapter in this book is about a pathogen—a bacterium, virus, or parasite—or a natural toxin that can contaminate food and cause illness. The book contains scientific and technical information about the major pathogens that cause these kinds of illnesses. A separate “consumer box” in each chapter provides non-technical information, in everyday language. The boxes describe plainly what can make you sick and, more important, how to prevent it. The information provided in this handbook is abbreviated and general in nature, and is intended for practical use. It is not intended to be a comprehensive scientific or clinical reference. The Bad Bug Book is published by the Center for Food

This volume contains the proceedings of the ICM 2018 satellite school and workshop K-theory conference in Argentina. The school was held from July 16–20, 2018, in La Plata, Argentina, and the workshop was held from July 23–27, 2018, in Buenos Aires, Argentina. The volume showcases current developments in K-theory and related areas, including motives, homological algebra, index theory, operator algebras, and their applications and connections. Papers cover topics such as K-theory of group rings, Witt groups of real algebraic varieties, coarse homology theories, topological cyclic homology, negative K-groups of monoid algebras, Milnor K-theory and regulators, noncommutative motives, the classification of  $C^*$ -algebras via Kasparov's K-theory, the comparison between full and reduced  $C^*$ -crossed products, and a proof of Bott periodicity using almost commuting matrices.

### **The Writers Directory**

## Read Book Icm Examination Past Papers Media Law

The multitalented writers, directors, producers, and actors (as seen on *The League*, *Transparent*, and *The Mindy Project*) share the secrets of their lifelong partnership in this unique memoir. “A book that anyone will love . . . You can enjoy it even if you have no idea who the Duplass brothers are.”—Janet Maslin, *The New York Times* (17 Refreshing Books to Read This Summer) Whether producing, writing, directing, or acting, the Duplass Brothers have made their mark in the world of independent film and television on the strength of their quirky and empathetic approach to storytelling. Now, for the first time, Mark and Jay take readers on a tour of their lifelong partnership in this unique memoir told in essays that share the secrets of their success, the joys and frustrations of intimate collaboration, and the lessons they’ve learned the hard way. From a childhood spent wielding an oversized home video camera in the suburbs of New Orleans to their shared years at the University of Texas in early-nineties Austin, and from the breakthrough short they made on a three-dollar budget to the night their feature film *Baghead* became the center of a Sundance bidding war, Mark and Jay tell the story of a bond that’s resilient, affectionate, mutually empowering, and only mildly dysfunctional. They are brutally honest about how their closeness sabotaged their youthful romantic relationships, about the jealousy each felt when the other stole the spotlight as an actor (Mark in *The League*, Jay in *Transparent*), and about the challenges they faced on the set of their HBO series *Togetherness*—namely, too much togetherness. But *Like Brothers* is also a surprisingly practical road map

to a rewarding creative partnership. Rather than split all their responsibilities fifty-fifty, the brothers learned to capitalize on each other's strengths. They're not afraid to call each other out, because they're also not afraid to compromise. Most relationships aren't—and frankly shouldn't be—as intense as Mark and Jay's, but their brand of trust, validation, and healthy disagreement has taken them far. Part coming-of-age memoir, part underdog story, and part insider account of succeeding in Hollywood on their own terms, *Like Brothers* is as openhearted and lovably offbeat as Mark and Jay themselves. “Wright. Ringling. Jonas. I'm sure you could name a bunch of famous brother teams. They're all garbage compared to Mark and Jay. I can't wait for you to read this book.”—from the foreword by Mindy Kaling

## **Misfortunes of War**

This monograph, part of a larger study of ways to reduce collateral damage undertaken for the U.S. Air Force, analyzes media and public reactions to civilian casualty incidents, whether these incidents affect media reporting or public support for military operations, and, if so, how. It analyzes case studies of incidents of civilian deaths in the February 1991 bombing of the Al Firdos bunker in the Gulf War, the April and May 1999 attacks on the Djakovica convoy and Chinese embassy during the war in Kosovo, the June 2002 attack involving an Afghan wedding party during operations in Afghanistan, and the March 2003 incident involving a large explosion in a crowded Baghdad marketplace to describe and explain how

## Read Book Icm Examination Past Papers Media Law

the U.S. and foreign media and publics have responded. For each case study, the study team examined press, public, and leadership responses to these incidents and found the following. First, while avoiding civilian casualties is important to the American public, it has realistic expectations about the actual possibilities for avoiding casualties. Second, the press reports heavily on civilian casualty incidents. Third, adversaries understand the public's sensitivities to civilian deaths and have sought to exploit them. Fourth, during armed conflict, the belief that the United States and its allies are trying to avoid casualties most affects support for U.S. military operations, both at home and abroad. Fifth, while strong majorities of Americans typically give U.S. military and political leaders the benefit of the doubt when civilian casualty incidents occur, this does not necessarily extend to foreign audiences. Sixth, when civilian casualty incidents occur, it is at least as important to get the story right as to get the story out. Finally, attention to and concern about civilian casualties both at home and abroad have increased in recent years and may continue to do so.

The most important core skills for medical students to master are history taking and clinical examination.

## Read Book Icm Examination Past Papers Media Law

This extensively revised, eighth edition has been written with the philosophy that the acquisition of clinical skills is most effectively undertaken at the bedside. This pocketbook should be used as a companion, to be taken onto the wards and into consulting rooms where the information is most needed. The book begins with a system of history taking followed by a new chapter on the analysis of key symptoms. The remaining chapters cover physical examination of each of the major systems. Each stage of the examination starts with a detailed, step-by-step description of the examination method complemented by relevant illustrations, diagrams and tables on the facing page. This book is intended primarily for use at the outset of clinical training; once students have achieved proficiency in the basic skills of interviewing and examining, the book should also prove useful for revision. An invaluable starter book concentrating purely on the fundamentals of performing a patient examination. Covers each body system and outlines the principles of: - taking a history - how to conduct a physical examination - specific examination points as appropriate

Concentrates only on the main symptoms of disease and then the normal and abnormal physical findings. Mention of specific diseases is confined to those most commonly encountered. Compact and pocket-sized to be carried around easily. · Now in full colour double-page format · Clear simple colour line drawings covering the essentials of a clinical examination. · Published simultaneously with the Eleventh Edition of Macleod's Clinical Examination

final FRCA, providing all the answers as well as the best way to present them. It will save hours of research and preparation.

### **Peace Journalism**

Two years only after the publication of the first edition of “Contrast media – Safety issues and ESUR guidelines” in our book series Medical Radiology in 2006, it appeared that a second edition was urgently needed. The first edition was indeed an exceptional success with our readership and sold out rapidly, but moreover the safety of MR contrast media urgently required a reappraisal after the publication of a new and dramatic adverse reaction to some of the gadolini- based agents: the so called NSF syndrome. I am very much indebted to Professor Henrik S. Thomsen and his academic colleagues from the ESUR Contrast Medium Safety Committee for accepting the task to prepare a second edition of their remarkable book. Within a record short period of time they have been able to complete this fully revised new volume. It offers to the readers a comprehensive overview of all problems related to the use of contrast media in modern radiology and of our latest knowledge and insights in the mechanisms of adverse reactions related to contrast media. It answers all questions that radiologists and referring physicians are confronted with in their daily practice when they consider the administration of these agents to their patients.
