When a routine hanging goes wrong and a murderer somehow survives the noose, the man announces he is an immortal.

And not just any immortal, but Cayal, the Immortal Prince, hero of legend, thought to be only a fictional character. To most he is a figure out of the Tide Lord Tarot, the only record left on Amyrantha of the mythical beings whom fable tells created the race of half-human, half-animal Crasii, a race of slaves. Arkady Desean is an expert on the legends of the Tide Lords so at the request of the King's Spymaster, she is sent to interrogate this would-be immortal, hoping to prove he is a spy, or at the very least, a madman. Though she is set the task of proving Cayal a liar, Arkady finds herself believing him, against her own good sense. And as she begins to truly believe in the Tide Lords, her own web of lies begins to unravel At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

In this new and substantially expanded Third Edition, Philip Jenkins continues to illuminate the remarkable expansion of Christianity in the global South--in Africa, Asia, and Latin America. Drawing upon the extensive new scholarship that has appeared on this topic in recent years, he asks how the new Christianity is likely to affect the poor, among whom it finds its most devoted adherents. How should we interpret the enormous success of prosperity churches across the Global South? Politically, what will be the impact of new Christian movements? Will Christianity contribute to liberating the poor, to give voices to the previously silent, or does it threaten only to bring new kinds of division and conflict? Does Christianity liberate women, or introduce new scriptural bases for subjection? Acclaim for previous editions of The Next Christendom: Named one of the Top Religion Books of 2002 by USA Today Named One of the Top Ten Religion Books of the Year by Booklist (2002) Winner of the Christianity Today Book Award in the category of "Christianity and Culture" (2002) "Jenkins is to be commended for reminding us, throughout the often gripping pages of this lively workthat the history of Christianity is the history of innovative--and unpredictable--adaptations." --The New York Times Book Review "This is a landmark book. Jenkin's thesis is comprehensively researched; his analysis is full of insight; and his projection of the future may indeed prove to be prophetic." --Baptist Times "A valuable and provocative look at the phenomenon widely ignored in the affluent North but likely to be of enormous importance in the century ahead. The Next Christendom is chillingly realistic about the relationship between Christianity and Islam." --Russell Shaw, Crisis "If the times demand nothing less than a major rethinking of contemporary global history from a Christian perspective, The Next Christendom will be one of the significant landmarks pointing the way." --Mark Noll, Books & Culture

Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization, the renowned Institut de Recherche et de Coordination Acoustique/Musique (IRCAM) in Paris. As a year-long participant-observer, Born studied the social and cultural economy of an institution for research and production of avant-garde and

computer music. She gives a unique portrait of IRCAM's composers, computer scientists, technicians, and secretaries, interrogating the effects of the cultural philosophy of the controversial avant-garde composer, Pierre Boulez, who directed the institute until 1992. Born depicts a major artistic institution trying to maintain its status and legitimacy in an era increasingly dominated by market forces, and in a volatile political and cultural climate. She illuminates the erosion of the legitimacy of art and science in the face of growing commercial and political pressures. By tracing how IRCAM has tried to accomodate these pressures while preserving its autonomy, Born reveals the contradictory effects of institutionalizing an avant-garde. Contrary to those who see postmodernism representing an accord between high and popular culture, Born stresses the continuities between modernism and postmodernism and how postmodernism itself embodies an implicit antagonism toward popular culture.

The relationship between technological and pedagogical innovation has recently created a new field of research at the crossroads between Psychology, Educational Sciences and Artificial Intelligence: Educational Robotics (ER). Through analysis of the achievable educational goals based on the technological status and specific learning modes of different types of robots, it is possible to define three pedagogical paradigms: learning robotics, learning with robotics, and learning by robotics. In this book we address these three paradigms through three themes: human representations of robots, the acceptance and trust shown when interacting with a humanoid, and learning favored by the development and programming of robots in an educational context. These themes allow the authors to fully explore, define and delimit this novel field of research for future application in educational and social contexts. Finally, the book discusses contributions and limitations which have emerged from different methodologies of research, potential educational applications, and concepts of human–robot interaction for the development of the above paradigms.

Multilingual communication within the world community is important for economic, political, and cultural interactions. In a global environment where other languages are increasing in importance in addition to recognized international standards (i. e., English and French), language learning is becoming more important for improved international relations. At the same time, recent advances in instructional technology make the promise of building intelligent tutoring systems in advanced technology laboratories to teach these language skills a reality in the near future. These tutoring systems, therefore, may help us foster improved methods for acquiring languages. As active language learners and instructional technology researchers, we felt an international meeting with similar individuals was needed to discuss how such advanced tutoring systems are to be designed and implemented. We held such a meeting, the results of which are presented in this volume. The purpose of this Advanced Workshop, sponsored by the NATO Scientific Affairs Division, was to bring together a multidisciplinary group of researchers who were active in the development of intelligent tutoring systems for foreign language learning. Participants came from computer science, computational linguistics, psychology, and foreign language learning. Washington, D.C. was selected for the Workshop site since it is Merryanna's home city, the capitol of the United States, and an international, multilingual community in its own right. Masoud agreed to the location (with a promise to be shown the White House!) and graciously volunteered to coordinate activities from the European side.

Lamb to the Slaughter is a short, sharp, chilling story from Roald Dahl, the master of the shocking tale. In Lamb to the Slaughter, Roald Dahl, one of the world's favourite authors, tells a twisted story about the darker side of human nature. Here, a wife serves up a dish that utterly baffles the police . . . Lamb to the Slaughter is taken from the short story collection Someone Like You, which includes seventeen other devious and shocking stories, featuring the two men who make an unusual and chilling wager over the provenance of a bottle of wine; a curious machine that reveals the horrifying

truth about plants; the man waiting to be bitten by the venomous snake asleep on his stomach; and others. 'The absolute master of the twist in the tale.' (Observer) This story is also available as a Penguin digital audio download read by Juliet Stevenson. Roald Dahl, the brilliant and worldwide acclaimed author of Charlie and the Chocolate Factory, James and the Giant Peach, Matilda, and many more classics for children, also wrote scores of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, Roald Dahl's Twisted Tales by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.

Two and Twenty Dark Tales

SHORTLISTED FOR THE ORWELL PRIZE In 1978 Timothy Garton Ash went to live in Berlin to see what that divided city could teach him about tyranny and freedom. Fifteen years later, by then internationally famous for his reportage of the downfall of communism in Central Europe, he returned to look at his Stasi file which bore the code-name 'Romeo'. Compiled by the East German secret police, with the assistance of both professional spies and ordinary people turned informer, it contained a meticulous record of his earlier life in Berlin. In this memoir, he describes rediscovering his younger self through the eyes of the Stasi, and then confronting those who had informed against him. Moving from document to remembrance, from the offices of Britain's own security service to the living rooms of retired Stasi officers, The File is a personal narrative as gripping, as disquieting, and as morally provocative as any fiction by George Orwell or Graham Greene. And it is all true.
