Readers' Guide to Periodical Literature

The Construction Chart Book presents the most complete data available on all facets of the U.S. construction industry: economic, demographic, employment/income, education/training, and safety and health issues. The book presents this information in a series of 50 topics, each with a description of the subject matter and corresponding charts and graphs. The contents of The Construction Chart Book are relevant to owners, contractors, unions, workers, and other organizations affiliated with the construction industry, such as health providers and workers compensation insurance companies, as well as researchers, economists, trainers, safety and health professionals, and industry observers.

Reanimating Industrial Spaces explores the relationships between people and the places of former industry through approaches that incorporate and critique memory-work. The chapters in this volume consider four broad questions: What is the relationship between industrial heritage and memory? How is memory involved in the process of place-making in regards to industrial spaces? What are the strengths and pitfalls of conducting memory-work?

What can be learned from cross-disciplinary perspectives and methods? The contributors have created a set of diverse case studies (including iron-smelting in Uganda, Puerto Rican sugar mills and concrete factories in Albania) which examine differing socio-economic contexts and approaches to industrial spaces both in the past and in contemporary society. A range of memory-work is also illustrated: from ethnography, oral history, digital technologies, excavation, and archival and documentary research.
