Proceedings of the Second International Conference on the Future of ASEAN (ICoFA) 2017 - Volume 1

Journal of Business Research

This book examines how business, the social sciences, science and technology will impact the future of ASEAN. Following the ASEAN VISION 2020, it analyses the issues faced by ASEAN countries, which are diverse, while also positioning ASEAN as a competitive entity through partnerships. On the 30th anniversary of ASEAN, all ASEAN leaders agreed to the establishment of the ASEAN VISION 2020, which delineates the formation of a peaceful, stable and dynamically developed region while maintaining a community of caring societies in Malaysia, Indonesia, Singapore, Brunei, Vietnam, Thailand, the Philippines, Myanmar, Laos and Cambodia. In keeping with this aspiration, Universiti Teknologi MARA (UitM) Perlis took the initial steps to organise conferences and activities that highlight the role of the ASEAN region. The Second International Conference on the Future of ASEAN (ICoFA) 2017 was organised by the Office of Academic Affairs, Universiti Teknologi MARA Perlis, to promote more comprehensive integration among ASEAN members. This book, divided into two volumes, offers a useful guide for all those engaged in research on business, the social sciences, science and technology. It will also benefit researchers worldwide who want to gain more knowledge about ASEAN countries.

Managing Diversity in Today's Workplace: Strategies for Employees and Employers [4 volumes]

Creating the Discipline of Knowledge Management

a comprehensive overview of the current state of research, theory and practice drawn from the leading scholars and practitioners who have advanced our understanding of mentoring in the workplace The Handbook of Mentoring at Work; Research, Theory, and Practice, provides a definitive guide that not only informs the field, but also extends it in three critical ways: Chronicles the current state of knowledge of mentoring and identifies important new areas of research: The Handbook begins with offering an extensive, cutting-edge and in-depth review of core topics in mentoring research, such as diversity in mentoring relationships, learning processes in mentoring relationships, formal mentoring, peer mentoring, socialization and mentoring, leadership and mentoring, dysfunctional mentoring, personality and mentoring, and electronic mentoring. Extends the theoretical horizon of mentoring: The theoretical section of the Handbook builds and extends mentoring theory by drawing on a diverse and rich literature of related theories, such as network theory, adult development theory, relational theory, communication theory, personal change theory, work-family theory and theories of emotional intelligence. Builds a bridge between the practice and study of mentoring: The Handbook includes chapters that address not only formal mentoring programs, but also mentoring practices that relate to leadership development programs, diversity programs and international perspectives. The Handbook is a "must-have" reference for understanding the key debates and issues facing mentoring scholars and practitioners, and provides a theory-driven road map to guide future research and practice in the field of mentoring.

The Handbook of Mentoring at Work

The Journal of Business Ethics was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral

virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy , with special interests in the interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented, the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

Research in the Decision Sciences for Global Business

It is argued that, without neglecting efficiency or profits, human well-being should be the first priority of every business. Business Ethics in Action defends the need to orient business to people. Drawing on the author's extensive experience in teaching business ethics at one of Europe's leading business schools, this textbook overcomes common approaches in which business ethics is presented exclusively as a tool for solving ethical dilemmas by applying principled theories. Business Ethics focuses on both principles and virtues, although emphasizing virtues as the key for human flourishing. Through illustrative case studies and interesting pedagogy, this book will be accessible and practical, aiding students in applying the foundations and principles of business ethics to real world situations.

The Oxford Handbook of Strategic Sales and Sales Management

In this book Dr. Michael Stankosky, founder of the first doctoral program in knowledge management, sets out to provide a rationale and solid research basis for establishing Knowledge Management (KM) as an academic discipline. While it is widely known that Knowledge is the driver of our knowledge economy, Knowledge Management does not yet have the legitimacy that only rigorous academic research can provide. This book lays out the argument for KM as a separate academic discipline, with its own body of knowledge (theoretical constructs), guiding principles, and professional society. In creating an academic discipline, there has to be a widely accepted theoretical construct, arrived at by undergoing scholarly scientific investigation and accompanying rigor. This construct becomes the basis for an academic curriculum, and proven methodologies for practice. Thus, the chapters in this book bridge theory and practice, providing guiding principles to those embarking on or evaluating the merits of a KM program. As a methodology itself for undertaking the development of a body of knowledge, a KM Research Map was developed to guide scholars, researchers, and practitioners. This book presents this map, and showcases cutting-edge scholarship already performed in this nascent field by including the dissertation results of eleven KM scholar/practitioners.

The practice of corporate social responsibility (CSR) in the Middle East is explored in this volume, through a unique compilation of data and perspectives from authors living and working in the region. The authors demonstrate how the long-entrenched traditions of philanthropy and generosity in Arab culture have been reinvigorated in recent years and are starting to cross-fertilize with new and more institutionalized forms of giving, advocated through advances pertaining to CSR. Using a variety of cases, this book ponders the multiple facets of CSR in the region, including philanthropy, strategic

giving, social entrepreneurship, internal CSR and responsible human resource management practices, effective CSR integration in SMEs, corporate environmental responsibility and its evolution, CSR reporting and lingering challenges in this respect. It also considers the relevance and applicability of CSR to a wider spectrum of societal actors and institutions. The contributions nicely capture and reiterate commitment to CSR in the Middle East.

The Oxford Handbook of Organizational Climate and Culture

Business ethics is a form of the art of applied ethics that examines ethical rules and principles within a commercial context, the various moral or ethical problems that can arise in a business setting, and any special duties or obligations that apply to persons who are engaged in commerce. Business ethics can be both a normative and a descriptive discipline. As a corporate practice and a career specialisation, the field is primarily normative. In academia descriptive approaches are also taken. The range and quantity of business ethical issues reflects the degree to which business is perceived to be at odds with non-economic social values. Historically, interest in business ethics accelerated dramatically during the 1980s and 1990s, both within major corporations and within academia. For example, today most major corporate websites lay emphasis on commitment to promoting non-economic social values under a variety of headings (eg: ethics codes, social responsibility charters). In some cases, corporations have redefined their core values in the light of business ethical considerations (e.g. BP's "beyond petroleum" environmental tilt). This book presents and discusses new and important issues in the field.

The Accountable Corporation: Business ethics

The Oxford Handbook of Strategic Sales and Sales Management is an unrivalled overview by leading academics in the field of sales and marketing management. Sales theory is experiencing a renaissance driven by a number of factors, including building profitable relationships, creating/delivering brand value, strategic customer management, sales and marketing relationships, global selling, and the change from transactional to customer relationship marketing. Escalating sales and selling costs require organisations to be more focused on results and highlight the shifting of resources from marketing to sales. Further the growth in customer power now requires a strategic sales response, and not just a tactical one. The positioning of sales within the organisation, the sales function and sales management are all discussed. The Handbook is not a general sales management text about managing a sales force, but will fill a gap in the existing literature through consolidating the current academic research in the sales area. The Handbook is structured around four key topics. The first section explores the strategic positioning of the sales function within the modern organisation. The second considers sales management and recent developments. The third section examines the sales relationship with the customer and highlights how sales is responding to the modern environment. Finally, the fourth section reviews the internal composition of sales within the organisation. The Handbook will provide a comprehensive introduction to the latest research in sales management, and is suitable for academics, professionals, and those taking professional qualifications in sales and marketing.

Issues in Business Ethics and Corporate Social Responsibility

This book analyses the accountability of European home States for their failure to secure the human rights of victims from host States against transnational enterprises. It argues for a reconfiguration of the relationship between multinational enterprises and individuals, both of which have been profoundly changed by globalisation. Enterprises are now supranational entities with numerous affiliates all over the world. Likewise, individuals are increasingly part of a global community. Despite this, the relationship between the two is deregulated. Addressing this gap, this study proposes an innovative business and human rights litigation strategy. Human rights advocates could file a test case against a European home State, at the European Court of Human Rights, for its failure to secure the rights of victims vis-à-vis European multinational enterprises. The book illustrates why such a strategy is needed, and points to the lack of effective legal remedies against European multinationals. The goal is to empower victims from developing countries against European States which are failing to hold multinational enterprises accountable for human rights abuses.

Handbook of Human Resource Development

The recent turbulences that led to a global financial crisis have partially been triggered by immoral and egoistic behaviour. In the wake of the disaster many have asked, and keep asking, how a sustainable and socially fair economy can be build.

Ethics is one of the cornerstones of human interaction in general and in economic interaction. This study has been inspired by the question: How can unethical behaviour be avoided? This book deals with the question of how ethics in general can be improved. In today's business world Business Ethical Codes of Conduct (BECC), or more commonly called honour codes, have reached some prominence. Utilizing questionnaires and moral dilemmas this study attempts to answer the question: How efficient are codes of conduct? The study arrives at surprising insights into the impact of priming-effects on morale and shows that the mere exposure to ethical questions influences how we behave.

Stakeholder Thinking in Marketing

The Oxford Handbook of Organizational Climate and Culture presents the breadth of topics from Industrial and Organizational Psychology and Organizational Behavior through the lenses of organizational climate and culture. The Handbook reveals in great detail how in both research and practice climate and culture reciprocally influence each other.

The details reveal the many practices that organizations use to acquire, develop, manage, motivate, lead, and treat employees both at home and in the multinational settings that characterize contemporary organizations. Chapter authors are both expert in their fields of research and also represent current climate and culture practice in five national and international companies (3M, McDonald's, the Mayo Clinic, PepsiCo and Tata). In addition, new approaches to the collection and analysis of climate and culture data are presented as well as new thinking about organizational change from an integrated climate and culture paradigm. No other compendium integrates climate and culture thinking like this Handbook does and no other compendium presents both an up-to-date review of the theory and research on the many facets of climate and culture as well as contemporary practice. The Handbook takes a climate and culture vantage point on micro approaches to human issues at work (recruitment and hiring, training and performance management, motivation and fairness) as well as organizational processes (teams, leadership, careers, communication), and it also explicates the fact that these are lodged within firms that function in larger national and international contexts.
