Gotta Earn a Living

"Materials for springs" is basically intended for engineers related to spring materials and technologies who graduated from metallurgical or mechanical engineering course in technical high school, or in other higher engineering schools, as well as those who are related to purchases or sales of spring materials. This book is the first comprehensive treatment in this specific topic. It is written by experts of the JSSE (Japan Society of Spring Engineers).

Sondheim on Music

A game designer considers the experience of play, why games have rules, and the relationship of play and narrative. The impulse toward play is very ancient, not only pre-cultural but pre-human; zoologists have identified play behaviors in turtles and in chimpanzees. Games have existed since antiquity; 5,000-year-old board games have been recovered from Egyptian tombs. And yet we still lack a critical language for thinking about play. Game designers are better at answering small questions ("Why is this battle boring?") than big ones ("What does this game mean?"). In this book, the game designer Brian Upton analyzes the experience of play—how playful activities unfold from moment to moment and how the rules we adopt constrain that

unfolding. Drawing on games that range from Monopoly to Dungeons & Dragons to Guitar Hero, Upton develops a framework for understanding play, introducing a set of critical tools that can help us analyze games and game designs and identify ways in which they succeed or fail. Upton also examines the broader epistemological implications of such a framework, exploring the role of play in the construction of meaning and what the existence of play says about the relationship between our thoughts and external reality. He considers the making of meaning in play and in every aspect of human culture, and he draws on findings in pragmatic epistemology, neuroscience, and semiotics to describe how meaning emerges from playful engagement. Upton argues that play can also explain particular aspects of narrative; a play-based interpretive stance, he proposes, can help us understand the structure of books, of music, of theater, of art, and even of the process of critical engagement itself.

Sun Ra, Brian Eno, Lee Perry, Kate Bush, Kraftwerk, Aphex Twin, Ryuichi Sakamoto and Brian Wilson are interviewed in this extraordinary work of sonic history. It travels from the rainforests of Amazonas to virtual Las Vegas; from David Lynch's dream house high in the Hollywood Hills to the megalopolis of Tokyo. Ocean of Sound begins in 1889 at the Paris exposition when Debussy first heard Javanese music performed. An ethereal culture developed in response to the intangibility of 20th century communications. Author of Rap Attack 3 and Exotica, David Toop has in Ocean of Sound written an exhilarating, path-breaking account of ambient sound.

This book teaches photographers how to connect fully with the visual richness present in their ordinary, daily experiences. According To The authors, photography is not purely a mechanical process. You need to know how to look, As well as where to point the camera, and when to press the button. Then as you develop your ability to see, your appreciation and inspiration from the world around you become enhanced. Filled with practical exercises and techniques inspired by mindfulness meditation, this book teaches photographers how to "see what's in front of them". It offers a system of training and exercises that draw upon Buddhist concepts, As well as on insights of
