Sales is an industry that has evolved from the simple wheel to today's myriad of products or services camouflaged with features, benefits and fluff, led by

stellar group of brand name companies. If you are new to sales, frustrated with your current career in sales because of inconsistent numbers or are an old dog that needs a new (proven sales pitch), this really is the only book you will EVER need to unlocking a rewarding career in sales, not just from a production stand point but also by understanding the complete process of the Buying Curve. The book is split into four parts - The Sale, nine steps of the sales process, delivered in an easy to follow and read format. Most importantly what will increase your sales without effort, in fact easier than what you are currently doing. If you are new to the industry it will insure you get off to the right start with a solid and proven way to make you a top sales person no matter what type of industry you are working in. If you are looking to refresh your old style, look no further this book will take you from ¨snail mail¨ to ¨email and social media¨. The second part - No Sale - takes a light hearted, but real look at the mistakes we make when we are not selling and the impact it has on us (a must read for all). The third section, How do we really fix what went wrong in our sales pitch? The last section, Coming Full Circle relates to what is needed in selling to today's media savvy prospect who know their options, that shop around with a touch of a smart phone or mouse click, and how they become your greatest asset or your downfall.

For courses in Statistics and Research Methods. Without question, statistics is one of the most challenging courses for students in the social and behavioral sciences. Enrolling in their first statistics course, students are often apprehensive or extremely anxious toward the subject matter. And while SPSS is one of the more easy-to-use statistical software programs available, for anxious students who realize they not only have to learn statistics but also new software, the task can seem insurmountable. Keenly aware of students' anxiety with statistics (and the fact that this anxiety can affect performance), Ronald Yockey has written *SPSS Demystified: A Step-by-Step Guide to Successful Data Analysis, 1/e*. Through a comprehensive, step-by-step approach, this text is consistently and specifically designed to both alleviate anxiety toward the subject matter and build a successful experience analyzing data in SPSS. In the Company of Others is the only textbook in the market that is organized according to the communication competence model. Competent communication is both effective in achieving goals, and appropriate to the given situation. Students can improve by learning about, and working on, the 5 dimensions of this model: knowledge, skills, sensitivity, ethics, and commitment/effort. This organizational rubric ties the many topics in the course together so that students can use the ideas effectively. The model:1. is explained in Chapter 12. is reinforced in every chapter (margin icons remind students when the 5 dimensions appear)3. offers "Developing Communication Competence" self-test boxes in most chapters4. ends each chapter with a section on improving competence in that chapter's topic.
