The Boys in the Boat

Principles of Yacht Design has established itself as the standard book on the subject for practising designers, naval architecture students, discerning boat owners as well as the boatbuilding industry as a whole. The fourth edition is completely revised and expanded and follows the design from scratch of a completely new yacht including all new computer-generated explanatory illustrations. As such, it examines every aspect of the process of yacht and powerboat design. The authors have used a newly designed 41 foot performance cruiser to demonstrate the practical application of yacht design theory. Beginning with the yacht's specifications, the authors examine the vital topics of aero and hydrodynamics and conclude with practical matters such as the layout of the cockpit, deck and cabin, and provide a complete weight calculation for the boat. 'This book is deeply fascinating . . . a must.' Classic Boat 'The standard book on the subject for practising designers, naval architecture students, discerning boat owners and the boatbuilding industry as a whole.' Yachting Life (May 2007) 'A definitive work on yacht design.' Cruising

Allen (Capt. Al) Cody Taube is a NAMS Global Marine Surveyor and a wooden boat specialist. He is a graduate architect from the Rhode Island School of Design, a licensed 100-Ton Captain, and an independent shipwright. He has owned, restored, sailed and cruised his own wooden schooners and others for 40 years. His wide-ranging experience includes building small traditional sailboats and rebuilding large sailing craft, mostly schooners. He is also an award-winning screenwriter, artist and lives and sails his 65' wooden schooner REEF CHIEF between Key West and the Bahamas. This book presents the experience and insights gained by Allen Taube through 40 years of boat building, owning and sailing wooden schooners, marine surveying and wooden boat repair. His original book, "The Boatwright's Companion," published in 1986, became the wooden boat owners' bible. This third edition is updated, enlarged and destined to continue to be a wooden boat owner's

and wooden boat lover's favorite classic book. Taube outlines and details wooden boat repairs in a clear and informal style, taking time and care to answer the many legitimate questions a boat carpenter or boat owner might ask. More than 100 illustrations supplement the text. This clearly written book takes the mystery out of wooden boat repair. You'll feel confident and have the information you need to work, repair and maintain your own wooden boat.

This publication provides an overview of the importing process and contains general information about import requirements. This edition contains much new and revised material brought about because of changes in the law, particularly the Customs Modernization Act. The Customs modernization provisions has fundamentally altered the process by shifting to the importer the legal responsibility for declaring the value, classification, and rate of duty applicable to entered merchandise. Chapters cover entry of goods, informed compliance,

invoices, assessment of duty, classification and value, marking, special requirements for alcoholic beverages, motor vehicles and boats, import quotas, fraud, and foreign trade zones. In addition to the material provided by the U. S. Customs Service, the private commercial publisher of this book has provided a bonus chapter on how to build a tax-free import-export business.
