Excellence Through Equity is an inspiring look at how real-world educators are creating schools where all students are able to thrive. In these schools, educators understand that equity is not about treating all children the same. They are deeply committed to ensuring that each student receives what he or she individually needs to develop their full potential and succeed. To help educators with what can at times be a difficult and challenging journey, Blankstein and Noguera frame the book with five guiding principles of Courageous Leadership: Getting to your core Making organizational meaning Ensuring constancy and consistency of purpose Facing the facts and your fears Building sustainable relationships. They further emphasize that the practices are grounded in three important areas of research that are too often disregarded: (1) child development, (2) neuroscience, and (3) environmental influences on child development and learning. You'll hear from Carol Corbett Burris, Michael Fullan, Marcus J. Newsome, Paul Reville, Susan Szachowicz, and other bold practitioners and

visionary thinkers who share compelling and actionable ideas, strategies, and experiences for closing the achievement gap in your classrooms and school. Ensuring that all students receive an education that cultivates their talents and potential is in all our common interest. As Andy Hargreaves writes in the coda: "The opportunity for all Americans is to articulate and believe in an inspiring vision of educational change that is about what the next generation of America and Americans should become, not about a target or ranking that the nation should attain." From the Foreword by Archbishop Desmond Tutu: "Letting go of a system of winners and losers in favor of what is proposed in this book is a courageous leap forward that we all must take together. Let this bold, practical book be a guide; and may you travel into this new exciting vista, in which every child can succeed."

In the United States, the nomenclature of adult education includes adult literacy, adult secondary education, and English for speakers of other languages (ESOL) services provided to undereducated and limited English proficient adults. Those receiving adult education services have diverse reasons for seeking additional education. With the passage of the WIA, the assessment of adult education students became mandatory-regardless of their reasons for seeking services. The law does allow the states and local programs flexibility in selecting the most

level, allow for great discoveries, and propel both the individual and the group forward into a lifetime of learning. This is something all teachers want and all students deserve. In *Creating Cultures of Thinking: The 8 Forces We Must Master to Truly Transform Our Schools*, Ron Ritchhart, author of *Making Thinking Visible*, explains how creating a culture of thinking is more important to learning than any particular curriculum and he outlines how any school or teacher can accomplish this by leveraging 8 cultural forces: expectations, language, time, modeling, opportunities, routines, interactions, and environment. With the techniques and rich classroom vignettes throughout this book, Ritchhart shows that creating a culture of thinking is not about just adhering to a particular set of practices or a general expectation that people should be involved in thinking. A culture of thinking produces the feelings, energy, and even joy that can propel learning forward and motivate us to do what at times can be hard and challenging mental work.

What makes this book different is that its author KNOWS this exam. He has worked with over 1000 students since 1999 on the MTEL. Most MTEL books are written by professors who have never personally worked with any MTEL student. How can they really know about this exam? Many books and Internet products are actually written for other states' exams. They only CHANGE THE COVER to read "MTEL." This book was created with you in mind. People with learning differences, those who need help with ESL, and many others with and without special issues have had great success with ETI's programs and study materials—our students' passing rates increase over 500%. The curriculum is straightforward and concise,

and it builds upon itself to help with the learning process. The students who have been through ETI's MTEL (Massachusetts Tests for Educator Licensure) programs since 1999 say that it is the best in Massachusetts. They know; they have been through them all. The author's over 1500 students have offered experiences, suggestions, and feedback that are integrated in the strategies and skills presented. This book is important because it includes all of the skills you need to pass this exam. Nothing extra is included, and everything that is included is essential. The strategies are tested and approved by hundreds of test takers who have provided feedback and novel ideas over the last ten years.

When Reichl took over from the formidable and aloof Bryan Miller as the New York Times' restaurant reviewer, she promised to shake things up. And so she did. Gone were the days when only posh restaurants with European chefs were reviewed. Reichl, with a highly developed knowledge and love of Asian cuisine from her years as a West Coast food critic, began to review the small simple establishments that abound in Manhattan, Brooklyn and Queens. Many loved it, the Establishment hated it, but her influence was significant. She brought a fresh writing style to her reviews and adopted a radical way of getting them. Amassing a wardrobe of wigs and costumes, she deliberately disguised herself so that she would not receive special treatment. As a result, she had a totally different dining experience as say, Miriam the Jewish mother than she did as Ruth Reichl the reviewer, and she wasn't afraid to write about it. The resulting reviews were hilarious and sobering, full of fascinating insights and delicious gossip. *Garlic and Sapphires* is a wildly entertaining chronicle of Reichl's New York Times years.

A classic of reportage, *Oranges* was first conceived as a short magazine article about oranges and orange juice, but the author kept encountering so much irresistible information that he eventually found that he had in fact written a book. It contains sketches of orange growers, orange botanists, orange pickers, orange packers, early settlers on Florida's Indian River, the first orange barons, modern concentrate makers, and a fascinating profile of Ben Hill Griffin of Frostproof, Florida who may be the last of the individual orange barons. McPhee's astonishing book has an almost narrative progression, is immensely readable, and is frequently amusing. Louis XIV hung tapestries of oranges in the halls of Versailles, because oranges and orange trees were the symbols of his nature and his reign. This book, in a sense, is a tapestry of oranges, too—with elements in it that range from the great orangeries of European monarchs to a custom of people in the modern Caribbean who split oranges and clean floors with them, one half in each hand.
