The Handbook of Mentoring at Work

A Practical Guide for Medical Teachers E-Book

Mentorship practice has been part of the human experience since the Golden Age of Greece. Engaging with a mentor as a way to learn and achieve one's full potential is an ancient and respected practice. And, it has been the keystone on which the Association for Women in Science (AWIS) has built its program over the past three decades. Trailblazers, such as Dr. Estelle Ramey and Dr. Anne Briscoe, experienced first-hand the isolation of women in the country's male-dominated

scientific establishment and worked to build an organization that would promote women through mentoring relationships. Dr. Ramey, who earned her degree in physiology and biophysics and taught at Georgetown Medical School, was a well-known feminist speaker and writer. Noted for her great wit, she once quipped, “I was startled to learn that ovarian hormones are toxic to brain cells.” Throughout her career, Dr. Ramey decried sexist comments and situations that treated women as less than fully human. She felt very strongly about how little, if anything, it took to extend a helping hand to someone else in a way that could really make a huge difference in her life. As she wrote in her book called *Letters to our Grandchildren*, “If I could leave you with any advice, it would be to speak words of caring not only to those closest to you, but to all the hungry ears you encounter on your journey through a cold world.

What Makes a Successful Leader? When we think of a leader, the characteristics

that come to mind are power, strength, and someone who inspires us. And while those traits are an important part of what makes a great and successful leader, there are many more pieces to the puzzle. How would you feel following a leader who didn't take accountability for their actions? What if the leader showed a lack of discernment when it came to making major decisions or how to properly handle conflict? Now think of a leader who possesses the power, strength, and the ability to inspire--as well as the ability to manage conflict, establish credibility with colleagues, and live out a purpose through their convictions. Selecting between these two leaders is an easy choice. Join author Vince Miller as he guides you through twenty lessons on how to be a virtuous leader, and how to use those skills to mentor future leaders.

Thank you for taking the time to choose this book. I hope you enjoy reading it as much as I enjoyed the experience of putting it together. The book was a labor of love and even though it started off very fast, it took much longer than expected to finish. But I believe all good things come in their own time, so even with all of life's adventures seeming to get in the way, I knew it would all come together at the

right place and time. Now for the big question, what drew you to this book? Are you looking for something? If you chose it in the hope of finding some answers then you're in the right place. For every book or place that you look always has a golden nugget of wisdom hidden somewhere inside. The trick is to have an open mind so you can find them when they present themselves. With that in mind, I'm going to tell you what you won't find in this book. If you're looking for some kind of how-to book about how to set up your own dungeon or how to use some easy come-on lines to score a date then you may want to keep looking. This book explains the deep core issues of male bonding in the BD/SM fetish setting. So why did I write this book? I wrote it for a number of reasons, some were personal and others spiritual but mostly I wrote it for you. To offer you a new view on where our culture is heading and to offer a map to help navigate through treacherous waters as safely as possible. In these pages you'll find truths that will free you in ways you won't expect. I presented the information in a simple format and added some stories to make the reading more interesting. My goal is for you to be better able to fully enjoy your sexuality and understand how close the bonds run between two people when respect, trust and understanding are present. As for me I'm always looking for answers. I'm always changing and always growing. I believe that you never stop evolving. There's always something new to learn or experience. Life just works that way. You can fight it or be an element of change. The choice is yours.

from underrepresented groups. Written by an acknowledged expert in the field of STEM mentoring, the book constitutes a virtual consultant that enables readers to diagnose the issues they face, identify priorities, and implement appropriate practices to achieve their goals. The book describes the real and perceived barriers that underrepresented students—to include women, students of color, transfer students, and first-generation college students—encounter when considering enrollment, or participating, in science courses; considers the issues they face at the various transitions in their education, from entering college to declaring a major and moving on to a profession; and sets out the range of mentoring options available to program designers. By posing key questions and using three running case illustrations of common dilemmas, the book walks readers through the process of matching the best design options with the particular needs and resources of their own department or campus. Intentionally brief and to the point, the book is nonetheless a comprehensive guide to the full range mentoring models and best practices, that also covers issues of institutional and departmental climate and teaching methods, and offers insider insights to help designers avoid pitfalls as they create effective, sustainable mentoring initiatives. This guide will assist administrators working on new initiatives to broaden access and improve persistence and graduation in their programs, as well as apply for research grants, by clarifying objectives and identifying the effective evidence-based practices to achieve them. It also provides common conversation-starters for departments to identify obstacles to enrollment and broaden participation.
