The Men Inside

Irish Officers in the British Forces, 1922-45

“A career can be like a snake and ladder journey, full of ups and downs, but remember, your career is a journey, not a destination.” Your career does not start and end when you get a job. You start your career when you begin doing activities at school, playing sports on weekends, or working at your part-time or volunteer job. There are skills that you can develop and steps you can take each time you are faced with your next career transition. Your career will be a rich and rewarding experience that will require you to make many critical decisions throughout your life. So why won't you just leave school and go straight into a job that you'll have for life? Lots of reasons! You might find out you don't suit a job, you might want to earn more money, you may be offered the chance to do something more challenging, or your passion is something else. That's when you need to work through your career decision-making process and review the career you think is the best for you. The Right Hand to Eat helps you choose your career—it doesn't choose you!

CAREER GUIDANCE

The Spectator

""I am leaving to Tahiti where I shall hope to end my days. My artl regard as no more than a tender shoot, though one that I hope to develop into a wild and

primitive growth. The European Gauguin has ceased to exist and nobody will ever see any of his works here again." "With these words, Paul Gauguin set off on a voyage that would not only irrevocably change his own life and work, but also the entire course of modern art. This volume combines for the first time the artist's public expressions of his world - his paintings - with his private correspondence - to his estranged wife, his agent, and his illustrious contemporaries such as Strindberg and van Gogh. Gauguin vividly describes his creative movements as well as the details of his daily life, most poignantly his consuming worries about health and finances." "The book is illustrated throughout with many of Gauguin's most ambitious and beautiful canvases. Watercolors and pencil sketches illuminate the early stages of these major works, and illustrated journal pages and rare vintage photographs reveal the people and places he knew." "An invaluable insight into Gauguin's life, this volume is equally important for its determined look at the transgressive spirit of those artists who challenge the conventions of their time to create an art of the future."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Parents and Children

The Public and Preparatory Schools Year Book

A brilliant collection of short stories woven out of the author's association with the seas as a marine engineer. Exquisitely narrated, the author is able to transport the reader into the deep seas with his characters. Through the tapestry of his narration, Phillipos is able to delineate the stories of ordinary human beings and their ordinary human emotions on one hand, while on the other he dabbles with the realm of the unreal/paranormal. Anecdotal and churned out of his personal

memory, this collection is simply unputdownable.
