Other texts stop at the Solow model, an approach first formulated in the 1950s. Jones presents the Romer model at an appropriate level for undergraduates. The text is written in an engaging, conversational style that makes students feel as though they are sitting in on one of Professor Jones's lectures. When introducing new material, he presents it in a careful, patient manner and follows the discussion with case studies and worked examples. Each chapter includes two complete worked examples that walk students step-by-step through the material covered in that chapter. In addition, this is the first text in the intermediate macroeconomics market to be fully integrated with an online homework management system.
