DK's latest Car traces the history and role of the automobile, cataloging the diverse spectrum of cars from the first prototypes to the supercars of today. The book will not only cover the technological developments and manufacture of cars, but also the cultural backdrop against which the various models arose, and the enduring impact which the car has had on society as an object of curiosity, symbol of luxury, and item of necessity.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

#### **World Encyclopaedia of Aero Engines**

A reference work describing every major aeroplane engine manufacturer throughout the world, together with its products, from the pioneering days to the recent engines. Each aero engine is within its technological and historical context with power plants of all nationalities illustrated. The human element of the story is also included with the personal struggles that resulted in such notable engines as the Rolls-Royce Merlin and the Pratt & Whitney P6 being related.

#### **Harbour & Shipping**

#### **The Automobile Revolution**

The Story of Louis Renault's first motor car.
