### The Cape Town Convention

A hundred years ago, the Minotaurs saved Caeli-Amur from conquest. Now, three very different people may hold the keys to the city's survival. Once, it is said, gods used magic to create reality, with powers that defied explanation. But the magic—or science, if one believes those who try to master the dangers of thaumaturgy—now seems more like a dream. Industrial workers for House Technis, farmers for House Arbor, and fisher folk of House Marin eke out a living and hope for a better future. But the philosopher-assassin Kata plots a betrayal that will cost the lives of godlike Minotaurs; the ambitious bureaucrat Boris Autec rises through the ranks as his private life turns to ashes; and the idealistic seditionist Maximilian hatches a mad plot to unlock the vaunted secrets of the Great Library of Caeli-Enas, drowned in the fabled city at the bottom of the sea, its strangeness visible from the skies above. In a novel of startling originality and riveting suspense, these three people, reflecting all the hopes and dreams of the ancient city, risk everything for a future that they can create only by throwing off the shackles of tradition and superstition, as their destinies collide at ground zero of a conflagration that will transform the world . . . or destroy it. Unwrapped Sky is a stunningly original debut by Rjurik Davidson, a young master of the New Weird. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The occurrences of both injury and death that take place on the job are a significant public health problem in the United States, causing a substantial human and economic burden. Traumatic Injury Research at NIOSH is the sixth report in the series Reviews of Research Programs of the National Institute for Occupational Safety and Health. The Committee to Evaluate the NIOSH Traumatic Injury Research Program found the program's research during 1996-2005 (the evaluation period for this review) relevant to reducing the burden of traumatic injury in the workplace and to have contributed to improvements in worker health and safety. To continue to reduce injuries and deaths to workers due to trauma, the committee recommended that the TI Research Program continue setting goals within the program's scope and resources; work with other federal agencies that support injury prevention and control research to outline areas of collaboration; embark on a program to increase the visibility of traumatic injury research; develop a strategic plan for evaluating its research-to-practice efforts and for building the capacity to carry out these efforts; and consider research on the safety impacts of changes in the nature of work as well as intervention research targeting organization policies and practices.
