Master's Thesis from the year 2016 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,0, Cologne University of Applied Sciences, language: English, abstract: The digital revolution has led to undisputable and irreversible changes in the way we experience everyday life. This applies especially to our shopping experiences. With the increasing number of sales channels and omnipresent, easy-to-reach information, people have grown to be the best informed customers who have ever existed. To accommodate these changes in the business context, companies have

to change their traditional push-based, brand-centric view to one recognizing and catering to an economy of connected experiences that are equally owned by company and customer. This integrated brand experience is referred to as omnichannel experience. Omnichannel marketing means that companies now need to provide a seamless shopping experience across channels, allowing their customers to switch between devices and the physical preference whenever and however they like. This work raised the hypothesis that today, many premium fashion companies are still struggling to offer seamless and engaging omnichannel experiences, because they lack a holistic measurement framework including future-oriented KPIs – due to legacy systems and departments’ silo perspectives. The contribution to this article is twofold. First, it consists of a review of existing literature on the subject. Second, to leverage the significance and implication of this current topic, interviews with seven leading industry experts were conducted. The gained insights were interwoven with the thesis’ literature review and support the work’s findings and statements. About the author: Insa Schniedermeier is a Senior Associate Marketing Strategy & Analysis based out of Sapient Nitro’s Cologne office. She has worked within different industries with focus on consumer goods and retail, developing digital experience strategies for Fortune 500/ DAX 30 companies. Insa’s breadth of experience includes customer, market and trend research, (digital) strategy development, and project and product management.

SPEECH WITH OVER 14 MILLION VIEWS ON YOUTUBE If you want to change the world, start off by making your bed. On May 17, 2014, Admiral William H. McRaven addressed the graduating class of the University of Texas at Austin on their Commencement day. Taking inspiration from the university's slogan, "What starts here changes the world," he shared the ten principles he learned during Navy Seal training that helped him overcome challenges not only in his training and long Naval career, but also throughout his life; and he explained how anyone can use these basic lessons to change themselves-and the world-for the better. Admiral McRaven's original speech went viral with over 10 million views. Building on the core tenets laid out in his speech, McRaven now recounts tales from his own life and from those of people he encountered during his military service who dealt with hardship and made tough decisions with determination, compassion, honor, and courage. Told with great humility and optimism, this timeless book provides simple wisdom, practical advice, and words of encouragement that will inspire readers to achieve more, even in life's darkest moments.

Regulatory Foundations for the Food Protection Professional is a comprehensive guide for the entry-level food protection professional (FPP) working in either the public or private sector. The book can also serve as a foundation for students in academic programs preparing for a career in food protection. Additionally, as the Food Safety Modernization Act (FSMA) is implemented, this book will provide valuable information for countries wishing to export foods and food ingredients to the U.S. and comply with U.S. food safety regulations. The book is based on the Entry-Level component of the National Curriculum Framework for regulators, created by the International Food Protection Training Institute (IFPTI) located in Battle Creek, Michigan. The Entry-Level component of the National Curriculum Framework contains more than twenty content areas, including Epidemiology, Microbiology, Labeling, Food Defense Awareness, Program Standards, Environmental Health and Safety, Sampling, and Allergens. Each chapter is divided

into specific learning objectives aimed at equipping the entry-level FPP with the knowledge and skills necessary to successfully perform his or her job, whether in the public or private sector, and whether in food safety or food defense.

Established in 2009, IFPTI is improving public health by building competency-based training and certification systems, and cultivating leadership for the food protection community worldwide. Our mission is to enhance public health by improving the protection of the world's food supply through training, certification, thought leadership, and technology. See more at www.ifpti.org.

Balanced, practical risk management for post - financial crisis institutions A Risk Professional's Survival Guide fills a critical gap left by existing risk management texts. Instead of focusing only on quantitative risk analysis or only on institutional risk management, this book takes a comprehensive approach. The disasters of the recent financial crisis taught us that managing risk is both an art and a science, and it is critical for practitioners to understand how individual risks are integrated at the enterprise level. This book is the only resource of its kind to introduce all of the key risk management concepts in a cohesive case study spanning each chapter. A hypothetical bank drawn from elements of several real world institutions serves as a backdrop for topics from credit risk and operational risk to understanding big-picture risk exposure. You will be able to see exactly how each rigorous concept is applied in actual risk management contexts. This book includes: Supplemental Excel-based Visual Basic (VBA) modules, so you can interact directly with risk models Clear explanations of the importance of risk

management in preventing financial disasters Real world examples and lessons learned from past crises Risk policies, infrastructure, and activities that balance limited quantitative models This book provides the element of hands-on application necessary to put enterprise risk management into effective practice. The very best risk managers rely on a balanced approach that leverages every aspect of financial operations for an integrative risk management strategy. 5 Steps to a 5 AP Biology with CD-ROM, 2014-2015 Edition

The present research consists of 45 pages, 4 chapters, 5 subchapters, 6 tables, 6 figures and 6 appendices. The author of the paper has analysed different kinds of literature, such as scientific research and publications, scientific and course books referred to the teaching reading methods and the best approaches. In his practical part of this research the author has tried to implement the most effective methods and approaches into practise. All the author's successes and failures are described, analysed and taken into consideration in this research. The author of the paper has chosen teaching reading topic because he discovered evident contradiction between a comparatively great number of English lessons: qualitative course books on one hand, and apparently poor reading skills on the other hand in elementary school. The main, positive conclusion of the research is that variations of teaching methods considerably improve reading skills, but this regularity does

not always apply to the children that are having different psychological problems like shyness, diffidence, fear. At the same time a poor ability to make conclusion and poor vocabulary is the main cause of weak language comprehension and lacking reading skills.
